CHAPTER 10: GENERAL PROVISIONS

§ 10.01 TITLE OF CODE

(A) All ordinances of a permanent and general nature of the city, as revised, codified, rearranged, renumbered, and consolidated into component codes, titles, chapters, and sections, shall be known and designated as the “city code,” for which designation “code of ordinances,” “codified ordinances,” or “code” may be substituted. Code title, chapter, and section headings do not constitute any part of the law as contained in the code.

(B) All references to codes, titles, chapters, and sections are to the components of the code unless otherwise specified. Any component code may be referred to and cited by its name, such as the “traffic code.” Sections may be referred to and cited by the designation “§” followed by the number, such as “§ 10.01.” Headings and captions used in this code other than the title, chapter, and section numbers are employed for reference purposes only and shall not be deemed a part of the text of any section.

§ 10.02 RULES OF INTERPRETATION

(A) *Generally.* Unless otherwise provided herein, or by law or implication required, the same rules of construction, definition, and application shall govern the interpretation of this code as those governing the interpretation of state law.

(B) *Specific rules of interpretation.* The construction of all ordinances of this city shall be by the following rules, unless that construction is plainly repugnant to the intent of the legislative body or of the context of the same ordinance.

(1) **AND or OR.** Either conjunction shall include the other as if written “and/or,” whenever the context requires.

(2) *Acts by assistants.* When a statute, code provision, or ordinance requires an act to be done which, by law, an agent or deputy as well may do as the principal, that requisition shall be satisfied by the performance of the act by an authorized agent or deputy.

(3) *Gender; singular and plural; tenses.* Words denoting the masculine gender shall be deemed to include the feminine and neuter genders; words in the singular shall include the plural, and words in the plural shall include the singular; and the use of a verb in the present tense shall include the future, if applicable.

(4) *General term.* A general term following specific enumeration of terms is not to be limited to the class enumerated unless expressly so limited.

§ 10.03 APPLICATION TO FUTURE ORDINANCES

All provisions of Title I compatible with future legislation shall apply to ordinances

TITLE I: GENERAL PROVISIONS

hereafter adopted which amend or supplement this code unless otherwise specifically provided.

§ 10.04 CAPTIONS

Headings and captions used in this code other than the title, chapter, and section numbers are employed for reference purposes only and shall not be deemed a part of the text of any section.

§ 10.05 DEFINITIONS

(A) *General rule.* Words and phrases shall be taken in their plain, or ordinary and usual, sense. However, technical words and phrases having a peculiar and appropriate meaning in law shall be understood according to their technical import.

(B) *Definitions.* For the purpose of this code, the following definitions shall apply unless the context clearly indicates or requires a different meaning.

CITY. The area within the corporate boundaries of the City of Morristown, Minnesota, as presently established or as amended by ordinance, annexation, or other legal actions at a future time. The term **CITY** when used in this code may also be used to refer to the City Council and its authorized representatives.

An affirmation in all cases in which, by law, an affirmation may be substituted for an oath, and in those cases the words **SWEAR** and **SWORN** shall be equivalent to the words **AFFIRM** and **AFFIRMED**. All terms shall mean a pledge taken by the person and administered by an individual authorized by state law.

OFFICER, OFFICE, EMPLOYEE, COMMISSION, or DEPARTMENT. An officer, office, employee, commission, or department of this city unless the context clearly requires otherwise.

PERSON. Extends to and includes an individual, person, persons, firm, corporation, co-partnership, trustee, lessee, or receiver. Whenever used in any clause prescribing and imposing a penalty, the terms **PERSON** or **WHOEVER** as applied to any unincorporated entity shall mean the partners or members thereof, and as applied to corporations, the officers or agents thereof.

YEAR. A calendar year, unless otherwise expressed.

§ 10.06 SEVERABILITY

If any provision of this code as now or later amended or its application to any person or circumstance is held invalid, the invalidity does not affect other provisions that can be given effect without the invalid provision or application.

§ 10.07 REFERENCE TO OTHER SECTIONS

Whenever in one section reference is made to another section hereof, that reference shall extend and apply to the section referred to as subsequently amended, revised, recodified, or renumbered unless the subject matter is changed or materially altered by the amendment or revision.

§ 10.08 REFERENCE TO OFFICES

Reference to a public office or officer shall be deemed to apply to any office, officer, or employee of this city exercising the powers, duties, or functions contemplated in the provision, irrespective of any transfer of functions or change in the official title of the functionary.

§ 10.09 ERRORS AND OMISSIONS

If a manifest error is discovered, consisting of the misspelling of any words; the omission of any word or words necessary to express the intention of the provisions affected; the use of a word or words to which no meaning can be attached; or the use of a word or words when another word or words was clearly intended to express the intent, the spelling shall be corrected and the

TITLE I: GENERAL PROVISIONS

word or words supplied, omitted, or substituted as will conform with the manifest intention, and the provisions shall have the same effect as though the correct words were contained in the text as originally published. No alteration shall be made or permitted if any question exists regarding the nature or extent of the error.

§ 10.10 OFFICIAL TIME

The official time, as established by applicable state and federal laws, shall be the official time within this city for the transaction of all city business.

§ 10.11 REASONABLE TIME

(A) In all cases where an ordinance requires an act to be done in a reasonable time or requires reasonable notice to be given, reasonable time or notice shall be deemed to mean the time which is necessary for a prompt performance of the act or the giving of the notice.

(B) The time within which an act is to be done, as herein provided, shall be computed by excluding the first day and including the last. If the last day is a legal holiday or a Sunday, it shall be excluded.

§ 10.12 ORDINANCES REPEALED

All prior ordinances pertaining to the subjects treated by this code shall be deemed repealed from and after the effective date of this code.

§ 10.13 ORDINANCES UNAFFECTED

All ordinances of a temporary or special nature and all other ordinances pertaining to subjects not embraced in this code shall remain in full force and effect unless herein repealed expressly or by necessary implication.

§ 10.15 REPEAL OR MODIFICATION OF ORDINANCE

CHAPTER 10: GENERAL PROVISIONS

(A) Whenever any ordinance or part of an ordinance shall be repealed or modified by a subsequent ordinance, the ordinance or part of an ordinance thus repealed or modified shall continue in force until the publication of the ordinance repealing or modifying it when publication is required to give effect to it, unless otherwise expressly provided.

(B) No suit, proceedings, right, fine, forfeiture, or penalty instituted, created, given, secured, or accrued under any ordinance previous to its repeal shall in any way be affected, released, or discharged, but may be prosecuted, enjoyed, and recovered as fully as if the ordinance had continued in force unless it is otherwise expressly provided.

(C) When any ordinance repealing a former ordinance, clause, or provision shall be itself repealed, the repeal shall not be construed to revive the former ordinance, clause, or provision, unless it is expressly provided.

§ 10.16 ORDINANCES WHICH AMEND OR SUPPLEMENT CODE

(A) If the City Council shall desire to amend any existing chapter or section of this code, the chapter or section shall be specifically repealed and a new chapter or section, containing the desired amendment, substituted in its place.

(B) Any ordinance which is proposed to add to the existing code a new chapter or section shall indicate, with reference to the arrangement of this code, the proper number of the chapter or section. In addition to this indication as may appear in the text of the proposed ordinance, a caption or title shall be shown in concise form above the ordinance.

§ 10.17 PRESERVATION OF PENALTIES, OFFENSES, RIGHTS, AND LIABILITIES

All offenses committed under laws in force prior to the effective date of this code shall be prosecuted and remain punishable as provided by those laws. This code does not affect any rights or liabilities accrued, penalties incurred, or proceedings begun prior to the effective date of this code. The liabilities, proceedings, and rights are continued; punishments, penalties, or forfeitures shall be enforced and imposed as if this code had not been enacted. In particular, any agreement granting permission to utilize highway rights-of-way; contracts entered into or franchises granted; the acceptance, establishment, or vacation of any highway; and the election of corporate officers shall remain valid in all respects, as if this code had not been enacted.

§ 10.18 COPIES OF CODE

The official copy of this code shall be kept in the office of the City Clerk/Treasurer for public inspection. The Clerk/Treasurer shall provide a copy for sale for a reasonable charge.

TITLE I: GENERAL PROVISIONS

§ 10.19 ADOPTION OF STATUTES AND RULES BY REFERENCE

It is the intention of the City Council that, when adopting this code, all future amendments to any state or federal rules and statutes adopted by reference in this code or referenced in this code are hereby adopted by reference or referenced as if they had been in existence at the time this code was adopted, unless there is clear intention expressed in the code to the contrary.

§ 10.20 ENFORCEMENT

(A) Any licensed peace officer of the city's Police Department, or the County Sheriff, or any Deputy Sheriff, shall have the authority to enforce any provision of this code.

(B) As permitted by M.S. § 626.862, as it may be amended from time to time, the City Clerk/Treasurer shall have the authority to administer and enforce this code. In addition, under that statutory authority, certain individuals designated within the code or by the Clerk/Treasurer or City Council shall have the authority to administer and enforce the provisions specified. All and any person or persons designated may issue a citation in lieu of arrest or continued detention to enforce any provision of the code.

(C) The City Clerk/Treasurer and any city official or employee designated by this code who has the responsibility to perform a duty under this code may with the permission of a licensee of a business or owner of any property or resident of a dwelling, or other person in control of any premises, inspect or otherwise enter any property to enforce compliance with this code.

(D) If the licensee, owner, resident, or other person in control of a premises objects to the inspection of or entrance to the property, the City Clerk/Treasurer, peace officer, or any employee or official charged with the duty of enforcing the provisions of this code may, upon a showing that probable cause exists for the issuance of a valid search warrant from a court of competent jurisdiction, petition and obtain a search warrant before conducting the inspection or otherwise entering the property. This warrant shall be only to determine whether the provisions of this code enacted to protect the health, safety, and welfare of the people are being complied with and to enforce these provisions only, and no criminal charges shall be made as a result of the warrant. No warrant shall be issued unless there be probable cause to issue the warrant. Probable cause occurs if the search is reasonable. Probable cause does not depend on specific knowledge of the condition of a particular property.

(E) Every licensee, owner, resident, or other person in control of property within the city shall permit at reasonable times inspections of or entrance to the property by the City Clerk/Treasurer or any other authorized city officer or employee only to determine whether the provisions of this code enacted to protect the health, safety, and welfare of the people are being complied with and to enforce these provisions. Unreasonable refusal to permit the inspection of or entrance to the property shall be grounds for termination of any and all permits, licenses, or city service to the property. Mailed notice shall be given to the licensee, owner, resident, or other person in control of the property, stating the grounds for the termination, and the licensee, owner, resident, or other person in control of the property shall be given an opportunity to appear before the City Clerk/Treasurer to object to the termination before it occurs, subject to appeal of the Clerk/Treasurer's decision to the City Council at a regularly scheduled or special meeting.

CHAPTER 10: GENERAL PROVISIONS

(F) Nothing in this section shall be construed to limit the authority of the city to enter private property in urgent emergency situations where there is an imminent danger in order to protect the public health, safety, and welfare.

§ 10.98 SUPPLEMENTAL ADMINISTRATIVE PENALTIES

(A) *Purpose.* The purpose of this section is to provide the public and the city with an informal, cost effective, and expeditious alternative to traditional criminal charges for violations of certain city ordinances. The city finds that such an alternative will have the effect of reducing nuisance violations within the city, will facilitate compliance with certain code provisions, will avoid unnecessary delay in the enforcement of the Code, and will provide the city's law enforcement officials with an additional, effective enforcement tool.

(B) *Administrative offense defined.* An administrative offense is a violation of any section of the City Code and is subject to the civil fines identified in the city's fee schedule, updated from time to time by resolution of the City Council. An administrative offense is not a crime. Imposition of an administrative fine by the city shall be in addition to any other legal or equitable remedies available to the city for City Code violations.

(C) *Enforcement.* Upon the reasonable belief that an administrative offense has occurred, any police officer, city clerk, the zoning inspector or the building inspector may implement the administrative penalty procedure contained herein.

(1) *Demand for corrective action.* Depending upon the severity of the violation and necessity for immediate action, city officials may serve on the violator a demand to correct the violation. The demand shall be presented in person or by U.S. mail to the person's last known address. The demand shall state the date, time, and nature of the violation, the name of the official issuing the demand, the corrective action required, and the amount of the administrative fine if the violation is not corrected within the time specified in the demand. Nothing herein shall be interpreted to require that a demand be sent prior to issuing a citation for and administrative fine.

(2) *Issuance of administrative citation.* At any time city official may serve on the violator an administrative citation. The administrative citation shall state the date, time, and nature of the violation, the name of the official issuing the citation, the amount of the administrative fine, the manner and requirements for paying the fine or appealing the fine through the criminal justice process, and required compliance actions if applicable. The administrative citation shall be provided to the violator in person, by U.S. mail at the person's last known address, or in the case of a vehicular violation, by attaching the administrative citation to the vehicle.

(D) *Payment of administrative fine; request for criminal charge.* A person upon whom an administrative citation had been issued shall either pay the administrative fine or request a criminal charge within seven days after issuance of the administrative citation. During that

TITLE I: GENERAL PROVISIONS

period, only the City Attorney has authority to dismiss the citation and/or waive the administrative fine.

(1) *Request for criminal charge.* If the person upon whom an administrative citation has been issued requests that a criminal charge be issued within the time specified in this subdivision, the administrative offense procedure set forth in this section shall terminate and the City Attorney may issue a misdemeanor or petty misdemeanor charge against the violator in accordance with applicable City Code or state law.

(2) *Failure to request criminal charge.* If the person upon whom an administrative citation has been issued fails to pay the fine and fails to request a criminal charge within the time specified in this subdivision, the administrative fine shall constitute a personal obligation of the violator. The personal obligation may be collected by the city by any appropriate legal means. If the fine was imposed for a property-related violation, the city may assess the applicable property.

(3) *Late payment fee.* A late payment fee of 10% of the administrative fine amount shall be imposed if the person upon whom an administrative citation has been issued fails to pay the fine and fails to request a criminal charge within the time specified in this subdivision.

(E) *Repeat violations.* Repeated violations of two or more similar offenses within a 12-month period shall result in a doubling of the administrative fine established for the violation. Additional offenses within another 12-month period shall result in additional fines not to exceed five times the amount of the original penalty.

(F) *Collection of administrative fines.* The City Administrator and City Clerk are hereby authorized to utilize all methods available under Minnesota law to collect the administrative fines. The violator shall be responsible for all costs of collection, including but not limited to the costs of utilizing a collection agency and reasonable attorney's fees, incurred in the collection of the administrative fines.

(G) *Disposition of fines.* All fines collected pursuant to this section shall be paid to the city and deposited into the General Fund.
(Am. Ord. 2010-4, passed 3-5-2010; Am. Ord. 2010-1, passed 4-5-2010)

§ 10.99 GENERAL PENALTY

(A) Any person, firm, or corporation who violates any provision of this code for which another penalty is not specifically provided shall, upon conviction, be guilty of a misdemeanor. The penalty which may be imposed for any crime which is a misdemeanor under this code, including Minnesota Statutes specifically adopted by reference, shall be a sentence of not more than 90 days or a fine of not more than \$1,000, or both.

(B) Any person, firm, or corporation who violates any provision of this code, including Minnesota Statutes specifically adopted by reference, which is designated to be a petty

CHAPTER 10: GENERAL PROVISIONS

misdemeanor shall, upon conviction, be guilty of a petty misdemeanor. The penalty which may be imposed for any petty offense which is a petty misdemeanor shall be a sentence of a fine of not more than \$300.

(C) In either the case of a misdemeanor or a petty misdemeanor, the costs of prosecution may be added. A separate offense shall be deemed committed upon each day during which a violation occurs or continues.

(D) The failure of any officer or employee of the city to perform any official duty imposed by this code shall not subject the officer or employee to the penalty imposed for a violation.

(E) In addition to any penalties provided for in this section or in § 10.98, if any person, firm, or corporation fails to comply with any provision of this code, the Council or any city official designated by it may institute appropriate proceedings at law or at equity to restrain, correct, or abate the violation.

CHAPTER 10: GENERAL PROVISIONS

WHEREAS, the City Council wishes to adopt the provisions of City Code, § 10.98, establishing a procedure for requesting the voluntary payment of administrative penalties for certain violations of the code; and

Date: (Date of notice)

I hereby allege that on (date of violation) you violated § _____ of the City Code relating to _____.

The City Council has by resolution established an administrative penalty in the amount of \$ _____ for this violation.

Payment of this administrative penalty is voluntary, but if you do not pay it the city may initiate criminal proceedings for this alleged violation.

Payment is due within 14 days of the date of this notice. Before the due date, you may request an additional 14-day extension of the time to pay the administrative penalty.

As an alternative to the payment of this administrative penalty, if the situation that gave rise to this alleged violation is corrected by _____ (establish date), then the payment of the administrative penalty will be waived.

TITLE V: PUBLIC WORKS

§ 50.005 COST OF REPAIRING OR RESTORING SEWERS

In addition to any penalties that may be imposed for violation of any provision of this chapter, the city may assess against any person the cost of repairing or restoring sewers or associated facilities damaged as a result of the discharge of prohibited wastes by that person, and may collect the assessment as an additional charge for the use of the public sewer system or in any other manner deemed appropriate by the city.

GENERAL REGULATIONS

§ 50.015 DEPOSITS OF UNSANITARY MANNER PROHIBITED

It shall be unlawful for any person to place, deposit or permit to be deposited in any unsanitary manner on public or private property within the city, or in any area under the city's jurisdiction, any human or animal excrement, garbage or objectionable waste.

The owners of all houses, buildings or properties used for human occupancy, employment, recreation or other purposes from which wastewater is discharged, and which is situated within the city and adjacent to any street, alley or right-of-way in which there is now located, or may in the future be located, a public sanitary sewer of the city shall be required at the owner's expense to install a suitable service connection to the public sewer in accordance with provisions of this code within 365 days of the date the public sewer is operational; provided, the public sewer is within 200 feet of the structure generating the wastewater. All future buildings constructed on property adjacent to the public sewer shall be required to immediately connect to the public sewer. If sewer connections are not made pursuant to this section, an official ten-day notice shall be served instructing the affected property owner to make the connection.
Penalty, see § 50.999

CHAPTER 50: SEWERS

PRIVATE WASTEWATER DISPOSAL

§ 50.035 PUBLIC SEWER NOT AVAILABLE

Where a public sewer is not available under the provisions of § 50.018, the building sewer shall be connected to a private wastewater disposal system complying with the provisions of this subchapter and Minn. Rules Ch. 7080, Individual Sewage Treatment Systems Program, as they may be amended from time to time.

Penalty, see § 50.999

§ 50.036 PERMITS

The application for the permit shall be made on a form furnished by the city, which the applicant shall supplement by any plans, specifications and other information as are deemed necessary to the city.

(B) *Inspections.* A permit for a private wastewater disposal system shall not become effective until the installation is completed to the satisfaction of the city or its authorized representative. The city or its representative shall be allowed to inspect the work at any stage of construction, and in any event, the applicant for the permit shall notify the city when work is ready for final inspection, and before any underground portions are covered. The inspection shall be made within 24 hours of the receipt of notice.

BUILDING SEWERS AND CONNECTIONS

§ 50.055 RESTRICTIONS ON NEW CONNECTIONS

Any new connections to the sanitary sewer system shall be prohibited unless sufficient capacity is available in all downstream facilities, including but not limited to capacity for flow, BOD₅ and suspended solids, as determined by the Utilities Superintendent.
Penalty, see § 50.999

§ 50.056 BUILDING SEWER PERMITS

(A) *Required.* No unauthorized person shall uncover, make any connections with or opening into, use, alter or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the city.

(B) *Applications.* Applications for permits shall be made by the owner or authorized agent and the party employed to do the work, and shall state the location, name of owner, street number of the building to be connected and how occupied. No person shall extend any private building drain beyond the limits of the building or property for which the service connection permit has been given.

(C) *Classes.* There shall be 2 classes of building sewer permits: 1 for residential and commercial service, and 1 for service to establishments producing industrial wastes. In either case, the application shall be supplemented by any plans, specifications or any other information considered pertinent in the judgement of the city. The industry, as a condition of permit authorization, must provide information describing its wastewater constituents, characteristics and type of activity.

(D) *Inspection and connection.* The applicant for the building sewer permit shall notify the city when the building sewer is ready for inspection and connection to the public sewer. The connection and inspection shall be made under the supervision of the Utilities Superintendent or authorized representative thereof.
Penalty, see § 50.999

§ 50.057 COSTS AND EXPENSES

All costs and expenses incidental to the installation, connection, maintenance, and repair of the building sewer shall be borne solely by the owner of the property serviced by the building sewer. The owner shall indemnify the city from any loss or damage that may be directly or indirectly occasioned by the installation, connection, maintenance or repair of the building

CHAPTER 50: SEWERS

sewer, including those costs incurred to restore the public right of way to its prior condition.
Penalty, see § 50.999

§ 50.058 SEPARATE BUILDING SEWERS REQUIRED

A separate and independent building sewer shall be provided for every building, except where 1 building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard or driveway. The building sewer from the front building may be extended to the rear building and the whole considered 1 building sewer. The city does not and will not assume any obligation or responsibility for damage caused by or resulting from any connection.
Penalty, see § 50.999

§ 50.059 OLD BUILDING SEWERS; RESTRICTIONS ON USE

Old building sewers may be used in connection with new buildings only when they are found, on examination and test by the Utilities Superintendent or his or her representative, to meet all requirements of this chapter.

§ 50.060 CONFORMANCE TO STATE BUILDING AND PLUMBING CODE REQUIREMENTS

(A) The size, slopes, alignment, materials of construction of building sewers and the methods to be used in excavating, placing of the pipe, jointing, testing, and backfilling of the trench, shall all conform to the requirements of the State Building and Plumbing Code or other applicable rules and regulations of the city.

(B) The connection of the building sewer into the public sewer shall conform to the requirements of the State Building and Plumbing Code or other applicable rules and regulations of the city. All connections shall be made gastight and watertight, and verified by proper testing to prevent the inclusion of infiltration/inflow. Any deviation from the prescribed procedures and materials must be approved by the city prior to installation.
Penalty, see § 50.999

§ 50.061 ELEVATION BELOW BASEMENT FLOOR

Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by the building drain shall be lifted by an approved means and discharged to the building sewer.
Penalty, see § 50.999

§ 50.062 PROHIBITED DISCHARGES FROM SUMP PUMPS AND OTHER SOURCES INTO THE SANITARY SEWER SYSTEM

TITLE V: PUBLIC WORKS

- (A) *Purpose.* The City Council finds that the discharge of water from natural precipitation, surface runoff or groundwater into the City sanitary sewage system will, and has on numerous occasions in the past, flooded and overloaded the sanitary sewage system to such an extent as to cause significant and grave damage to the waste treatment plant and sanitary sewer trunk system. Such damage is caused by the backup of sewage into the plant, private properties, and pressure damage to trunk lines. The City Council, therefore, finds it essential to the minimization of damage to property and to meet Minnesota Pollution Control Agency and Morristown City Code requirements that the provisions of this Ordinance be strictly enforced to avoid emergencies in the future.
- (B) *Prohibition against discharges into sanitary sewer system.* No water from any roof, surface, groundwater, sump pump, footing tile, swimming pool, downspout, foundation drain, areaway drain, or other source of natural precipitation, surface runoff or groundwater shall be discharged into the sanitary sewer system.
- (C) *Permanent Discharge Line Required.* Dwellings and other buildings and structures which require, because of infiltration of water into basements, crawl spaces and the like, a sump pump discharge system shall have a permanently installed discharge line which shall not at any time discharge water into the sanitary sewer system, except as provided herein. A “permanently installed discharge line” shall consist of a rigid discharge line (plastic, copper, galvanized or black pipe), without valving or quick connections for altering the path of discharge. It shall not be capable of connection or reconnection to the sanitary sewer system.
- (D) *Limitations on Discharge.* The permanently installed discharge line shall provide for year-round discharge capability outside of the dwelling, building or structure to the City storm sewer via a direct connection or shall discharge onto the owner’s property. Runoff from sump pump discharge shall dissipate on the owner’s property and shall not drain onto a sidewalk or street, nor shall the discharge create a nuisance for a neighboring property.
- (E) *Disconnection.* Before October 1, 2015, any person, firm, or corporation having a discharge line connected and/or discharging into the sanitary sewer system shall disconnect and/or remove same. Any disconnects or openings in the sanitary sewer shall be closed in an effective, workmanlike manner, as approved by the City.
- (F) *Inspection/Certification.* No later than October 1, 2015, every person owning improved real estate that discharges into the City’s sanitary sewer system shall obtain an inspection of each building located on such property by an inspector designated by the City. The purpose of this inspection shall be to confirm that there is no sump pump or other prohibited discharge into the sanitary sewer system. In lieu of having the City inspect such property, the owner may, no later than October 1, 2015, furnish a certificate from a licensed plumber, in a form acceptable to the City, certifying that the property is in compliance with this Section 50.062.
- (G) *Future inspections.* Any building may be reinspected on a yearly basis in conjunction with yearly water meter or other inspections. In addition, upon probable cause the City

CHAPTER 50: SEWERS

may require any property owner to provide evidence of compliance with this Section 50.062.

- (H) *New home inspections.* All new construction that includes a connection to the sanitary sewer will be required to have their sump pump system inspected and be in compliance with this Section 50.062 prior to issuance of a certificate of occupancy.
- (I) *Waivers.* The City Council may, in its sole discretion, consider requests for waivers from the applicability of the provisions of this Section 50.062 where strict enforcement would cause undue hardship because of circumstances unique to the individual property under consideration or cause a safety problem. This would also include cases that would not be practical or feasible to correct the clear water discharge problem. Application for waivers pursuant to this Section 50.062 shall be addressed in writing to the City Clerk. The application shall at a minimum identify the property for which the waiver is being applied for, the name of the property owner/applicant, and describe in detail what characteristics of the subject property create an undue hardship. Within a reasonable time the City Council shall make its decision on the matter and send a copy of such decision to the applicant by regular mail. Upon approval of an application for a waiver, a property owner shall be allowed to discharge directly into the sanitary sewer system for the time specified in the City Council's written decision. The applicant will be required to agree to pay an additional fee for the additional sewer service, along with the regular monthly charge. Fees for this service will be based on estimated yearly average amounts discharged to the sanitary sewer.
- (J) *Surcharge and Penalties.* A surcharge of One Hundred Dollars (\$100.00) per month is added to every sewer bill mailed after October 1, 2015, to property owners who have not obtained a property inspection or provided a certificate of compliance by that date. The surcharge shall be added every month to be included in monthly bills for properties not complying with this Section 50.062. All properties found during yearly inspection to have violated this Section 50.062 will be subject to the \$100.00 per month charge for all months between the two most recent inspections, and for each month thereafter until the property owner submits proof to the City that the property is brought into full compliance. In addition to the \$100.00 per month charge, a property owner or other person who is not in compliance with this Section 50.062 will be mailed, by regular mail, a notice that such violation shall cease and desist within a time limit provided by the City Council. If such violation does not cease and desist by the established time limit, the owner of the property or other person violating Section 50.062 shall be guilty of a misdemeanor.

(Am. 2014-4, passed 11-3-2014) Penalty, see § 50.999

§ 50.063 EXCAVATIONS

All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the city.

TITLE V: PUBLIC WORKS

Penalty, see § 50.999

§ 50.064 LICENSES

(A) *Required.* No person shall make a service connection with any public sewer unless regularly licensed under this chapter to perform the work, and no permit shall be granted to any person except a regularly licensed person. A person licensed as a plumber by the State of Minnesota, or a person in the ditch installing the pipe who has a card showing that they have completed a program of training that incorporates the Plumbing Code installation requirements, issued by either the Associated Builders and Contractors, Laborers-Employers Cooperation Educational Trust, or Minnesota Utility Contractors Association, is not subject to the licensing requirements of this section.

(B) *Application.* Any person desiring a license to make a service connection with public sewers shall apply in writing to the City Council with satisfactory evidence that the applicant or employer is trained or skilled in the business and qualified to receive a license. All applications shall be referred to the Utilities Superintendent for recommendations to the Council. If approved by the Council, the license shall be issued by the City Clerk/Treasurer upon the filing of a bond as hereinafter provided.

(C) *Issuance.* No license shall be issued to any person until a policy of insurance to the city, approved by the Council, is filed with the City Clerk/Treasurer conditioned that the licensee will indemnify and save harmless the city from all suits, accidents and damage that may arise by reason of any opening in any street, alley or public ground made by the licensee or by those in the licensee's employment for any purpose whatever, and that the licensee will replace and restore the street and alley over that opening to the condition existing prior to installation, adequately guard with barricades and lights, and will keep and maintain the same to the satisfaction of the Utilities Superintendent, and shall conform in all respects to any rules and regulations of the Council relative thereto, and pay all fines that may be imposed on the licensee by law.

(D) *Fee.* The license fee for making service connections shall be as established by the Ordinance Establishing Fees and Charges adopted pursuant to § 32.20 of this code, as that ordinance may be amended from time to time. All licenses shall expire on December 31 of the license year unless the license is suspended or revoked by the Council for cause.

(E) *Suspension or revocation.* The Council may suspend or revoke any license issued under this subchapter for any of the following causes:

(1) Giving false information in connection with the application for a license.

(2) Incompetence of the licensee.

(3) Willful violation of any provisions of this chapter or any rule or regulation pertaining to the making of service connections.

Penalty, see § 50.999

USE OF PUBLIC SERVICES

CHAPTER 50: SEWERS

§ 50.080 DISCHARGES OF UNPOLLUTED WATER

(A) No person shall discharge or caused to be discharged any water such as stormwater, ground water, roof runoff, surface drainage or non-contact cooling water to any sanitary sewer.

(B) Stormwater and all other unpolluted drainage shall be discharged to those sewers as are specifically designed as storm sewers or to a natural outlet approved by the city and other regulatory agencies. Industrial cooling water or unpolluted process waters may be discharged to a storm sewer or natural outlet on approval of the city and upon approval and the issuance of a discharge permit by the MPCA.

Penalty, see § 50.999

§ 50.081 DISCHARGES OF WATERS OR WASTES

No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

(A) Any liquids, solids or gases which by reason of their nature or quantity are, or may be, sufficient either alone or by interaction with other substances to cause fire or explosion or be injurious in any other way to the wastewater disposal system or to the operation of the system. Prohibited materials include but are not limited to gasoline, kerosene, naphtha, benzene, toluene, xylene, ethers, alcohols, ketones, aldehydes, peroxides, chlorates, perchlorates, bromates, carbides, hydrides and sulfides.

(B) Solid or viscous substances which will cause obstruction to the flow in a sewer or other interference with the operation of the wastewater treatment facilities such as but not limited to grease, garbage with particles greater than ½-inch in any dimension, animal guts or tissues, paunch manure, bones, hair, hides or fleshings, entrails, whole blood, feathers, ashes, cinders, sand, spent lime, stone or marble dust, metal, glass, straw, shavings, grass clippings, rags, spent grains, spent hops, waste paper, wood, plastic, asphalt residues, residues from refining or processing of fuel or lubricating oil, mud or glass grinding or polishing wastes.

(C) Any wastewater having a pH of less than 5.0 or greater than 9.5 or having any other corrosive property capable of causing damage or hazard to structures, equipment and personnel of the wastewater disposal system.

(D) Any wastewater containing toxic pollutants in sufficient quantity, either singly or by interaction with other pollutants, to inhibit or disrupt any wastewater treatment process, constitute a hazard to humans or animals, or create a toxic effect in the receiving waters of the wastewater disposal system. A toxic pollutant shall include but not be limited to any pollutant identified pursuant to Section 307(a) of the Act (33 USC 1317(a)).

Penalty, see § 50.999

§ 50.082 LIMITED DISCHARGES

(A) The following described substances, materials, water or wastes shall be limited in discharges to municipal systems to concentrations or quantities which will not harm either sewers, the wastewater treatment works, treatment process or equipment, will not have an adverse effect on the receiving stream and soil, vegetation and ground water, or will not otherwise endanger lives, limb, public property, or constitute a nuisance. The Utilities Superintendent may set limitations lower than limitations established in the regulations below if,

TITLE V: PUBLIC WORKS

in his or her opinion, the more severe limitations are necessary to meet the above objectives. In forming his or her opinion as to the acceptability of wastes, the Utilities Superintendent will give consideration to factors as the quantity of subject waste in reaction to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, the city's NPDES/SDS permit, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors.

(B) The limitations or restrictions on materials or characteristics of waste or wastewaters discharged to the sanitary sewer which shall not be violated without approval of the Utilities Superintendent are as follows:

(1) Any wastewater having a temperature greater than 150°F (65.6°C), or causing, individually or in combination with other wastewater, the influent at the wastewater treatment plant to have a temperature exceeding 104°F (40°C), or having heat in amounts which will inhibit biological activity in the wastewater treatment works resulting in interference therein.

(2) Any wastewater containing fats, wax, grease or oils, whether emulsified or not, in excess of 100 mg/l or containing substances which may solidify or become viscous at temperatures between 32°F and 150°F (0°C and 65.6°C); and any wastewater containing oil and grease concentrations of mineral origin of greater than 100 mg/l, whether emulsified or not.

(3) Any quantities of flow, concentrations, or both which constitute a “slug” as defined in § 50.001.

(4) Any garbage not properly shredded, as defined in § 50.001 of this chapter. Garbage grinders may be connected to sanitary sewers from homes, hotels, institutions, restaurants, hospitals, catering establishments or similar places where garbage originates from the preparation of food on the premises or when served by caterers.

(5) Any noxious or malodorous liquids, gases or solids which either singly or by interaction with other wastes are capable of creating a public nuisance or hazard to life, or are sufficient to prevent entry into the sewers for their maintenance and repair.

(6) Any wastewater with objectionable color not removed in the treatment process such as but not limited to dye wastes and vegetable tanning solutions.

(7) Non-contact cooling water or unpolluted storm, drainage or ground water.

(8) Wastewater containing inert suspended-solids such as but not limited to fullers earth, lime slurries, and lime residues, or of dissolved solids such as but not limited to sodium chloride and sodium sulfate, in quantities that would cause disruption with the wastewater disposal system.

(9) Any radioactive wastes or isotopes of half-life or concentration as may exceed limits established by the Utilities Superintendent in compliance with applicable state or federal regulations.

(10) Any waters or wastes containing the following substances to the degree that any material received in the composite wastewater at the wastewater treatment works is detrimental to treatment process, adversely impacts land application, adversely effects receiving waters, or is in violation of standards pursuant to Section 307(b) of the Act (33 USC 1317(b)): Arsenic, Cadmium, Copper, Cyanide, Lead, Mercury, Nickel, Silver, total Chromium, Zinc and Phenolic compounds which cannot be removed by the city's wastewater treatment system.

CHAPTER 50: SEWERS

(11) Any wastewater which creates conditions at or near the wastewater disposal system which violates any statute, rule, regulation or ordinance of any regulatory agency, or state or federal regulatory body.

(12) Any waters or wastes containing BOD₅ or suspended solids of character and quantity that unusual attention or expense is required to handle the materials at the wastewater treatment works, except as may be permitted by specific written agreement subject to the provisions of § 50.094.

§ 50.083 DISCHARGES HAZARDOUS TO LIFE OR CONSTITUTE PUBLIC NUISANCES

(A) If any waters or wastes are discharged or are proposed to be discharged to the public sewers which contain substances or possess the characteristics enumerated in § 50.082, or which in the judgement of the Utilities Superintendent may have a deleterious effect upon the wastewater treatment facilities, processes, or equipment, receiving waters or soil, vegetation, and ground water, or which otherwise create a hazard to life or constitute a public nuisance, the city may:

- (1) Reject the wastes;
- (2) Require pretreatment to an acceptable condition for discharge to the public sewers, pursuant to Section 307(b) of the Act (33 USC 1317(b)) and all amendments thereof;
- (3) Require control over the quantities and rates of discharge; and
- (4) Require payment to cover the added costs of handling, treating and disposing of wastes not covered by existing taxes or sewer service charges.

(B) If the city permits the pretreatment or equalization of waste flows, the design, installation and maintenance of the facilities and equipment shall be made at the owner's expense and shall be subject to the review and approval of the city pursuant to the requirements of the MPCA.

§ 50.084 INCREASING USE OF PROCESS WATER

No user shall increase the use of process water or, in any manner, attempt to dilute a discharge as a partial or complete substitute for adequate treatment to achieve compliance with the limitations contained in §§ 50.081 and 50.082, or contained in the National Categorical Pretreatment Standards or any state requirements.
Penalty, see § 50.999

§ 50.085 PRETREATMENT OR FLOW-EQUALIZING FACILITIES

Where pretreatment or flow-equalizing facilities are provided or required for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation at the expense of the owner.

TITLE V: PUBLIC WORKS

§ 50.086 GREASE, OIL AND SAND INTERCEPTORS

Grease, oil, and sand interceptors shall be provided when, in the opinion of the Utilities Superintendent, they are necessary for the proper handling of liquid wastes containing floatable grease in excessive amounts, as specified in § 50.082(B)(2), any flammable wastes as specified in § 50.081(A), sand or other harmful ingredients; except that interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of the type to be readily and easily accessible for cleaning and inspection. In the maintaining of these interceptors, the owner shall be responsible for the proper removal and disposal of the captured materials by appropriate means, and shall maintain a record of dates and means of disposal which are subject to review by the Utilities Superintendent. Any removal and hauling of the collecting materials not performed by the owner's personnel must be performed by a currently licensed waste disposal firm.

Penalty, see § 50.999

§ 50.087 INDUSTRIAL WASTES; INSTALLATIONS

Where required by the city, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable structure, or control manhole, with necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of wastes. The structure shall be accessible and safely located, and shall be constructed in accordance with plans approved by the city. The structure shall be installed by the owner at his or her expense and shall be maintained by the owner to be safe and accessible at all times.

Penalty, see § 50.999

§ 50.088 INDUSTRIAL WASTES; REQUIREMENTS

The owner of any property serviced by a building sewer carrying industrial wastes may, at the discretion of the city, be required to provide laboratory measurements, tests or analyses of waters or wastes to illustrate compliance with this chapter and any special condition for discharge established by the city or regulatory agencies having jurisdiction over the discharge. The number, type and frequency of sampling and laboratory analyses to be performed by the owner shall be as stipulated by the city. The industry must supply a complete analysis of the constituents of the wastewater discharge to assure that compliance with federal, state and local standards are being met. The owner shall report the results of measurements and laboratory analyses to the city at times and in the manner as prescribed by the city. The owner shall bear the expense of all measurements, analyses and reporting required by the city. At those times as deemed necessary, the city reserves the right to take measurements and supplies for analysis by an independent laboratory.

Penalty, see § 50.999

§ 50.089 MEASUREMENTS, TESTS AND ANALYSES OF WATERS AND WASTES

All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this chapter shall be determined in accordance with the latest edition of *Standard Methods for the Examination of Water and Wastewater*, published by the American Public Health Association. Sampling methods, location, times, duration and frequencies are to be determined on an individual basis subject to approval by the Utilities Superintendent.

Penalty, see § 50.999

CHAPTER 50: SEWERS

§ 50.090 PROTECTION FROM ACCIDENTAL DISCHARGE OF PROHIBITED MATERIALS

Where required by the city, the owner of any property serviced by a sanitary sewer shall provide protection from an accidental discharge of prohibited materials or other substances regulated by this chapter. Where necessary, facilities to prevent accidental discharges of prohibited materials shall be provided and maintained at the owner's expense. Detailed plans showing facilities and operating procedures to provide this protection shall be submitted to the Utilities Superintendent for review and approval prior to construction of the facility. Review and approval of the plans and operating procedures shall not relieve any user from the responsibility to modify the user's facility as necessary to meet the requirements of this chapter. Users shall notify the Utilities Superintendent immediately upon having a slug or accidental discharge of substances of wastewater in violation of this chapter to enable countermeasures to be taken by the Utilities Superintendent to minimize damage to the wastewater treatment works. The notification will not relieve any user of any liability for any expense, loss or damage to the wastewater treatment system or treatment process, or for any fines imposed on the city on account thereof under any state and federal law. Employers shall ensure that all employees who may cause or discover a discharge are advised of the emergency notification procedure. Penalty, see § 50.999

Upon the owner's refusal or neglect to install a catch basin or waste trap or to clean out, repair, or alter the same after the period of 30 days, the Utilities Superintendent may cause the work to be completed at the expense of the owner or representative thereof. Penalty, see § 50.999

§ 50.092 REPAIRING SERVICE CONNECTION

Whenever any service connection becomes clogged, obstructed, broken or out of order, or detrimental to the use of the public sewer, or unfit for the purpose of drainage, the owner shall repair or cause the work to be done as the Utilities Superintendent may direct. Each day after 30 days that a person neglects or fails to so act shall constitute a separate violation of this section, and the Utilities Superintendent may then cause the work to be done, and recover from the owner or agent the expense thereof by an action in the name of the city. Penalty, see § 50.999

TITLE V: PUBLIC WORKS

§ 50.093 CATCH BASIN OR WASTE TRAPS REQUIRED FOR MOTOR VEHICLE WASHING OR SERVICING FACILITIES

The City Council shall annually determine whether or not sufficient revenue is being generated for the effective operation, maintenance, replacement and management of the treatment works, and whether sufficient revenue is being generated for debt retirement. The Council will also determine whether the user charges are distributed proportionately to each user in accordance with § 50.113(B). The city shall thereafter, but not later than the end of the year, reassess and as necessary revise the Sewer Service Charge System then in use to ensure the proportionality of the user charges and to ensure the sufficiency of funds to maintain the capacity and performance to which the facilities were constructed, and to retire the construction debt.

(B) In accordance with federal and state requirements, each user will be notified annually in conjunction with a regular billing of that portion of the sewer service charge attributable to operation, maintenance and replacement.

(C) In accordance with federal and state requirements, the City Clerk/Treasurer shall be responsible for maintaining all records necessary to document compliance with the Sewer Service Charge System adopted.

(D) Disconnection of services for late payment shall follow the procedures established in § 50.117.

(F) Any additional costs caused by discharges to the treatment works of toxics or other incompatible wastes, including the cost of restoring wastewater treatment services, clean up and restoration of the receiving waters and environs, and sludge disposal, shall be borne by the discharger of the wastes, at no expense to the city.

CHAPTER 50: SEWERS

§ 50.117 DISCONNECTION FOR LATE PAYMENT

If past due balances and late fees are not paid in full within 14 days of the date of the Notice of Disconnect, water service will be disconnected, and a reconnection fee will be imposed. The property owner shall be notified at time any account is past due.

(C) *Disconnect.* Account Holders who have their water service disconnected due to nonpayment shall have a reconnection fee, which will be determined by the “Fee Schedule” adopted by resolution of the City Council, applied to their account. Accounts which have been disconnected for nonpayment shall owe a minimum of the past due amount, the late fee, and the reconnection fee prior to having water service reconnected.

(D) *Cold Weather Rule.* The Cold Weather Rule shall only apply if water utility is the primary heat source to the residence to which water services are provided. Upon verification that use of water is the primary heat source, the renter(s) or property owner will have fourteen (14) days from the day the “Notice to Disconnect” is sent by regular United States Postal Service mail to set up a payment plan with the City.

(E) *Assessment.* On or before December 1 of each year, the City Council may assess unpaid balances for water, sewer, storm sewer or refuse against the property benefited as a special assessment, pursuant to the provisions of Minnesota Statutes, Chapter 429, for certification to the County Auditor and collection together with current property taxes for the following year. (A) Except where municipal water is not available, it shall be unlawful to construct, reconstruct, or repair any private water system which is designed or intended to provide water for

CHAPTER 51: WATER

human consumption. Private wells, to provide water for other than human consumption, may be constructed, maintained and continued in use after connection is made to the water system; provided, there is no means of cross-connection between the private well and municipal water supply at any time. Hose bibbs that will enable the cross-connection of the 2 systems are prohibited on internal piping of the well system supply. Where both private and city systems are in use, outside hose bibbs shall not be installed on both systems.

(B) All new homes or buildings shall connect to the municipal water system if water is available to the property. At the time as municipal water becomes available to existing homes or buildings, a direct connection shall be made to the public system within a period of time as determined by the City Council. If the connection is not made pursuant to this chapter, a charge shall be made in an amount established by § 51.51.

(C) Where new homes or buildings do not have water available to the property, the city shall determine whether and under what conditions the municipal water system will be extended to serve the property.

(B) Permits shall be required for the installation of all air conditioning systems to the public water system. The fee shall be established pursuant to § 51.51.
Penalty, see § 10.99

§ 51.08 USE OF WATER FROM FIRE HYDRANTS; TEMPORARY CONNECTIONS

(A) *Use of fire hydrants.* Except for extinguishment of fires, no person, unless authorized by the Public Works Director or Public Utilities Department, shall operate fire hydrants or interfere in any way with the water system without first obtaining a permit to do so from the city as follows:

TITLE V: PUBLIC WORKS

(1) A permit to use a fire hydrant shall be issued for each individual job or contract and for a minimum of 30 days and for the additional 30 day period as the city shall determine. The permit shall state the location of the hydrant and shall be for the use of that hydrant and none other.

(2) The user shall make an advance cash deposit to guarantee payment for water used and to cover breakage and damage to the hydrant and meter, which shall be refunded upon expiration of the permit, less applicable charges for use.

(3) The user shall relinquish the use of the hydrant to authorized city employees in emergency situations.

(4) The user shall pay a rental charge as established pursuant to § 51.51 for each day including Sundays and legal holidays, and a fee as established by the Ordinance Establishing Fees and Charges adopted pursuant to § 32.20 of this code, as that ordinance may be amended from time to time for each 1,000 gallons of water used.

(B) *Temporary connection to fire hydrants.* An owner of a private water system may make a temporary above ground connection to a fire hydrant, subject to the time periods, conditions, and payment specified in § 51.51. In addition, the method of connection to the private system shall conform to all existing requirements of this chapter and city ordinance and the type of meter used shall meet the approval of the Utilities Superintendent.
Penalty, see § 10.99

§ 51.09 WATER DEFICIENCY, SHUT OFF AND USE RESTRICTIONS

The city shall not be liable for any deficiency or failure in the supply of water to consumers, whether occasioned by shutting the water off for the purpose of making repairs or connections or from any other cause whatsoever. In case of fire, or alarm of fire, or in making repairs of construction of new works, water may be shut off without notice at any time and kept off as long as necessary. In addition, the City Council shall have the right to impose reasonable restrictions on the use of the city water system in emergency situations. For non-payment of charges, water service may be discontinued according to the procedures established in § 51.72.

WATER REGULATIONS

§ 51.25 SUPPLY FROM 1 SERVICE

No more than 1 housing unit or building shall be supplied from 1 service connection except by permission of City Council. Each unit served shall have a separate water meter.

CHAPTER 51: WATER

Penalty, see § 10.99

§ 51.27 REPAIRS

(A) *Determination of need for repairs.* Based on the information supplied by the property owner or available to the city, the city will make a determination whether a problem exists in that portion of the service which is the city's responsibility. If the problem, appears to exist in the areas for which the city has no responsibility, the private owners will be responsible for correction of the problem.

(B) *Thawing of water services.* The city will attempt to thaw water services on request of the resident. If the problem is found within that portion of the service for which the private owner is responsible, the private owner thereafter will be responsible for thawing the service and correction of the problem.

(C) *Excavation or repair of water service.*

(1) The city will arrange for the investigative digging up and repair of any water service where the problem apparently exists within that area for which the city has responsibility.

(2) Unless it is clearly evident, however, that the problem is the responsibility of the city, the excavation and repair will not be made until the property owner requests the city in writing to excavate or repair the service and agrees to pay the cost.

(3) The owner further agrees to waive public hearing and be special assessed the cost of the excavation and repair if the problem is found to be other than the city's responsibility. The city will make the determination for responsibility of the cost of investigation or repair.

(4) The matter of whether the dig up is done by city forces or contracted would depend on the urgency or need of repair and the availability of city forces to do the work. Recovery by the city for faulty construction will depend upon the circumstances and the decision of the City Attorney on the likelihood of recovery.

(D) *Failure to repair.* In case of failure upon the part of any consumer or owner to repair any leak occurring in his or her service pipe within 24 hours after verbal or written notice thereof, the water may be turned off by the city and shall not be turned on until the leak has been repaired and a fee pursuant to § 51.51 has been paid to the city.

(E) *Public and Private Responsibility Defined.* For purposes of this Section, the City shall have responsibility for its trunk water line that services multiple properties. In addition, the City shall have responsibility for that portion of the extension from the trunk water line that includes the curb box/water shut-off for a particular property. The property owner shall have responsibility for all portions of the extension from the trunk water line that services the owner's individual property after the curb box/water shut-off.
Penalty, see § 10.99

§ 51.28 ABANDONED OR UNUSED SERVICES

(A) If the premises served by water have been abandoned, or if the service has not been used for 1 year, then the service shall be shut off at the curb stop box by the city and the water meter will be removed.

TITLE V: PUBLIC WORKS

(B) When new buildings are erected on the site of old ones, and it is desired to increase or change the old water service, no connections with the mains shall be made until all the old service has been removed and the main taps plugged or yoked connections installed by the city at the owner's expense.

Penalty, see § 10.99

§ 51.29 DISCONNECTION PERMIT

A permit must be obtained to disconnect from the existing water service leads at the curb stop box. The fee for the permit shall be set pursuant to § 51.51.

Penalty, see § 10.99

§ 51.30 SERVICE PIPES

Every service pipe shall be laid so as to allow at least 1 foot of extra length in order to prevent rupture by settlement. The service pipe must be placed no less than 7 feet below the ground and in a manner as to prevent rupture by freezing. Service pipes must extend from the curb stop box to the inside of the building, or if not taken into the building, then to the hydrant or fixtures which it is intended to supply. Type K copper tubing shall be used. All services over 2 inches shall be ductile or cast iron. All underground joints are to be mechanical, except joints under floors shall be silver soldered, unless otherwise approved by the Utilities Superintendent. Joints of copper tubing shall be kept, to a minimum, with not more than 1 joint used for service for each 70 feet in length. Splicing may be approved with 3-piece unions only. All joints and connections shall be left uncovered until inspected by the Utilities Superintendent and tested at normal water line pressure. Unions must be 3-part type. All services over 2 inches shall be cast iron. Connections with the mains for domestic supply shall be at least 3-quarter inch up to the curb stop box.

No owner or occupant shall allow snow, ice, dirt, or rubbish to remain on the walk longer than 24 hours after its deposit thereon. Failure to comply with this section shall constitute a violation.

(2) *Removal by city.* The City Clerk/Treasurer or other person designated by the City Council may cause removal from all public sidewalks all snow, ice, dirt, and rubbish as soon as possible beginning 24 hours after any matter has been deposited thereon or after the snow has ceased to fall. The City Clerk/Treasurer or other designated person shall keep a record showing the cost of removal adjacent to each separate lot and parcel.

(C) *Public health and safety hazards.* When the city removes or eliminates public health or safety hazards from private property under the following provisions of this chapter, the administrative officer responsible for doing the work shall keep a record of the cost of the removal or elimination against each parcel of property affected and annually deliver that information to the City Clerk/Treasurer.

(D) *Installation and repair of water service lines.* Whenever the city installs or repairs water service lines serving private property under this code, the City Clerk/Treasurer shall keep a record of the total cost of the installation or repair against the property.

(E) *Repair of sidewalks and alleys.*

(2) *Inspections; notice.* The City Council or its designee shall make inspections as are necessary to determine that public sidewalks and alleys within the city are kept in repair and safe for pedestrians or vehicles. If it is found that any sidewalk or alley abutting on private property is unsafe and in need of repairs, the City Council shall cause a notice to be served, by registered or certified mail or by personal service, upon the record owner of the property, ordering the owner to have the sidewalk or alley repaired and made safe within 30 days and stating that if the owner fails to do so, the city will do so and that the expense thereof must be paid by the owner, and if unpaid it will be made a special assessment against the property concerned.

(3) *Repair by city.* If the sidewalk or alley is not repaired within 30 days after receipt of the notice, the City Clerk/Treasurer shall report the facts to the City Council and the City Council shall by resolution order the work done by contract in accordance with law. No person shall enter private property to repair a sidewalk, except with the permission of the owner or after obtaining an administrative warrant. The City Clerk/Treasurer shall keep a record of the total cost of the repair attributable to each lot or parcel of property.

(F) *Personal liability.* The owner of property on which or adjacent to which a current service has been performed shall be personally liable for the cost of the service. As soon as the service has been completed and the cost determined, the City Clerk/Treasurer, or other designated official, shall prepare a bill and mail it to the owner and thereupon the amount shall be immediately due and payable at the office of the City Clerk/Treasurer.

(G) *Damage to public property.* Any person driving any vehicle, equipment, object, or contrivance upon any street, road, highway, or structure shall be liable for all damages which the surface or structure thereof may sustain as a result of any illegal operation, or driving or moving of the vehicle, equipment, object, or contrivance; or as a result of operating, driving, or moving any vehicle, equipment, object, or contrivance weighing in excess of the maximum weight permitted by statute or this code. Any peace officer or designated person shall have the power to inspect private premises and take all reasonable precautions to prevent the commission and maintenance of public nuisances. Except in emergency situations of imminent danger to human life and safety, no police officer or designated person shall enter private property for the purpose of inspecting or preventing public nuisances without the permission of the owner, resident, or other person in control of the property, unless the officer or person designated has obtained a warrant or order from a court of competent jurisdiction authorizing the entry, as provided in § 10.20.

§ 92.23 ABATEMENT

(2) *Notice of City Council hearing.* Written notice of any City Council hearing to determine or abate a nuisance shall be served on the owner of record and occupant of the premises either in person or by certified or registered mail. TITLE IX: GENERAL REGULATIONS

(3) *Notice of City Council order.* Except for those cases determined by the city to require summary enforcement, written notice of any City Council order shall be made as provided in M.S. § 463.17, as it may be amended from time to time.

(4) *Notice of motion for summary enforcement.* Written notice of any motion for summary enforcement shall be made as provided for in M.S. § 463.17, as it may be amended from time to time.

(B) *Procedure.* Whenever a peace officer or designated person determines that a public nuisance is being maintained or exists on the premises in the city, the officer or person designated shall notify in writing the owner of record or occupant of the premises of the fact and order that the nuisance be terminated or abated. The notice of violation shall specify the steps to be taken to abate the nuisance and the time within which the nuisance is to be abated. If the notice of violation is not complied with within the time specified, the officer or designated person shall report that fact forthwith to the City Council. Thereafter, the City Council may, after notice to the owner or occupant and an opportunity to be heard, determine that the condition identified in the notice of violation is a nuisance and further order that if the nuisance is not abated within the time prescribed by the City Council, the city may seek injunctive relief by serving a copy of the City Council order and notice of motion for summary enforcement or obtain an administrative search and seizure warrant and abate the nuisance.

(C) *Emergency procedure; summary enforcement.* In cases of emergency, where delay in abatement required to complete the notice and procedure requirements set forth in divisions (A) and (B) above will permit a continuing nuisance to unreasonably endanger public health safety or welfare, the City Council may order summary enforcement and abate the nuisance. To proceed with summary enforcement, the officer or designated person shall determine that a public nuisance exists or is being maintained on premises in the city and that delay in abatement of the nuisance will unreasonably endanger public health, safety, or welfare. The officer or designated person shall notify in writing the occupant or owner of the premises of the nature of the nuisance and of the city's intention to seek summary enforcement and the time and place of the City Council meeting to consider the question of summary enforcement. The City Council shall determine whether or not the condition identified in the notice to the owner or occupant is a nuisance, whether public health, safety, or welfare will be unreasonably endangered by delay in abatement required to complete the procedure set forth in division (A) above, and may order that the nuisance be immediately terminated or abated. If the nuisance is not immediately terminated or abated, the City Council may order summary enforcement and abate the nuisance.

(D) *Immediate abatement.* Nothing in this section shall prevent the city, without notice or other process, from immediately abating any condition which poses an imminent and serious hazard to human life or safety.

§ 92.24 RECOVERY OF COST

The amount shall be immediately due and payable at the office of the City Clerk/Treasurer.

(B) *Assessment.* After notice and hearing as provided in M.S. § 429.061, as it may be amended from time to time, if the nuisance is a public health or safety hazard on private property, the accumulation of snow and ice on public sidewalks, the growth of weeds on private property or outside the traveled portion of streets, or unsound or insect-infected trees, the City Clerk/Treasurer shall, on or before September 1 next following abatement of the nuisance, list the total unpaid charges along with all other charges as well as other charges for current services to be assessed under M.S. § 429.101, as it may be amended from time to time, against each separate lot or parcel to which the charges are attributable. The City Council may then spread the charges against the property under that statute and other pertinent statutes for certification to the County Auditor and collection along with current taxes the following year or in annual installments, not exceeding 10, as the City Council may determine in each case. A Native Vegetation Permit shall be valid for five (5) years from the date of approval. The City Administrator or designee shall not approve a Native Vegetation Permit for property with unresolved Code of Ordinance violations or administrative citations.

CHAPTER 111: SEXUALLY-ORIENTED BUSINESSES

§ 111.01 PURPOSE

It is the purpose of this chapter to regulate sexually-oriented businesses in order to promote the health, safety, morals, and general welfare of the citizens of the city and to establish reasonable and uniform regulations to prevent the deleterious location and concentration of sexually-oriented businesses within the city. The provisions of this chapter have neither the purpose nor effect of imposing a limitation or restriction on the content of any communicative materials, including sexually-oriented materials. Similarly, it is not the intent nor effect of this chapter to restrict or deny access by adults to sexually-oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually-oriented entertainment to their intended market. Neither is it the intent nor effect of this chapter to condone or legitimize the distribution of obscene material.

(Ord. 171, passed 5-6-2002)

§ 111.02 FINDINGS

Based on evidence concerning the adverse secondary effects of adult uses in other communities and also on findings found in the *Report of Attorney General's Working Group on the Regulation of Sexually-Oriented Businesses* (6-6-1989, State of Minnesota), the Council finds:

(A) Sexually-oriented businesses in the city lend themselves to ancillary unlawful and unhealthy activities that are presently uncontrolled by the operators of the establishments. Further, there is presently no mechanism to make the owners of these establishments responsible for the activities that occur on their premises;

(B) Certain employees of sexually-oriented businesses defined in this chapter as adult theaters and cabarets engage in a higher incidence of certain types of sexually-oriented behavior at these businesses than employees of other establishments;

(C) Sexual acts, including masturbation, oral sex, and anal sex, occur at sexually-oriented businesses, especially those that provide private or semi-private booths or cubicles for viewing films, videos, or live sex shows, as defined under this chapter as adult bookstores, adult novelty shops, adult video stores, adult motion picture theaters, or adult arcades;

(D) Offering and providing the space encourages the activities which create unhealthy conditions;

(E) Persons frequent certain adult theaters, adult arcades, and other sexually-oriented businesses for the purpose of engaging in sex within the premises of the sexually-oriented businesses;

(F) At least 50 communicable diseases may be spread by activities occurring in sexually-oriented businesses, including, but not limited to, syphilis, gonorrhea, human immunodeficiency virus infection (AIDS), genital herpes, hepatitis B, and salmonella infections;

CHAPTER 111: SEXUALLY-ORIENTED BUSINESSES

(G) Sanitary conditions in some sexually-oriented businesses are unhealthy, in part, because the activities conducted there are unhealthy, and, in part, because of the unregulated nature of the activities and the failure of the owners and the operators of those facilities to self-regulate those activities and maintain those facilities;

(H) Numerous studies and reports have determined that semen is found in the areas of sexually-oriented businesses where persons view “adult” oriented films;

(I) Sexually-oriented businesses have operational characteristics, which should be reasonably regulated in order to protect those substantial governmental concerns;

(J) Removal of doors on adult booths and requiring sufficient lighting on premises with adult booths advances a substantial governmental interest in curbing the illegal and unsanitary sexual activity occurring in adult theaters; and

(K) The general welfare, health, and safety of the citizens of the city will be promoted by the enactment of this chapter.
(Ord. 171, passed 5-6-2002)

CHAPTER 112: TOBACCO REGULATIONS

§ 112.01 PURPOSE

Because the city recognizes that many persons under the age of 18 years purchase or otherwise obtain, possess, and use tobacco, tobacco products, and tobacco related devices, and the sales, possession, and use are violations of both state and federal laws; and because studies, which the city hereby accepts and adopts, have shown that most smokers begin smoking before they have reached the age of 18 years and that those persons who reach the age of 18 years without having started smoking are significantly less likely to begin smoking; and because smoking has been shown to be the cause of several serious health problems which subsequently place a financial burden on all levels of government, this chapter shall be intended to regulate the sale, possession, and use of tobacco, tobacco products, and tobacco related devices for the purpose of enforcing and furthering existing laws, to protect minors against the serious effects associated with the illegal use of tobacco, tobacco products, and tobacco related devices, and to further the official public policy of the State of Minnesota in regard to preventing young people from starting to smoke as stated in M.S. § 144.391, as it may be amended from time to time.

The purpose of this chapter is to protect the health, safety and welfare of the citizens of this city by regulating the time, place and manner of conduct of special events and by establishing permit requirements for conducting special events as such are herein defined. The City Council finds that special events often exceed the city's capacity to provide usual city services. These city services include, but are not limited to sanitary, fire, police and utility services. The City Council also finds these regulations necessary to ensure that such events are conducted with sufficient consideration given to public safety issues, including, among other things, the impact of these events on parking and vehicular traffic within the city.

CHAPTER 151: SUBDIVISION REGULATIONS

§ 151.023 ISSUANCE OF PERMITS

No zoning permit shall be issued for the construction of a building, the enlargement, alteration, repair, demolition, or moving of any building or structure on any lot or parcel conveyed in violation of the provisions of this subchapter.

§ 151.024 VARIANCES

(A) *Hardship.* Where the Zoning Board finds that extraordinary hardships may result from strict compliance with these regulations, it may recommend to the Board of Adjustment that the regulations be varied so that substantial justice may be done and public interest secured; provided that the variations will not have the effect of violating the Land Use Plan or the regulations contained herein.

(B) *Conditions in granting variances and modifications.* The Board of Adjustment may require that conditions be placed on the granting of the variances which it deems necessary to or desirable for the public interest. In making its approval, the Board of Adjustment shall take into account the nature of the proposed use of the land and the existing use of the land in the vicinity, the number of persons to reside or work in the proposed subdivision, and the probable effect of the proposed subdivision upon traffic conditions in the vicinity. A variance shall only be approved when the Board of Adjustment finds:

(1) That there are special circumstances or highly unique conditions associated with the property such that the strict application of the provisions of this chapter would deprive the applicant of the reasonable use of his or her land;

(2) That the granting of the variance will not be detrimental to the public health, safety, and welfare, or injurious to other property in the territory in which the property is situated;

(3) That the variance is to correct inequities resulting from an unusual physical hardship, such as topography;

(4) Hardships relating to economic difficulties shall not be considered for the purpose of granting a variance;

(5) That the hardship is not a result of an action or actions by an owner, applicant, or an agent thereof; and

(6) That the granting of a variance will not increase the potential for damage from flood waters nor be in violation of any rules promulgated by FEMA that may apply to the area within the city limits of Morristown.

(C) *Procedures.*

(1) Requests for a variance or appeal shall be filed with the City Clerk/Treasurer on an official application form. The application shall be accompanied by a fee, as established by the City Council. The application shall also be accompanied by 4 copies of detailed written and graphic materials, including 1 plan no larger than 11 inches by 17 inches necessary for the explanation of the request.

TITLE XV: LAND USAGE

- (2) The review of the variance application shall be run concurrently with the preliminary plat application.
- (3) Upon receiving the application, the City Clerk/Treasurer shall refer the application, along with all related information, to the Zoning Board for a report and recommendation to the Board of Adjustment.
- (4) The Zoning Board shall consider the variance at its next regular meeting. The City Clerk/Treasurer shall refer the application, along with all related information, to the City Zoning Board for consideration and a report and recommendation to the Board of Adjustment.

- (6) The Zoning Board and City Clerk/Treasurer shall have the authority to request additional information from the applicant regarding the variance or to obtain expert reports of testimony at the expense of the applicant concerning the variance.
- (7) The Zoning Board shall make a finding of fact and recommend the actions or conditions relating to the request as they deem necessary to carry out the intent and purpose of this chapter and submit this finding in the form of a report to the Board of Adjustment for their information prior to the variance application's public hearing date.
- (8) The City Clerk/Treasurer shall set a date for a public hearing. Notice of the hearing shall be published in the official newspaper at least 10 days prior to the hearing and individual notices shall be mailed not less than 10 days nor more than 30 days prior to the hearing to all owners of property within 350 feet of the parcel included in the request. Failure of any property owner to receive the notice shall not invalidate any such proceedings as set forth within this chapter.
- (9) The applicant or a representative thereof shall appear before the Board of Adjustment in order to answer questions concerning the proposed variance request.
- (10) A copy of the Zoning Board's report shall be entered in and made a part of the written record of the public hearing.
- (11) The Board of Adjustment shall make a recorded finding of fact and impose any condition it considers necessary to protect the public hearing, safety, and welfare of the city.
- (12) The Board of Adjustment shall decide whether to approve or deny a request for a variance or an appeal within 30 days after the public hearing on the request.

(Ord. 180, passed 11-1-2004)

For the purpose of meeting the statutory time lines, the date on which the applicant has submitted a complete application containing all information requirements of this chapter, has properly executed all required application forms and paid the required fees, and any additional requests of the City Clerk/Treasurer or Zoning Administrator, shall constitute the official submission date of the plat on which the statutory period required for formal approval, conditional approval, or disapproval shall commence to run.
(Ord. 180, passed 11-1-2004)

TITLE XV: LAND USAGE

§ 151.038 SKETCH PLAN

(A) In order to insure that all applicants are informed of the procedural requirements and minimum standards of this chapter and the requirements or limitations imposed by other city code provisions or plans, and prior to the submission of a plat, all applicants shall submit a sketch plan to the City Clerk/Treasurer for review.

(B) Applicants seeking review of a sketch plan shall submit the items stipulated in §§ 151.120 *et seq.* This submission requirement is needed for the developer, City Clerk/Treasurer, and other participants, as needed, to review and discuss the development proposal in its formative stages. The City Clerk/Treasurer shall determine whether the development proposal is a major or minor subdivision and shall provide the developer with a list of submission requirements for the appropriate development type as well as the expected process flow and timetable.

(C) The applicant shall not be bound by any sketch plan for which review is requested, nor shall any representatives of the city be bound by any such review.
(Ord. 180, passed 11-1-2004)

§ 151.039 MINOR SUBDIVISIONS; APPLICATION

(A) *Minor subdivision defined:*

(1) In the case of a request to divide a portion of a lot where the division is to permit the adding of a parcel of land to an abutting lot so that no additional lots are created and both new lots conform to zoning ordinance lot size standards;

(2) In the case of a request to combine 2 existing platted lots;

(3) In the case of a request to divide no more than 2 lots from a larger tract of land thereby creating no more than 3 lots. To qualify, the parcel of land should not have been a part of a minor subdivision within the last 5 years;

(4) In the case of a request to divide a base lot, which is a part of a recorded plat upon which has been constructed a 2-family dwelling, townhouse, or quadraminium, where the division is to permit individual private ownership of a single dwelling unit within such a structure and the newly created property lines will not cause any of the unit lots or structure to be in violation of this chapter, the zoning ordinance, or the State Building Code; and

(5) Any other subdivisions that meet the definition contained in § 151.007.

(B) *Content and data requirements for minor subdivisions.*

(1) The requested minor division shall be prepared by a registered land surveyor in the form of a certificate of survey.

(2) The data and supportive information detailing the proposed subdivision is specified in §§ 151.120 *et seq.* Exceptions, stipulated in writing, may be granted by the City

CHAPTER 151: SUBDIVISION REGULATIONS

Clerk/Treasurer or Zoning Administrator.

(3) The minor subdivision shall conform to all design standards as stipulated in this chapter. Any proposed deviation from the standards requires the processing of a variance request.

(Ord. 180, passed 11-1-2004)

§ 151.040 PRELIMINARY PLAT

(A) The application shall:

(1) Be filed with the City Clerk/Treasurer at least 2 weeks prior to the next regularly scheduled meeting of the Zoning Board;

(2) The City Clerk/Treasurer shall notify an applicant within 10 days of the submission of the application whether there are any deficiencies in the information submitted as part of the application. If the notification is not made within the 10-day period, the subdivision application is officially accepted for review;

(3) Be made on forms available at the city offices accompanied by the required fee, as established by the City Council. The City Clerk/Treasurer shall deposit any money received as fees hereunder to the credit of the general fund of the City of Morristown. No money shall be refunded to the applicant. The fee is not intended to cover specialized engineering, planning, or site analysis reviews. Fees for additional technical services such as these will become the responsibility of the subdivider;

(4) An up-to-date certified abstract of title or registered property report showing title in the applicant's name, or an option to buy the property by the applicant as shown on the preliminary plat;

(5) The application shall include the items specified in §§ 151.120 *et seq.* which constitutes a checklist of items to be submitted for subdivision review; and

(6) Be accompanied by a minimum of 10 copies of the preliminary plat and 1 reduced copy of the plat no larger than 11 inches x 17 inches.

(B) The City Clerk/Treasurer shall submit 5 copies of the preliminary plat to the Zoning Board, and may, at their discretion, submit 1 copy to the City Engineer, 1 copy to the City Planner, and 1 copy to the City Attorney. The remaining copies shall be placed in the city's files.

(C) The City Clerk/Treasurer may instruct the appropriate staff to prepare technical reports and provide general assistance in preparing a recommendation on the action to the City Council. This may include the City Planner, the City Engineer, City Building Official, or the City Attorney, or others as deemed needed.

(D) Upon receipt of the completed application as outlined above, the Zoning Board shall set a public hearing for public review of the preliminary plat. The hearing shall be held within 60 days of the official submission date of the application. The applicant and/or his or her representative shall appear at the public hearing before the Zoning Board in order to answer

TITLE XV: LAND USAGE

questions concerning the proposal. Notice of the public hearing may consist of a legal property description, shall contain a description of the request, and shall be advertised in the official newspaper at least 10 days before the day of the hearing. Property owners within 350 feet of the proposed subdivision shall also be notified through the mail of the hearing. Failure of any property owner to receive the notice shall not invalidate the public hearing.

(E) No later than 30 days after the close of the public hearing described above, the Zoning Board shall submit the plat to the City Council with its own recommendations, including any conditions it recommends be placed upon the plat prior to approval. The City Council may approve, approve with conditions, or disapprove the plat by a majority vote of its members regardless of the recommendations made by the Zoning Board. If the Zoning Board has not acted upon the preliminary plat within 30 days following the close of the public hearing on such and in compliance with this chapter, the Council may act on the preliminary plat without the Zoning Board's recommendation, and may approve, approve with conditions, or disapprove the plat by a majority vote of its members after the required public hearing.

(F) The City Council shall take final action within 120 days of the application's official submission date. The subdivision application shall be preliminarily approved or denied by the City Council. If the City Council fails to approve or disapprove the preliminary plat in this review period, the application shall be deemed preliminarily approved.

(G) At any time during this process, either the applicant or the city may request an extension of the imposed time limits. Both the applicant and the city must agree to the time extension and must execute a time extension form that will become a part of the subdivision file.

(H) If the City Council requires changes to the preliminary plat, and if the changes are determined to be minor changes in the opinion of the City Council, then the changes may be noted on the plat and approved as such.

(I) If the changes to be made are major changes in the opinion of the City Council, then a new preliminary plat must be prepared and resubmitted, along with the payment of new fees, based upon the procedures and time lines established in this section.

(J) No preliminary plats shall be approved unless the applicant proves by clear and convincing evidence that:

(1) The application for a preliminary plat is not premature and conforms to the Morristown Comprehensive Plan;

(2) The uses in the subdivision will be connected to and served by public utilities for the provision of water supply and sewage collection and treatment facilities;

(3) The subdivider has the financial ability to complete the proposed subdivision in accordance with all applicable laws and regulations;

(4) The proposed subdivision will not result in the scattered subdivision of land that leaves undeveloped parcels of land lacking urban services between developed parcels; and

(5) The subdivider has taken every effort to mitigate the impact of the proposed subdivision on public health, safety, and welfare.

(K) The Zoning Board may recommend and the City Council may require the changes or

CHAPTER 151: SUBDIVISION REGULATIONS

revisions as deemed necessary for the health, safety, general welfare, and convenience of the city. The approval of a preliminary plat by the Zoning Board and the City Council is tentative only, involving merely the general acceptability of the layout submitted. Subsequent approval will be required of the proposals pertaining to water supply, storm drainage, sewage and sewage disposal, gas and electric service, grading, gradients and roadway widths, and the surfacing of streets.

(L) If the preliminary plat is approved, the approval shall not constitute final acceptance of the layout. Subsequent approval will be required of the engineering proposals and other features and requirements as specified by this chapter to be indicated on the final plat. The City Council may impose the conditions and restrictions as it deems appropriate or require the revisions or modifications in the preliminary plat or final plat as it deems necessary to protect the health, safety, comfort, general welfare, and convenience of the city.

(M) If the preliminary plat is not approved by the City Council, the reasons for the action shall be recorded in the proceedings of the Council and shall be transmitted to the applicant.

(N) Any resubmission of a plat application that has been denied by the City Council shall be prohibited for 1 year following denial unless the City Council votes to allow the resubmission either unanimously or by super majority.
(Ord. 180, passed 11-1-2004)

§ 151.041 FINAL PLAT

(A) After approval of the preliminary plat, the applicant shall prepare and submit a final plat to the city for study and recommendation. This plat must be submitted within 1 year from approval of the preliminary plat, or as specified in an approved development agreement. If the final plat is not submitted within this time period and the applicant has not requested a time extension, the approved preliminary plat becomes null and void within 1 year of its approval date.

(B) In some development proposals, the city may agree to review the preliminary and final plats simultaneously.

(C) The procedure for filing the final plat is that which is established for submission of the preliminary plat under this subchapter, except as specified below. Ten copies of the final plat shall be provided to the city by the applicant, and 1 reduced copy no larger than 11 inches by 17 inches. All final plats shall comply with the provisions of Minnesota Statutes and the requirements of this chapter. An applicant shall submit with the final plat a current abstract of title or a registered property certificate, along with any unrecorded documents and an opinion of title.

(D) Upon receipt of a final plat, the City Clerk/Treasurer shall refer 1 copy each to the City Council, appropriate city staff, the County Surveyor, and to all applicable utility companies, and 1 copy with abstract of title or registered property certificates and opinion title to the City Attorney. The City Council may refer the final plat to the Zoning Board for recommendation if they feel the proposed final plat is substantially different from the approved preliminary plat. The Zoning Board shall submit a report thereon to the City Council within 30 days. The city staff receiving a copy of the final plat shall submit reports through the City Clerk/Treasurer to the City Council within 15 days of receiving the plat expressing their recommendation on the final plat. The County Surveyor shall review the final plat and notify the subdivider's surveyor

TITLE XV: LAND USAGE

or final plat preparer of corrections that are to be made to the final plat. Prior to approval of a final plat, the applicant shall have executed an agreement with the city controlling the installation of all required improvements. The agreement will require all improvements to comply with approved engineering standards and applicable regulations, and shall set forth the amount and form of security required by the city to insure proper installation and warranty of all improvements. Unless otherwise approved by the City Council, the security shall be in the form of an irrevocable letter of credit.

(E) The City Council, after receiving the final plat and any recommendations from the Zoning Board, shall either approve, approve with attached conditions, or disapprove the final plat within 60 days of receiving the final plat. This action taken by the City Council is dependent upon the final plat's conformance with the preliminary plat, as approved by the City Council. If the final plat is not approved, the reasons for the action shall be recorded in the official proceedings of the city and shall be transmitted to the applicant.

(F) At any time during this process, either the applicant or the city may request an extension of the imposed time limits. Both the applicant and the city must agree to the time extension and must execute a time extension form that will become a part of the subdivision file.

(G) The final plat, when approved, shall be submitted by the applicant to the Rice County Recorder for recording. A developer's agreement must be recorded prior to or simultaneously with the plat. The final plat must be recorded within 180 days from the date of approval or it will become null and void. If recording is not accomplished according to these procedures, the city may require another review of the proposed subdivision according to these regulations and state law. Prior to recording, the final plat must be signed by representatives of the city and the applicant must post all required security in a city approved manner. If a final plat is submitted for a portion of the area encompassed in the preliminary plat and it is recorded within 180 days from the date of approval, the remaining portion of the preliminary plat will remain valid for 2 years. That portion of a preliminary plat for which a final plat is not submitted and recorded or for which a time extension form has not been executed between the applicant and the city within this 2-year period, shall become null and void.

(H) Fees for final recording by the county shall be paid by the applicant. The applicant immediately upon recording shall furnish the City Clerk/Treasurer with a reproducible copy of the recorded plat, either chronoflex or its equivalent and 2 prints and an electronic version of the plat in a format the city requests. Failure to furnish the copies shall be grounds for a refusal to issue zoning permits for the lots within a plat.

(I) Any resubmission of a plat application which has been denied by the City Council shall be prohibited for 1 year following denial unless the City Council votes to allow the resubmission either unanimously or by super majority.
(Ord. 180, passed 11-1-2004)

§ 151.042 SOIL TESTS

The City Council may require soil tests prior to the final approval of any plat. These soil tests shall consist of test holes to a depth necessary to determine the various types of soil to be encountered before reaching a stable base. The test holes when ordered by the City Council or Zoning Board, shall be drilled at the expense of the owner or developer and the information disclosed shall be furnished to the City Council together with a copy of the proposed plat

CHAPTER 151: SUBDIVISION REGULATIONS

showing the location of each test hole. The information required shall include a report as to the various types of soils encountered and their depths, the level of the ground water and a percolation test and may include additional information. The number of test holes to be drilled and their location on the property which is proposed to be platted will be as directed by the governing body or its authorized representative. In questionable cases, the owner shall be required to furnish a report from a recognized engineering laboratory as to the safety and practicality of the use of the area for building construction, including the feasibility for installation of sewage facilities.

(Ord. 180, passed 11-1-2004)

§ 151.043 APPEALS TO CITY COUNCIL

The applicant for subdivision approval may appeal the disapproval of a plat by filing a notice of appeal with the City Council no later than 10 days after the date on which the plat was disapproved. The notice of appeal shall set forth in clear and concise fashion the basis for the appeal. The appeal shall be considered at the next regularly scheduled public meeting of the City Council, at which time it may affirm or reverse its decision of the disapproval only by a unanimous vote of the members present at the meeting. On appeal, the applicant shall be allowed to make a presentation to the City Council under the terms, conditions, and procedures as established by the City Council. The City Council shall render a decision affirming or reversing their earlier decision no later than 45 days after the date on which the notice of appeal is filed. If the City Council reverses its prior decision, the applicant may proceed to submit a preliminary or final plat as is appropriate under the conditions for approval agreed to by the City Council.

(Ord. 180, passed 11-1-2004)

§ 151.044 EFFECT OF SUBDIVISION CONTROL

For 1 year following preliminary approval and for 2 years following final approval, unless the subdivider and the city agree otherwise, no amendment to a comprehensive plan or official control shall apply to or affect the use, development density, lot size, lot layout, or dedication or platting required or permitted by the approved application. Thereafter, pursuant to its regulations, the city may extend the period by agreement with the subdivider and subject to all applicable performance conditions and requirements, or it may require submission of a new application unless substantial physical activity and investment has occurred in reasonable reliance on the approved application and the subdivider will suffer substantial financial damage as a consequence of a requirement to submit a new application. In connection with a subdivision involving planned and staged development, the city may by resolution or agreement, grant the rights referred to herein for the periods of time longer than 2 years it determines to be reasonable and appropriate.

(Ord. 180, passed 11-1-2004)

§ 151.045 ZONING

Prior to the approval of the final plat, the applicant shall submit an application to rezone any or all plats of the area previously zoned incorrectly for the proposed use, in accordance with the provisions of Chapter 152.

(Ord. 180, passed 11-1-2004)

TITLE XV: LAND USAGE

§ 151.046 RESTRICTION ON FILING AND RECORDING CONVEYANCES

(A) *Generally.* No conveyance of land to which these regulations are applicable shall be filed or recorded if the land is described in the conveyance by metes and bounds or by reference to an unapproved registered land survey made after 4-21-1961 or to an unapproved plat made after the regulations become effective (Minnesota Statutes).

(B) *Registered land surveys.* All registered land surveys shall be filed subject to the same procedure as required for the filing of a preliminary plat for platting purposes. The standards and requirements set forth in these regulations shall apply to all registered land surveys. Unless the City Council approves an applicant's request to do so, a registered land survey shall not be used to divide a parcel of land into lots for the purpose of transfer or of ownership or building development, if any of these tracts do not have the required frontage on a dedicated public street.

(C) *Metes and bounds.*

(1) Conveyances by metes and bounds shall be prohibited where any lots or parcels involved are less than 5 acres in area or have a width of less than 300 feet at the building setback line.

(2) No zoning permit shall be issued for any structure on any parcel of land less than 5 acres in area or having a width of less than 300 feet on an improved public street, at a building setback line which is described by metes and bounds until a plat describing the parcel of land is filed with the Rice County Recorder's office and proof thereof is furnished to the city.

(3) When a conveyance by metes and bounds is made and the parcels involved are between 5 acres and 20 acres in size, a survey of the parcels involved shall be submitted to the City Clerk/Treasurer before any zoning permits will be issued for those parcels, and a copy of the survey should be attached to the deed when it is submitted to the Rice County Recorder's office for recording.

(D) *Exceptions.*

(1) The foregoing provisions do not apply to a conveyance if the land described (Minnesota Statutes):

(a) Was a separate parcel of record on 4-1-1945 or the date of adoption of subdivision regulations under Laws 1945, Chapter 287, whichever is later, or of the adoption of subdivision regulations pursuant to a home rule charter;

(b) Was the subject of a written agreement to convey entered into prior to such time;

(c) Was a separate parcel of not less than 2-1/2 acres in area and 150 feet in width on 1-1-1966;

(d) Was a separate parcel of not less than 5 acres in area and 300 feet in width on 7-1-1980;

CHAPTER 151: SUBDIVISION REGULATIONS

(e) Is a single parcel of commercial or industrial land of not less than 5 acres having a width of not less than 300 feet and its conveyance does not result in the division of the parcel into 2 or more lots or parcels, any 1 of which is less than 5 acres in area or 300 feet in width; or

(f) Is a single parcel of residential or agricultural land of not less than 20 acres and having a width of not less than 500 feet and its conveyance does not result in the division of the parcel into 2 or more lots or parcels, any 1 of which is less than 20 acres in area or 500 feet in width.

(2) In any case in which compliance with the foregoing restrictions will create an unnecessary hardship and failure to comply does not interfere with the purpose of the subdivision regulations, the City Council may waive the compliance by adoption of a resolution to that effect and the conveyance may then be filed or recorded. Any owner or agent of the owner of land who conveys a lot or parcel in violation of the provisions of this subdivision shall be subject to the penalties set forth in §§ 151.135 *et seq.* A municipality may enjoin the conveyance or may recover the penalty by a civil action in any court of competent jurisdiction.
(Ord. 180, passed 11-1-2004)

ASSURANCE FOR COMPLETION AND MAINTENANCE OF IMPROVEMENTS

§ 151.060 GENERALLY

(A) Before a final plat is approved by the City Council, the owner and subdivider of the land covered by the plat shall execute and submit to the Council a written developers agreement, which shall be binding on their heirs, personal representatives, and assigns, that they will cause no private construction to be made on the plat or file or cause to be filed any application for zoning permits for the construction until all improvements required under this chapter have been made or have been arranged for, in the manner, with respect to the streets to which the lots sought to be constructed have access.

(B) The agreement shall provide that all of the required improvements will be made in accordance with standards established by the City Engineer. This shall include provision for inspections by the City Engineer and shall grant to the City Engineer authority to coordinate the work and improvements to be done under the contract by any subcontractor authorized to proceed thereunder and with any other work being done or contracted by the city in the vicinity. The agreements shall include adequate provisions to insure that all improvements accomplished by the subdivider will comply with the standards.

(C) A developer's responsibility for contributing to off-tract improvements may be required. Refer to §§ 151.105 *et seq.* for the standards related to this requirement.
(Ord. 180, passed 11-1-2004)

§ 151.061 IMPROVEMENTS MAY BE PARTIAL

It is not the intent of this chapter to require the subdivider to develop the entire plat and make all required improvements at 1 time, but no zoning permits shall be granted except on the lots

TITLE XV: LAND USAGE

having access to streets on which the required improvements have been made.
(Ord. 180, passed 11-1-2004)

§ 151.062 FINANCIAL GUARANTEE

(A) *Generally.* The contract provided for in § 151.060 shall require the applicant to provide a financial guarantee in a form approved by the City Council or the City Attorney, and in an amount based upon the City Engineer's estimate of the total cost of the improvements to be furnished under the contract, including the cost of inspection. The amount of the financial guarantee shall equal 120% of the City Engineer's estimate. The agreement may further provide for additional sums to be placed in escrow for estimated engineering, legal, and administrative costs.

(B) *Escrow deposit; certified check.* If an escrow deposit is required, the escrow deposit shall be made with the City Clerk/Treasurer. Upon completion of the work and termination of any liability, the balance remaining in the deposit shall be refunded to the applicant.

(C) *Irrevocable letter of credit.* An irrevocable letter of credit in a form acceptable to the City Council or City Attorney shall be payable to the order of the city and delivered to the City Clerk/Treasurer in a sum equal to the amount specified in division (A) above, for all the improvements to be furnished and installed by the applicant pursuant to the developer's agreement which have not been completed prior to the approval of the plat. The letter of credit may include an amount for the cost of inspection by the city. In the event of any default in the terms and conditions of the contract the city may, at its discretion, draw upon the letter of credit and use those funds to contract for completion of the improvements required by the contract.

(D) *Reduction of letter of credit.* Upon receipt of proof satisfactory to the city that work has been completed and financial obligations to the city have been satisfied, with city approval, the security may be reduced by 90% of the financial obligations that have been satisfied. Ten percent of the security shall be retained until all improvements have been completed, all financial obligations to the city satisfied (which includes the duration of the established warranty period), and the required "as built" plans have been received by the city.
(Ord. 180, passed 11-1-2004)

§ 151.063 INSPECTION OF IMPROVEMENTS

The City Council shall provide for inspection of required improvements during construction and ensure their satisfactory completion. The applicant shall pay to the city an inspection fee based on the estimated cost of inspection. These fees shall be due and payable upon demand of the city and no zoning permits shall be issued until all fees are paid. If the City Engineer finds upon inspection that any 1 or more of the required improvements have not been constructed in accordance with the city's construction standards and specifications, the applicant shall be responsible for properly completing the improvements.
(Ord. 180, passed 11-1-2004)

§ 151.064 MAINTENANCE OF IMPROVEMENTS

The developer shall be required to maintain all public improvements on the individual subdivided lots and provide for snow removal on streets and sidewalks until acceptance of the

CHAPTER 151: SUBDIVISION REGULATIONS

improvements by the City Council. Following the acceptance of the dedication of any public improvement by the local government, the city may, in its sole discretion, require the subdivider to maintain the improvement for a period of 1 year from the date of acceptance. (Ord. 180, passed 11-1-2004)

§ 151.065 DEFERRAL OR WAIVER OF REQUIRED IMPROVEMENTS

(A) The City Council may defer or waive at the time of final approval, subject to appropriate conditions, the provision of any or all public improvements as, in its judgment, are not requisite in the interests of the public health, safety, and general welfare, or which are inappropriate because of the inadequacy or in existence of connecting facilities. Any determination to defer or waive the provision of any public improvement must be made on the record and the reasons for the deferral or waiver also shall be expressly made on the record.

(B) Whenever it is deemed necessary by the City Council to defer the construction of any improvement required under these regulations because of incompatible grades, future planning, inadequate or nonexistent connecting facilities, or for other reasons, the subdivider shall pay his or her share of the costs of the future improvements to the city prior to signing of the final subdivision plat by the City Mayor, or the developer may execute a separate subdivision improvement agreement secured by a letter of credit guaranteeing completion of the deferred improvements upon demand of the city. (Ord. 180, passed 11-1-2004)

§ 151.066 ISSUANCE OF ZONING PERMITS

(A) The extent of street improvement shall be adequate for vehicular access by emergency vehicles prior to the issuance of a zoning permit.

(B) No zoning permit shall be issued for the final 10% of the lots in a subdivision, or if 10% is less than 2 lots, for the final 2 lots of the subdivision, until all public improvements required by the Zoning Board or City Council for the subdivision have been fully completed and the local government has accepted the developer's offer(s) to dedicate the improvements. (Ord. 180, passed 11-1-2004)

DESIGN AND IMPROVEMENT STANDARDS

§ 151.080 GENERAL REQUIREMENTS

Prior to the approval of a plat by the governing body, the applicants shall have agreed, in the manner set forth below, to install the following improvements on the site in conformity with approved construction plans and in conformity with all applicable standards and ordinances. The developer or the municipality shall award contracts for any construction work and material mentioned herein. The contract shall be based upon plans and specifications completed or approved by the City Engineer and approved by the City Council. The Engineer shall supervise or inspect all of the work and shall certify that the work has been finished, and that it has been finished in accordance with plans and specifications approved by the governing body.

TITLE XV: LAND USAGE

(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.081 LAND REQUIREMENTS

(A) Land shall be suited to the purpose for which it is to be subdivided. No plan shall be approved if the site is not suitable for the purposes proposed by reason of potential flooding, topography, wetlands, or adverse soil or rock formation.

(B) Land subject to hazards to life, health, or property shall not be subdivided until all the hazards have been eliminated, or unless adequate safeguards against the hazards are provided by the subdivision plan.

(C) Proposed subdivisions shall be coordinated with existing neighborhoods, so that the city as a whole may develop efficiently and harmoniously. Water mains and sanitary sewer collection pipes shall be provided to serve the subdivision by extension of the existing city water system and sanitary collection system. Service connections shall be stubbed to the property line and all necessary fire hydrants shall also be provided. Extensions of the public water supply system and sanitary sewer collection system shall be designed so as to provide a water supply and sanitary sewer collection in accordance with the standards of the city.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.082 SITE DESIGN STANDARDS

(A) *Site analysis.* An analysis shall be made of characteristics of the development site, such as site context; geology and soil; topography; existing vegetation; structures and road networks; and past and present use of the site.

(B) *Subdivision and site design.*

(1) Design of the development shall take into consideration all existing local plans of the community and shall conform to Chapter 152 requirements.

(2) Development of the site shall be based on the site analysis. To the maximum extent practicable, development shall be located to preserve the natural features of the site, to avoid areas of environmental sensitivity, and to minimize negative impacts and alteration of natural features.

(3) The following specific areas shall be preserved as undeveloped open space, to the extent consistent with the reasonable utilization of land, and in accordance with state and local regulations:

(a) Unique or fragile areas, including wetlands;

(b) Significant trees or stands of trees;

(c) Steep slopes in excess of 20%, as measured over a 10-foot interval unless appropriate engineering measures concerning slope stability, erosion, and resident safety are taken;

CHAPTER 151: SUBDIVISION REGULATIONS

- (d) Habitats of endangered wildlife; and
- (e) Historically significant structures and sites.

(4) The development shall be laid out to avoid adversely affecting groundwater and aquifer recharge; to reduce cut and fill; to avoid unnecessary impervious cover; to prevent flooding; to provide adequate access to lots and sites; and to mitigate adverse effects of noise, odor, traffic, drainage, and utilities on neighboring properties.

(5) The lot arrangement shall be such that there will be no foreseeable difficulties, for reasons of topography or other conditions, in securing zoning permits to build on all lots in compliance with Chapter 152 and to meet all health regulations that would be applicable and in providing driveway access to buildings on the lots from an approved street.

(6) The lot line common to the street right-of-way shall be the front line. All lots shall face the front line and a similar line across the street. Wherever feasible, lots shall be arranged so that the rear line does not abut the side line of an adjacent lot.

(C) *Residential development design.*

(1) In conventional developments, the Zoning Board or City Council may vary lot areas and dimensions, yards, and setbacks for the purpose of encouraging and promoting flexibility, economy, and environmental soundness in layout and design, provided that the average lots areas and dimensions, yards, and setbacks within the subdivision conform to the minimum requirements of the city's zoning regulations, and provided that the standards shall be appropriate to the type of development permitted.

(2) Residential lots shall be encouraged to front on local or collector streets, and discouraged from fronting arterial streets.

(3) Every lot shall have sufficient access to it for emergency vehicles as well as for those needing access to the property in its intended use.

(4) The placement of units in residential developments shall take into consideration topography, privacy, building height, orientation, drainage, and aesthetics.

(5) Buildings shall be spaced so that adequate privacy is provided for units.

(D) *Commercial and industrial development design.* Commercial and industrial developments shall be designed according to the same principles governing the design of residential developments; namely, buildings shall be located according to topography, with environmentally sensitive areas avoided to the maximum extent practicable. Factors such as drainage, noise, odor, and surrounding land uses shall be considered in siting buildings; sufficient access shall be provided; and adverse impacts buffered.

(E) *Circulation system design.*

(1) The road system shall be designed to permit the safe, efficient, and orderly movement of traffic; to meet, but not exceed the needs of the present and future population served; to have a simple and logical pattern; to respect natural features and topography; and to present an attractive streetscape.

TITLE XV: LAND USAGE

(2) In residential subdivisions, the road system shall be designed to serve the needs of the neighborhood and to discourage use by through traffic.

(3) The pedestrian system shall be located as required for safety. In conventional developments, walks shall be placed parallel to the street, with exceptions permitted to preserve natural features or to provide visual interest. In planned developments, walks may be placed away from the road system, but they may also be required to be parallel to the street for safety reasons.

(F) *Block design.*

(1) Blocks shall have sufficient width to provide for 2 tiers of lots of appropriate depths. Exceptions to this standard shall be permitted in blocks adjacent to arterial roads, railroad lines, or where 1 tier of lots is necessary because of topographical conditions.

(2) Double-frontage or lots with frontage on 2 parallel streets shall be permitted only in the following cases:

(a) Where vehicular and pedestrian accesses are prohibited between lots and an arterial street is prohibited; and

(b) Where topographical or other conditions render subdividing lots in different configurations unreasonable. The double-frontage lots shall have an additional depth of at least 20 feet in order to allow space for the planting of screening vegetation or placement of other screening options along the back lot line.

(3) The lengths, widths, and shapes of blocks shall conform to the following, based upon the type of development proposed:

(a) In residential areas, block lengths shall not exceed 1,200 feet nor be less than 600 feet in length. Block length and width or acreage within bounding streets shall accommodate the size of residential lots required in the area by Chapter 152, and provide for convenient access, circulation control, and safety of street traffic; and

(b) In commercial or industrial areas, block width shall be suitable for their respective use, including adequate space for off street parking, deliveries, and loading. The facilities shall be provided with safe and convenient access to the street system.

(4) In long blocks, the Zoning Board or City Council may require the reservation of an easement through the block to accommodate utilities, drainage facilities, or pedestrian traffic.

(5) Pedestrian ways or crosswalks may be required by the Zoning Board where it is deemed essential to provide circulation or access to schools, playgrounds, shopping areas, or other community facilities. Suitable surfacing shall be provided in pedestrian ways and shall be subject to city review.

(G) *Landscape design.*

(1) Reasonable landscaping should be provided at site entrances, in public areas, and adjacent to buildings. The type and amount of landscaping shall be allowed to vary with the type of development.

CHAPTER 151: SUBDIVISION REGULATIONS

(2) Planting or other landscaping material that best serves the intended function shall be selected. Landscaping materials shall be appropriate for the Upper Midwest environment, the Morristown soil conditions, and the availability of the local water supply. The impact of the proposed landscaping plan at various time intervals shall also be considered.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.083 EASEMENTS

(A) *Provided for utilities.* A minimum 10-foot easement for drainage and utilities shall be provided on all lot lines. In the case of side or rear lot lines, these may be centered on the lot line. These easements shall be furnished by the owner at no cost to the municipality.

(B) *Provided for drainage.* Easements shall be provided along each side of the center line of the water course or drainage channel, whether or not shown on the Comprehensive Plan, to a sufficient width to provide proper maintenance and protection to provide for storm water runoff and to provide for installation and maintenance of storm sewers. Drainage easements shall be furnished by the owner at no cost to the municipality.

(C) *Continue utility easement locations.* Utility easements shall connect with easements established on adjoining property. These easements, when approved, shall not thereafter be changed without the approval of the City Council after a public hearing.

(D) *Dedication.* All easements shall be dedicated for the required use and shall be shown on the final plat.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.084 OPEN SPACE AND RECREATION

(A) *Minimum requirements.*

(1) *Generally.* In all plats, the governing body shall require a recreational land contribution to be used in connection with the development of a general park system in the city. All recreation areas dedicated to the city shall be subject to approval by the governing body. A cash contribution may be used in lieu of the land dedication or, in some instances, may be required by the city.

(2) *Amount of open space required.* Ten percent of the tract proposed for development shall be set aside for use as developed and/or undeveloped open space. This amount of land is the city's best estimate of need for open space to accommodate the increased usage of the space by the population of the proposed development. If a cash contribution is to be used in lieu of land dedication, the cash payment shall equal the value of the land dedication requirement as determined by a certified appraiser who shall determine the current market value of the property with development potential. The cost of the appraisal shall be borne by the developer. The cash contribution amount specified above is the city's best estimate for undertaking needed improvements to its open space facilities based upon the increased usage resulting from new development.

(3) *Size of open space parcels.* In general, land reserved for recreation purposes shall have an area of at least 4 acres. When the area reservation amount for a development would equal less than 4 acres, the Zoning Board may require the area designated for this use be located

TITLE XV: LAND USAGE

at a suitable place on the edge of the subdivision so that additional land may be added at the time as the adjacent land is subdivided. In no case shall an area of less than 2 acres be reserved for recreation purposes if it will be impractical or impossible to secure additional lands in order to increase its area. In these instances, the developer may choose the cash contribution option or choose construction methods referred to in division (C) below, or a combination of these options.

(4) *Location of open space parcels.* Open space parcels shall be convenient to the dwelling units they are intended to serve. However, because of noise generation, they shall be sited with sensitivity to surrounding development.

(B) *Improvement of open space parcels.*

(1) *Developed open space.* All land to be reserved for dedication to the local government for park purposes shall have prior approval of the City Council and shall be shown marked on the plat "Reserved for Park and/or Recreation Purposes." The Zoning Board or City Council may require the installation of recreational facilities, taking into consideration:

- (a) The character of the open space land;
- (b) The estimated age and recreation needs of persons likely to reside in the development;
- (c) The proximity, nature, and excess capacity of existing municipal recreation facilities; and
- (d) The cost of the recreational facilities.

(2) *Undeveloped open space.* As a general principle, undeveloped open space should be left in its natural state. A developer may make certain improvements such as the cutting of trails for walking or jogging, or the provision of picnic areas. In addition, the Zoning Board may require a developer to make other improvements, such as removing dead or diseased trees, thinning trees, or other vegetation to encourage more desirable growth, and grading and seeding.

(C) *Other uses of land that may be counted towards filling the recreation reservation requirement.*

(1) If a developer constructs a looped road turn around at the end of a cul-de-sac, the amount of land contained within the loop that is left in natural vegetation may count towards the recreational reservation requirement.

(2) If a developer constructs a walking and/or biking pathways in the development, that are separate and distinct from motorized routes, the amount of land used for this purpose or the cost for making the improvement for this use may count towards the recreational reservation requirement.

(D) *Exceptions to the standards.* The Zoning Board or City Council may permit minor deviations from open space standards when it can be determined that:

- (1) The objectives underlying these standards can be met without strict adherence to them; and/or
- (2) Because of peculiarities in the tract of land or the facilities proposed, it would be

CHAPTER 151: SUBDIVISION REGULATIONS

unreasonable to require strict adherence to these standards.

(E) *Deed restrictions.* Any lands dedicated for open space purposes shall contain appropriate covenants and deed restrictions approved by the City Attorney ensuring that:

- (1) The open space area will not be further subdivided in the future;
- (2) The use of the open space will continue in perpetuity for the purpose specified;
- (3) Appropriate provisions will be made for the maintenance of the open space; and
- (4) Common undeveloped open space shall not be turned into a commercial enterprise admitting the general public at a fee.

(F) *Open space ownership.* The type of ownership of land dedicated for open space purposes shall be selected by the owner, developer, or subdivider, subject to the approval of the City Council. The type of ownership may include, but is not necessarily limited to, the following:

- (1) The municipality, subject to acceptance by the City Council;
- (2) Other public jurisdictions or agencies, subject to their acceptance;
- (3) Quasi-public organizations, subject to their acceptance;
- (4) Homeowner, condominium, or cooperative associations or organizations; or
- (5) Shared, undivided interest by all property owners in the subdivision.

(G) *Homeowners association.* If the open space is owned and maintained by a homeowner or condominium association, the developer shall file a declaration of covenants and restrictions that will govern the association, to be submitted with the application for the preliminary approval. The provisions shall include, but are not necessarily limited to, the following:

- (1) The homeowners association must be established before the homes are sold;
- (2) Membership must be mandatory for each home buyer and any successive buyer;
- (3) The open space restrictions must be permanent, not just for a period of years;
- (4) The association must be responsible for liability insurance, local taxes, and the maintenance of recreational and other facilities;
- (5) Homeowners must pay their pro rata share of the cost, and the assessment levied by the association can become a lien on the property if allowed in the master deed establishing the homeowners association; and
- (6) The association must be able to adjust the assessment to meet changed needs.

(H) *Maintenance of open space areas.* The person or entity identified as having the right of ownership or control over the open space shall be responsible for its continuing upkeep and proper maintenance.

TITLE XV: LAND USAGE

(I) *Preservation of natural features and amenities.* Existing features that would add value to residential development or to the local government as a whole, such as trees, watercourses, historic spots, or similar irreplaceable assets, shall be preserved in the design of the subdivision.

(J) *Appeal of open space and recreational lands.* The developer may appeal the open space and recreational land dedication or cash contribution requirements specified herein. However, the costs of conducting the study needed to prove the impacts from the development will not overburden the city's need for open space, recreational space, or the need to make improvements to the city's recreational space will be borne by the developer.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.085 ADEQUATE PUBLIC FACILITIES

(A) *Generally.* No plat shall be approved unless the City Council determines that public facilities will be adequate to support and service the area of the proposed subdivision. The applicant shall, at the request of the Zoning Board and/or the City Council, submit sufficient information and data on the proposed subdivision to demonstrate the expected impact on public facilities by possible uses of the subdivision. Public facilities and services to be examined for adequacy will include roads and other transportation routes, sewerage, water service, storm water drainage facilities, and others as determined by city staff, Zoning Board, or City Council.

(B) *Extension policies.* All public improvements and required easements shall be extended through the subdivision on which new development is proposed. Streets, water lines, wastewater systems, drainage facilities, electric lines, and telecommunications lines shall be constructed through new development to promote the logical extension of public infrastructure. The City Council may require the applicant of a subdivision to extend off-site improvements to reach the subdivision or oversize required public facilities to serve anticipated future development as a condition of plat approval.

(C) *Trunk facilities and alternative installation.* Where a larger size water main, sanitary sewer, storm drain, or similar facility is required to serve areas outside the subdivision, the larger facility required shall be constructed. Additional costs shall be allocated pursuant to established city policies. The City Council may elect to install any or all of the required public improvements pursuant to a cash escrow agreement or other financial arrangements with the applicant.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.086 STREETS

(A) *General requirements.*

(1) The arrangement of streets shall conform to the circulation plan of the Comprehensive Plan or the official map of the city.

(2) For streets not shown on the Comprehensive Plan or official map, the arrangement shall provide for the appropriate extension of existing streets.

(3) Residential streets shall be arranged so as to discourage through traffic and provide

CHAPTER 151: SUBDIVISION REGULATIONS

for maximum privacy.

(4) No subdivision shall be approved unless the area to be subdivided shall have frontage on and access from an existing street or road.

(5) Where a subdivision abuts or contains an existing street of inadequate width, sufficient additional width shall be provided to meet the standards referenced in division (G)(3) and/or division (K).

(B) *Specific requirements.*

(1) *Dead-end streets.* Dead-end streets shall be prohibited, except as stubs to permit future street extension into adjoining tracts with possible temporary cul-de-sacs, as determined by the city. When a temporary cul-de-sac is constructed, a temporary turn-around facility may be required at the closed end in conformance with the cul-de-sac requirements.

(2) *Private streets and reserve strips.* Private streets and reserve strips shall be prohibited and no public improvement shall be approved for any private street. All streets shall be dedicated for public use. If any person applies to subdivide or replat any land or parcels adjoining an existing private street, the private street shall be required to be dedicated for public use and scheduled for improvement to public street standards at the time of final plat.

(3) *Restriction of access.* Access of residential access or residential subcollector streets onto residential collector or arterial streets shall be discouraged at intervals of less than 500 feet.

(4) *Marginal access streets.* Where a subdivision abuts or contains an existing or planned major arterial street or a railroad right-of-way, a marginal access street approximately parallel to and on each side of the arterial street or railroad right-of-way may be required for adequate protection of residential properties and separation of through and local traffic. The service streets shall be located at a distance from the major arterial or railroad right-of-way suitable for appropriate use of the intervening land, as for park purposes in residential districts or for commercial or industrial uses, as would be appropriate for the location. The distances also shall be determined with due regard to the requirements of approach grades and future grade separations.

(5) *Street jogs.* Street jogs with centerline off-sets of less than 150 feet shall not be allowed.

(6) *Deflection.* When connecting street lines deflect from each other at any 1 point by more than 10 degrees, they shall be connected by a curve with a radius of not less than 100 feet.

(7) *Vertical curves.* Different connecting street gradients shall be connected with vertical curves. Minimum length, in feet, of these curves shall be 20 times the algebraic difference in the percent of grade of the 2 adjacent slopes.

(8) *Corner radii.* Roadways of street intersections shall be rounded by a radius of not less than 15 feet. Corners at entrances to the turn around portion of cul-de-sacs shall be rounded by a radius of not less than 15 feet.

(C) *Topography and arrangement.*

(1) Streets shall be related appropriately to the topography. Residential access streets

TITLE XV: LAND USAGE

and residential subcollector streets shall be curved wherever possible to avoid conformity of lot appearance. All streets shall be arranged so as to obtain as many building sites as possible at, or above, the grades of the streets. Grades of streets shall conform as closely as possible to the original topography. A combination of steep grades and curves shall be avoided.

(2) All streets shall be properly integrated with the existing and proposed system of roads and dedicated rights-of-way.

(3) All streets shall be properly related to special traffic generators such as industries, business districts, school, churches; to population densities; and to the pattern of existing and proposed land uses.

(4) Residential access streets and residential subcollector streets shall be laid out to conform as much as possible to the topography to discourage use by through traffic, to permit efficient drainage and utility systems, and to require the minimum number of streets necessary to provide convenient and safe access to property.

(5) The rigid rectangular gridiron street pattern need not necessarily be adhered to, and the use of curvilinear streets or U-shaped streets shall be encouraged where the use will result in a more desirable layout.

(6) Proposed streets shall be extended to the boundary lines of the tract to be subdivided, unless prevented by topography or other physical conditions, or unless, in the opinion of the Zoning Board or City Council, the extension is not necessary or desirable for the coordination of the layout of the subdivision with the existing layout or the most advantageous future development of adjacent tracks.

(D) *Half width streets.* The dedication of half width streets following boundary lines of proposed subdivisions shall not be approved except as follows:

(1) Where a half street has been dedicated and recorded on the opposite side of the boundary line. In these cases, the dedication of matching of half streets shall be a requirement; and/or

(2) Where it is evident to the Zoning Board and/or the City Council that the proper layout of the proposed Plat cannot be satisfactorily completed in any other way.

(E) *Construction of half width right-of-way.* The construction of a street within a half width right-of-way is prohibited except as follows:

(1) When a half street is adjacent to side lot lines only; and

(2) Where a half width street right-of-way is adjacent to recorded or dedicated right-of-way on the opposite side of the property boundary line, the developer shall be required to grade the entire width of the driving surface, i.e., between gutters.

(F) *Street hierarchy.*

(1) Streets shall be classified in a street hierarchy system with the design tailored to its function.

(2) The street hierarchy system shall be defined by road function, as specified below:

CHAPTER 151: SUBDIVISION REGULATIONS

(a) Residential access street - lowest order of residential street. Provides frontage for access to lots and carries traffic having destination or origin on the street itself. Designed to carry the least amount of traffic at the lowest speed;

(b) Residential subcollector street - middle order of residential street. Provides frontage for access to lots, and carries traffic of adjoining residential access streets. Designed to carry somewhat higher traffic volumes with traffic limited to motorists having origin or destination within the immediate neighborhood;

(c) Residential collector street - highest order of residential street. Conducts and distributes traffic between lower order residential streets to higher order streets (county or state roads). Carries the largest volume of traffic at higher speeds. Its function is to promote free traffic flow; therefore; direct access to homes from this street should be restricted;

(d) Cul-de-sac street - a street with a single means of ingress and egress and having a turnaround. Design of turnaround may vary. Cul-de-sacs shall be classified and designed according to anticipated daily traffic levels; and

(e) Alleys - alleys shall not be permitted in residential areas unless it can be shown that their use is essential to a proper plan, where alleys are used in a proposed business or industrial area, they shall not be less than 24 feet in width.

(G) *Roadway width.*

(1) Roadway width for each street classification shall be determined by parking and curbing requirements based upon form and intensity of development.

(2) Roadway width shall also consider possible limitations imposed by sight distances, climate, terrain, and maintenance needs. Additional roadway width may be required to promote public safety and convenience. In order to minimize street costs, the minimum width assuring satisfaction of needs shall be selected.

(4) Roadway widths for each street classification are shown below:

| <i>Roadway Width Requirements</i> | | | |
|---|-------------------------------------|-------------------------------------|-----------------------------------|
| <i>Street Classification</i> | <i>Travel or Moving Lane</i> | <i>Parking Lane (8 Feet)</i> | <i>Total Roadway Width</i> |
| Residential Access Street on-street parking - 1 side | 2 lanes at 10 feet | 1 at 8 feet | 34 feet |
| Residential Subcollector Street on-street parking - 1 side | 2 lanes at 11 feet | 1 at 8 feet | 34 feet |
| Residential Subcollector Street on-street parking - 2 sided | 2 lanes at 11 feet | 2 at 8 feet | 38 feet |
| Residential Collector Street on-street parking - 1 side | 2 lanes at 12 feet | 1 at 8 feet | 34 feet |
| Residential Collector Street on-street parking - 2 sided | 2 lanes at 12 feet | 2 at 8 feet | 40 feet |

TITLE XV: LAND USAGE

| <i>Roadway Width Requirements</i> | | | |
|---|------------------------------|------------------------------|----------------------------|
| <i>Street Classification</i> | <i>Travel or Moving Lane</i> | <i>Parking Lane (8 Feet)</i> | <i>Total Roadway Width</i> |
| Cul-de-Sac Street | "a" | "a" | "a" |
| <p>NOTES TO TABLE:</p> <p>"a" - Denotes that the appropriate width of travel lanes, the inclusion of a parking lane or not, and then the required roadway width for a cul-de-sac is dependent upon the level of traffic the cul-de-sac is intended to carry, whether it is intended to be extended at some point in time as a through street, and if it is, what type of street it is likely to be.</p> | | | |

(H) *Cul-de-sac*. A cul-de-sac shall not exceed 750 feet in length. The turn-around radius shall be no less than 45 feet.

(I) *Curbs and gutters*.

(1) Curb requirements shall vary according to street hierarchy and in accordance with the requirements shown in division (K). Curbing may also be required:

- (a) For storm water management;
- (b) To stabilize pavement edge;
- (c) To delineate parking areas;
- (d) Ten feet on each side of drainage inlets;
- (e) At intersections;
- (f) At corners; and
- (g) At tight radii.

(2) Where curbing is not required, some sort of edge definition and stabilization shall be furnished for safety reasons and to prevent pavement unraveling.

(3) Where curbing is required, this requirement may be waived and shoulders and/or drainage swales used when it can be shown that:

- (a) Shoulders are required by state regulations;
- (b) Soil or topography make the use of shoulders and/or drainage swales preferable; or
- (c) It is in the best interests of the community to preserve its rural character by using shoulders and/or drainage swales instead of curbs.

(4) The curbing requirement may be waived where front setbacks exceed 40 feet and it can be demonstrated that sufficient on-site parking exists.

(5) Flexibility regarding curb type shall be permitted as long as the curb type accommodates the system of drainage proposed.

CHAPTER 151: SUBDIVISION REGULATIONS

(6) Curbing shall be designed to provide a ramp for bicycles and/or wheelchairs as required by law.

(7) Curbing shall be constructed according to the specifications established by the City Engineer.

(J) *Shoulders.*

(1) Shoulders and/or drainage swales shall be required instead of curbs when:

(a) Shoulders are required by state law;

(b) Soil or topography make the use of shoulders and/or drainage swales preferable; or

(c) It is in the best interests of the community to preserve its rural character by using shoulders and/or drainage swales instead of curbs.

(2) Shoulder requirements shall vary according to street hierarchy and in accordance with the requirements shown in division (K) below.

(3) Shoulders shall measure 4 feet in width on each side for all streets and shall be located within the right-of-way as shown in division (K) below. The width of swales shall be determined by site specific conditions.

(4) Shoulders shall consist of stabilized turf or other material acceptable to the Zoning Board or City Council.

(K) *Right-of-way.*

(1) The right-of-way shall be measured from lot line to lot line and shall be sufficiently wide to contain the roadway, curbs, shoulders, sidewalks, graded areas, utilities, and shade trees (if placed within the right-of-way). Additional right-of-way widths may be required to promote public safety and convenience. Right-of-way requirements are shown in below.

(2) The right-of-way width of a new street that is a continuation of an existing street shall in no case be continued at a width less than that of the existing street.

| <i>Right-of-Way Width Requirements</i> | | | | |
|---|----------------------|----------------------|---------------------------------------|---------------------------|
| <i>Street Classification</i> | <i>Roadway Width</i> | <i>Curb Required</i> | <i>Sidewalk or Graded Area</i> | <i>Total Right-of-Way</i> |

| Residential Subcollector Street on-street parking - 1 side | 34 feet | curb | sidewalk both sides | 50 feet |

(L) *Street grade and intersections.*

(1) *Generally.* The full width of the right-of-way of each street dedicated to the plat shall be graded, as specified in the Grading Plan and approved by the City Engineer.

(2) *Angle of intersection.* The angle formed by intersecting streets shall not be less than 75 degrees, with 90-degree intersections preferred.

(3) *Size of Intersection.* Intersections of more than 4 corners shall be prohibited.

(M) *Pavement section.*

(1) All streets and alleys shall be improved with concrete or bituminous surfaces, as specified in the construction plans and as approved by the City Engineer.

(2) Street pavement thickness shall vary by street hierarchy, subgrade properties, and pavement type.

(3) The wearcoat shall be applied to streets or roads within 1 year of their being paved and following at least 1 frost freeze.

(N) *Sidewalks.*

(1) Sidewalks shall be required depending on road classification and in accordance with the requirements shown in division (K).

(2) Where sidewalks are optional, they may be required if the development is close to pedestrian generators or include pedestrian generators, or to continue an existing walkway along

CHAPTER 151: SUBDIVISION REGULATIONS

an existing street, or, depending upon probable future development, as indicated in the Comprehensive Plan.

(3) In conventional developments, sidewalks shall be placed in the right-of-way, parallel to the street, unless an exception has been permitted to preserve topographical or natural features or to provide visual interest, or unless the applicant shows that an alternative pedestrian system provides safe and convenient circulation. In commercial and in high density residential areas, sidewalks may abut the curb.

(4) The width of sidewalks shall generally conform to the following standards, however, please refer to division (K) for a more specific sidewalk standard as it is linked to road type:

- (a) For single-family residential developments - 5 feet;
- (b) For multiple-family residential/public buildings - 6 feet;
- (c) For commercial areas - 6 feet; and
- (d) For industrial areas - 6 feet.

(O) *Bikeways.*

(1) Bicycle lanes, where required, shall be placed in the outside lane of a roadway, adjacent to the curb or shoulder. When on-street parking is permitted, the bicycle lane shall be between the parking lane and the outer lane of moving vehicles. Lanes shall be delineated with markings, preferably striping.

(2) Bikeways shall be constructed according to the specifications approved by the City Engineer.

(P) *Utility and shade tree areas.*

(1) Utilities and shade trees shall generally be located within the right-of-way on both sides of and parallel to the street.

(2) Utility areas shall be planted with grass or ground cover, or treated with other suitable cover material.

(Q) *Lighting.* Installation of street lights shall be required. At a minimum, the outdoor lighting requirements must conform to the following minimum standards.

(1) Lighting for safety shall be provided at intersections, along walkways, at entryways, between buildings, and in parking areas.

(2) Spacing of standards shall be equal to approximately four times the height of the standard.

(3) The maximum height of the standards shall not exceed the maximum building height permitted, or 25 feet, whichever is less.

(4) The height and shielding of lighting standards shall provide proper lighting without

TITLE XV: LAND USAGE

hazard to drivers or nuisance to residents, and the design of lighting standards shall be of a type appropriate to the development and the municipality.

(R) *Underground wiring.*

(1) All electric, telephone, television, and other communication lines, both main and service connections, servicing new developments shall be provided by underground wiring within easements or dedicated public rights-of-way, installed in accordance with the prevailing standards and practices of the utility or other companies providing the services.

(2) Lots that abut existing easements or public rights-of-way where overhead electric or telephone distribution supply lines and service connections have previously been installed may be supplied with electric and telephone service from those overhead lines, but the service connections from the utilities' overhead lines shall be installed underground. In the case of existing overhead utilities, should a road widening, or an extension of service, or other such condition occur as a result of the subdivision and necessitate the replacement or relocation of the utilities, the replacement or relocation shall be underground.

(3) Where overhead lines are permitted, the placement and alignment of poles shall be designed to lessen the visual impact of overhead lines. Alignments and pole locations shall be carefully routed to avoid locations along horizons. Clearing swaths through treed areas shall be avoided by selective cutting and a staggered alignment; trees shall be planted in open areas and at key locations to minimize the view of the poles and the alignments; and alignments shall follow rear lot lines and other alignments.

(4) Year-round screening of any utility apparatus appearing above the surface of the ground, other than utility poles, shall be required.

(S) *Signs.*

(1) Design and placement of traffic signs shall follow applicable state or local regulations.

(2) At least 2 street name signs shall be placed at each 4-way street intersection, and 1 at each "T" intersection. Signs shall be installed under light standards and free of visual obstruction. The design of street name signs shall be consistent, of a style appropriate to the community, and of a uniform size and color.

(3) Names of new streets shall not duplicate existing or platted street names unless a new street is a continuation of or is in alignment with the existing or platted street. In that event, it shall bear the name of the existing or platted street. Street names shall conform to the city street naming and property numbering system as applicable.

(4) Site information signs in planned developments shall follow a design theme that is related and complementary to other elements of the overall site design.

functioning public community water system.

(B) *Capacity.*

(1) The water supply system shall be adequate to handle the necessary flow based on complete development.

(2) The demand rates for all uses shall be considered in computing the total system demand. The system shall be capable of providing the required fire demand in addition to the required domestic demand.

(3) Fire protection shall be furnished for all developments. Minimum fire flows shall be approved by the Fire Chief or City Engineer.

(4) The water system shall be designed to carry peak hour flows and be capable of delivering the peak hourly demands, as determined by the City Engineer.

(C) *System design and placement.* System design and placement shall comply with the construction specifications as approved by the City Engineer.

(D) *Fire hydrants.*

(1) Hydrants shall be spaced to provide necessary fire flows. The average area per hydrant shall not exceed 120,000 square feet. In addition, hydrants shall be spaced so that each residence shall be within 400 feet of a hydrant and shall be located no more than 1,000 feet apart.

(B) *System design and placement.*

(1) The sanitary sewer system shall be adequate to handle the necessary flow based upon complete development.

(2) Average daily residential sewer flow shall be specified in plan submittals by the design engineer and as approved by the City Engineer.

(3) System design and placement shall be approved by the City Engineer.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

TITLE XV: LAND USAGE

§ 151.089 STORM WATER MANAGEMENT

(A) *Generally.*

(1) No plan will be approved for a plat that is subject to periodic flooding or contains poor drainage facilities until adequate drainage of the streets and lots is made possible.

(2) Design of the storm water management system shall be consistent with the applicable city, county, regional, or state storm drainage control regulations.

(3) The best available technology shall be used to minimize storm water runoff, increase on-site infiltration, encourage natural filtration functions, simulate natural drainage systems, and minimize off-site discharge of pollutants to ground and surface water. The technologies may include measures such as retention basins, recharge trenches, porous paving and piping, contour terraces, and swales.

(4) Drainage easements or land dedication may be required when the easements or land is needed in the public interest for purposes of proper drainage, prevention of erosion, or other public purpose. The owner shall furnish all necessary slope easements and drainage easements at no cost to the municipality.

(B) *System strategy and design.* Storm water management system design shall be approved by the City Engineer.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.090 EROSION AND SEDIMENT CONTROL

(A) The development shall conform to the natural limitations presented by topography and soil, so as to create the least potential for soil erosion.

(B) Erosion and siltation control measures shall be coordinated with the different stages of construction. Appropriate control measures shall be installed prior to development when necessary to control erosion.

(C) Land shall be developed in increments of workable size, such that adequate erosion and siltation controls can be provided as construction progresses. The smallest practical area of land shall be exposed at any 1 period of time.

(D) When soil is exposed, the exposure shall be for the shortest feasible period of time, as specified in the development agreement.

(E) Where the topsoil is removed, sufficient arable soil shall be set aside for respreading over the developed area. Topsoil shall be restored or provided to a depth of 4 inches and shall be of a quality at least equal to the soil quality prior to development.

(F) Natural vegetation shall be protected wherever possible.

(G) Runoff water shall be diverted to a sedimentation basin before being allowed to enter the natural drainage system. Storm water runoff from the developed site shall not, at any time,

CHAPTER 151: SUBDIVISION REGULATIONS

exceed the existing runoff level.

(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

§ 151.091 SURVEY MONUMENTS

All subdivision boundary corners, block and lot corners, road intersection corners, and points of tangency and curvature shall be marked with survey monuments meeting the minimum requirements of state law. All U.S., state, county, and other official benchmarks, monuments or triangulation stations in or adjacent to the property shall be preserved in precise position, unless a relocation is approved by the controlling agency. All lot corner pipes or iron rods shall be a minimum of 1/2 inch in diameter, 18 inches in length, and shall be inscribed with the registration number of the land surveyor making the survey, as prescribed in M.S. Ch. 505, as it may be amended from time to time.

OFF-TRACT IMPROVEMENTS

§ 151.105 PURPOSE

This subchapter is intended to ensure a pro rata share allocation of the costs for off-tract improvements necessitated by new development.

(Ord. 180, passed 11-1-2004)

§ 151.106 DEFINITION AND PRINCIPLES

As a condition of final subdivision approval, the City Council may require an applicant to pay a pro rata share of the cost of providing reasonable and necessary circulation improvements and water, sewerage, drainage facilities, and other improvements, including land and easements, located off-tract of the property limits of the subdivision or development but necessitated or required by the development. "Necessary" improvements are those clearly and substantially related to the development in question. The City Council shall provide in its resolution of approval the basis of the required improvements. The proportionate or pro rata amount of the cost of the facilities within a related or common area shall be based on the following criteria.

(Ord. 180, passed 11-1-2004)

§ 151.107 COST ALLOCATION

(A) *Full allocation.* In cases where off-tract improvements are necessitated by the proposed development, and where no other property owner(s) receive(s) a special benefit, the applicant may be required at his or her sole expense and as a condition of approval, to provide and install the improvements.

(B) *Proportionate allocation.* Where it is determined those properties outside the development will also be benefitted by the off-tract improvement; the following criteria shall be utilized in determining the proportionate share of the cost of the improvements to the developer.

TITLE XV: LAND USAGE

(1) *For sanitary sewers.* The applicant's proportionate share of distribution facilities, including the installation, relocation, or replacement of collector, trunk, and interceptor sewers, and associated appurtenances, shall be computed as follows:

(a) The capacity and the design of the sanitary sewer system shall be based on standards specified or approved by the City Engineer;

(b) The City Engineer shall provide the applicant with the existing and reasonably anticipated peak hour flows as well as capacity limits of the affected sewer system; and

(c) If the existing system does not have adequate capacity to accommodate the applicant's flow given existing and reasonably anticipated peak-hour flows, the pro rata share shall be computed as follows:

$$\text{Developer's cost} / \text{Total cost of enlargement or improvement} = \text{Development generated gallons per day to be accommodated by the enlargement or improvement} / \text{Capacity of enlargement or improvement (gals. per day)}$$

(2) *For water supplies.* The applicant's proportionate share of water distribution facilities including the installation, relocation, or replacement of water mains, hydrants, valves, and associated appurtenances shall be computed as follows:

(a) The capacity and the design of the water supply system shall be based on the standards specified or approved by the City Engineer;

(b) The City Engineer shall provide the applicant with the existing and reasonably anticipated capacity limits of the affected water supply system in terms of average demand, peak demand, and fire demand; and

(c) If the existing system does not have adequate capacity as defined above to accommodate the applicant's needs, the pro rata share shall be computed as follows:

$$\text{Developer's cost} / \text{Total cost of enlargement or improvement} = \text{Development generated gallons per day to be accommodated by the enlargement or improvement} / \text{Capacity of enlargement or improvement (gals. per day)}$$

(3) *For streets or roads.* The applicant's proportionate share of street improvements, alignment, channelization, barriers, new or improved traffic signalization, signs, curbs, sidewalks, trees, utility improvements not covered elsewhere, the construction or reconstruction of new or existing streets, and other associated street or traffic improvements shall be as follows:

(a) The City Engineer shall provide the applicant with the existing and reasonably anticipated future peak-flows for the off-tract improvement; and

(c) If the existing system does not have adequate capacity as defined above, the pro rata share shall be computed as follows:

CHAPTER 151: SUBDIVISION REGULATIONS

Developer's cost / Total cost of enlargement or improvement = Development peak hour traffic to be accommodated by the enlargement or improvement / Capacity of enlargement or improvement (peak hour traffic)

(4) *For drainage improvements.* The applicant's proportionate share of storm water and drainage improvements including the installation, relocation, or replacement of storm drains, culverts, catch basins, manholes, riprap, improved drainage ditches and appurtenances, and relocation or replacement or other storm drainage facilities or appurtenances, shall be determined as follows:

(a) The capacity and the design of the drainage system to accommodate storm water runoff shall be computed by the developer's engineer and approved by the City Engineer; and

(b) The capacity of the enlarged, extended, or improved system required for the subdivision and areas outside of the developer's tributary to the drainage system shall be determined by the developer's engineer subject to approval of the City Engineer. The developer's engineer shall prepare the plans for the system improvements and the estimated cost of the enlarged system calculated by the City Engineer. The pro rata share for the proposed improvements shall be computed as follows:

Developer's cost / Total cost of enlargement or improvement = Development generated peak rate of runoff expressed in cubic feet per second to be accommodated by the enlargement or improvement / Capacity of enlargement (total capacity expressed in cubic feet per second)

(5) *For other improvements.* The applicant's proportionate share of other capital improvements shall be computed as follows:

Developer's cost / Total cost of enlargement or improvement = Development share of enlargement or improvement / Capacity of enlargement or improvement

(Ord. 180, passed 11-1-2004)

§ 151.108 ESCROW ACCOUNTS

Where the proposed off-tract improvement is to be undertaken at some future date, the monies required for the improvement shall be deposited in a separate interest-bearing account to the credit of the city until the time as the improvement is constructed. If the off-tract improvement is not begun within 2 years of deposit, all monies and interest shall be returned to the applicant.

(Ord. 180, passed 11-1-2004)

ENFORCEMENT

§ 151.135 VIOLATIONS

(A) *Sales of lots from unrecorded plats.* It shall be a misdemeanor to sell, trade, or otherwise convey any lot or parcel of land as a part of, or in conformity with, any plan, plat, or replat of any subdivision or area located within the jurisdiction of this chapter unless the plan, plat, or replat shall have first been recorded in the office of the Recorder of Rice County.

(B) *Receiving or recording unapproved plats.* It shall be unlawful for a private individual to receive or record in any public office any plans plats of lands laid out in building lots and streets, alleys, or other portions of the same intended to be dedicated to public or private use, or for the use of purchasers or owners of lots fronting on or adjacent thereto and located within the jurisdiction of this chapter, unless the same shall there thereon, by endorsement or otherwise, be approved by the City Council.

(C) *Misrepresentation.* It shall be a misdemeanor for any person owning an addition or subdivision of land within a city to represent that any improvement upon any of the streets, alleys, or avenues of the addition or subdivision has been constructed according to the plan's specifications approved by the City Council, or has been supervised or inspected by the city when the improvements have not been so constructed, supervised, or inspected.

(D) *Misdemeanor.* Anyone violating any of the provisions of this chapter shall be guilty of a misdemeanor. Each day during which compliance is delayed shall constitute a separate offense. In addition, nothing shall prevent the city from exercising its civil remedies in response to a violation of this chapter, including, but not limited to, an action for an injunction.
(Ord. 180, passed 11-1-2004) Penalty, see § 10.99

TITLE XV: LAND USAGE

§ 151.136 FEES, CHARGES, AND EXPENSES

(A) Fees and charges, as well as expenses incurred by the city for engineering, planning, attorney, and other services related to the processing of application, shall be established by resolution of the Council and collected by the City Clerk/Treasurer for deposit in the city's accounts. Fees shall be established for the processing of request for platting, major and minor subdivisions, review of plans, and any other subdivision-related procedures as the Council may from time to time establish. The Council may also establish charges for public hearings, special meetings, or other such Council or Zoning Board actions as are necessary to process application.

(B) The fees, charges, and estimated expenses, shall be collected prior to city action on any application. All the applications must be accompanied by a written agreement between the city and the applicant/land owner (when the land owner and applicant are not the same person or entity, both the land owner and applicant must sign the agreement). Whereby the applicant/land owner agrees to pay all applicable fees, charges, and expenses as set forth by Council resolution, and which allows the city to assess that the above fees, charges, and expenses against the land owner if the monies are not paid within 30 days after a bill is sent to the applicant/land owner.

(C) The fees referred to above are only an estimate of the expense the city may incur. The applicant is responsible for any and all fees incurred by the city that result from his or her request. All charges are due and payable before the city signs a plat.

(D) These fees shall be in addition to sewer access charges, water access charges, zoning permit fees, inspection fees, subdivision fees, charges and expenses, and other such fees, charges, and expenses currently required by ordinance, or which may be established by ordinance in the future.

(A) *Generally.* Where lawful structure exists at the effective date of adoption or amendment of this chapter that could not be built under the terms of this chapter by reason of restrictions on area, height, yard, or other characteristics of the structure or its location on the lot, the structure may be continued so long as it remains otherwise lawful, subject to the following provisions.

(B) *Specifically.*

(1) No nonconforming structure may be enlarged or altered in a way which increases its nonconformity.

(2) Should the structure be damaged by any means to an extent of more than 50% of its replacement cost at time of destruction, any reconstruction work on nonconforming structures must occur within the existing footprint of the structure, or if enlarged, must occur in a manner that does not increase its nonconformity, the work must be completed within 12 months of sustaining the damage, the reconstruction efforts must be of like or similar materials, or the architectural design and building materials be approved by the Planning Commission.

(3) Should the structure be moved for any reason for any distance whatever, it shall thereafter conform to the regulations for the district in which it is located after it is moved.

(4) A lawful nonconforming building or structure which is the principal use of a parcel or lot and nonconforming by reason of the setbacks required by this chapter may be increased in size or bulk provided the following:

(a) The addition or alteration does not infringe upon established building lines, setbacks or any building requirements which were established when the building or structure was

CHAPTER 152: ZONING CODE

declared a legal nonconformity; and/or

(b) That the additions or alterations attached to the structure or building since being declared a legal nonconformity must not exceed 50% of the bulk of the building or 50% of its fair market value, as determined by the County Assessor and City Clerk/Treasurer whichever is more.

(5) If no structural alterations are made, any nonconforming use of a structure, or structure and premises, may be changed to another nonconforming use, provided that the Zoning Committee, in conformance with the procedures established in §§ 152.280 *et seq.*, either by proposing a general rule change or by making recommendations in the specific case, shall find that the proposed use is equally appropriate or more appropriate to the district than the existing nonconforming use. In recommending a change, the Zoning Committee may require appropriate conditions and safeguards in accordance with the provisions of this chapter.
(Ord. 170, § 2.02, passed 5-6-2002) Penalty, see § 10.99

§ 152.022 DISCONTINUANCE OF USE

When a nonconforming use of a structure, or structure and premises in combination, is voluntarily discontinued for 1 year or more, the structure, or structure and premises in combination, shall not thereafter be used except in conformance with the regulations of the district in which it is located.
(Ord. 170, § 2.03, passed 5-6-2002) Penalty, see § 10.99

§ 152.023 CONSTRUCTION ON NONCONFORMING LOTS OF RECORD

(A) Lots of record in the office of the County Recorder and dated prior to May 6, 2002, that do not meet the lot size or lot width requirements of this chapter may be allowed as building sites; provided the use is permitted in the zoning district, the lot has been in separate ownership from abutting lands at all times since it became substandard, was created compliant with official controls in effect at the time, and setback requirements of this chapter are met.

(B) If, in a group of two or more contiguous lots under the same ownership, any individual lot does not meet the lot size requirements of the zoning district within which it falls, it must not be considered as a separate parcel of land for the purpose of sale or development. The lot must be combined with one or more contiguous lots so they equal one or more conforming lots.

(C) If, in a group of two or more contiguous lots under the same ownership, any individual lot does not meet the lot size requirements of the zoning district within which it falls, it must not be considered as a separate parcel of land for the purpose of sale or development. The lot must be combined with one or more contiguous lots so they equal one or more conforming lots.
(Ord. passed 2-7-2005, Am. 2018-5, passed 7/2/2018) Penalty, see § 10.99

(C) No building or other structure shall hereafter be erected or altered:

- (1) In excess of the height requirements herein established;
- (2) With lot area, ground floor area, or total floor area less than the minimum;
- (3) To accommodate or house a number of families in excess of that allowed; and/or

(4) To provide for rear, side, or front yard setback areas, or other open spaces with less than the minimum dimensions herein required, or in any other manner contrary to the provisions of this chapter.

(D) No part of a yard setback area, open space, or off-street parking or loading space required for 1 use for the purpose of complying with this chapter, shall be included as part of a yard setback area, open space, or off-street parking or loading space required for any other use or building.

(E) No yard setback area or lot existing at the time of passage of this chapter shall be reduced in dimension or area below the minimum requirements set forth herein. Yard setback areas or lots created after the effective date of this chapter shall meet at least the minimum requirements established by this chapter.

Materials such as unfinished concrete or concrete block may compose up to 3 feet of the exterior perimeter of the structure, as measured from the ground vertically, and up to 25% of the remaining outer surface area of the structure not visible from a public right-of-way. Siding materials such as corrugated or sheet metal, unpainted wood composite materials, tile panels and reflective materials, but not glass, are prohibited. These provisions shall not apply to metal tool sheds used as assessor buildings only, located only in the rear yard portion of a lot, and not exceeding 160 square feet in area. CHAPTER 152: ZONING CODE

(B) In the case of a lot fronting a curvilinear street or cul-de-sac or otherwise irregular in shape or size, the width shall be determined by measuring the horizontal distance from the side lot lines measured at the front yard setback line.

(C) The required lot depth as established in each zoning district within this chapter shall be found by measuring the shortest horizontal distance between the front lot line and the rear lot line measured from a 90-degree angle from the street right-of-way within the lot boundaries.
(Ord. 170, § 3.02, passed 5-6-2002)

§ 152.037 USES NOT PROVIDED FOR WITHIN ZONING DISTRICTS

Whenever in any zoning district a use is neither specifically permitted nor denied, the use shall be considered prohibited. In that case, the City Council, the Zoning Committee, or a property owner may request a study by the city to determine if the use is acceptable and if so what zoning district would be most appropriate and the determination as to conditions and standards relating to the development of the use. The City Council and/or the Zoning Committee may initiate an amendment to the zoning ordinance to provide for the particular use under consideration or may find that the use is not compatible for development within the city.
(Ord. 170, § 3.03, passed 5-6-2002)

(2) *Computation of area on multi-faced sign.* The sign area for a sign with more than 1 face shall be computed by adding together the area of all sign faces visible from any 1 point. When 2 identical sign faces are placed back to back, so that both faces cannot be viewed from any 1 point at 1 time, and when the sign faces are part of the same structure and not more than 42 inches apart, the sign area shall be computed by the measurement of one of the faces.

(3) *Computation of height.* The height of a sign shall be computed as the distance from the base of the sign at normal grade to the top of the highest attachment component of the sign. Normal grade shall be construed to be the lower of existing grade prior to construction, or the newly established grade after construction, exclusive of any filling, berming, mounding, or

CHAPTER 152: ZONING CODE

excavating solely for the purpose of locating the sign. In cases where the normal grade cannot be reasonably determined, sign height shall be computed on the assumption that the normal grade at the base of the sign is equal to the elevation of the nearest point of the crown of a public street or the grade of the land at the principal entrance to the principal structure on the lot, whichever is lower.

In addition, a bulletin board may be permitted; provided that, a total of 30 square feet is not exceeded by both bulletin board and identification sign. The sign may be indirectly illuminated, but not flashing. No sign shall be erected closer than 8 feet to any side or rear lot line nor closer to the front lot line than 1/2 the depth of the front yard. The sign, when affixed to a building shall not project higher than 1 story, or 20 feet above curb level, whichever is lower, and a ground sign shall not project higher than 8 feet above ground level.

(2) *Size.* Billboard or posterboard sign structures shall not contain more than 2 signs per facing, nor shall the sum of the sign or signs exceed the length of 55 feet nor the surface area of 750 square feet.

(3) *Setback.* Billboard or posterboard sign structures must maintain a 25-foot minimum front yard setback off the property line. Where adjacent building structures within the same block have front yard setbacks different than those required, the front yard minimum setback shall be the average of the required setback and the actual setback of adjacent structures.

(4) *Distance from other uses.* No billboard or posterboard structure shall be permitted to be erected within 100 feet of an adjoining residential district boundary line or any public park, school, library, church, or government building. No billboard, posterboard, or advertising sign shall be located within 200 feet of a residential dwelling.

(5) *Spacing.* All billboard or posterboard sign structures shall be spaced at least 750 linear feet from another sign on the same side of the street right-of-way line.

(6) *Height.* The height of billboard or posterboard signs is limited to 40 feet above curb level.

CHAPTER 152: ZONING CODE

(7) *Conditional use.* A conditional use permit may be requested for the placement of billboard or posterboard signs on property zoned A Agricultural District.

(8) *State statutes.* All billboard or posterboard sign structures are also subject to any provisions not provided for in this code, but cited in the Minnesota Outdoor Advertising Control Act, M.S. Ch. 173, as it may be amended from time to time.

(G) *Sign prohibitions and restrictions applicable in all zoning districts.* The construction of any type of sign within the city shall conform to the requirements of the State Building Code. In addition, the following prohibitions and general restrictions shall apply to signs in all zoning districts in the city.

(1) No sign, whether illuminated or not, shall obscure any traffic-control signal from the vision of any motorist, in a moving traffic lane, within 150 feet of the signal.

(2) No sign visible from the street shall use the word “stop” or “danger” or any other word, phrase, symbol, or character with the intent of simulating a public safety warning or traffic sign.

(3) Awning and marquee signs must be limited to places of public assemblage. Marquee signs may extend to 2 feet of the curb line, but no such sign shall be less than 10 feet in the clear above the level of the sidewalk, at its lowest level. On authorized marquees and awnings there may be placed a sign which may extend not more than 4 feet above nor more than 1 foot below the marquee or awning, but under no circumstance shall the sign be wider than 8 feet.

(4) Any existing sign or logo painted directly to the surface of any wall shall be required to be repainted at least once every 3 years, and a sign permit shall be required for the painting. If the repainted sign should result in exceeding the total allowable sign area in the respective business or industrial district for the business sign, the sign shall be painted out or otherwise removed or reduced in area to conform to the limitations.

(5) Gooseneck and thin-line reflectors and lighting shall be permitted on illuminated signs; provided that, the reflectors and lighting do not extend more than 8 feet beyond the sign structure to which it is attached and the illumination is focused directly upon the face of the sign to reduce possibility of direct light rays shining onto adjoining property or into the public right-of-way.

(6) No sign is permitted which purports to be or resembles an official traffic-control device, sign, or signal, or which hides from view or interferes in any material degree with the effectiveness of any traffic-control device, sign, or signal, or which obstructs or interferes with the driver's view of approaching, merging, or intersecting traffic for a distance of 500 feet.

(7) No sign is allowed which has flashing or moving lights.

§ 152.219 TELECOMMUNICATION TOWERS AND ANTENNAE

(A) *Purpose.* To accommodate the communication needs of residents and businesses while protecting the public health, safety, and general welfare of the community, the city finds that these regulations are necessary in order to:

TITLE XV: LAND USAGE

(1) Facilitate the provision of wireless telecommunication services to the residents and businesses of the city;

(2) Minimize adverse visual effects of towers through careful site location and design standards;

(3) Avoid potential damage to adjacent properties from tower failure through structural standards and setback requirements; and

(4) Maximize the use of existing and approved towers and buildings to accommodate new wireless telecommunication antennas in order to reduce the number of towers needed to serve the community.

(B) *Required permits.* Prior to any construction activities, the following permits must be secured from the city:

(1) A zoning permit, as required by § 152.295 *et seq.*; and

(2) A conditional use permit, as required by this chapter, with attachments, as required by §§ 152.240 *et seq.*, and as required by the conditional use permit application.

(C) *Zoning district use.* Telecommunication towers and antennae will be allowed in any zoning district in the city upon the approval of the 2 permits required above. The conditional use permit is required regardless of the underlying zoning district.

(D) *Area, setback, and height restrictions.*

(1) *Lot area.* The minimum lot area requirements are determined by the zoning district in which the tower development site is located and as determined by any additional area needed to meet all setback requirements of this chapter.

(2) *Tower setbacks.* The minimum setback from all property lines and public rights of way for telecommunications towers shall be equal to its height, except for towers that are designed to collapse in upon themselves. For these later types of towers, the minimum yard setbacks are 1/2 the tower height or 50 feet, whichever is less.

(3) *Height restrictions.* A maximum height for telecommunications towers is 200 feet.

(E) *Co-location requirements.*

(1) A proposal for a new commercial wireless telecommunication service tower shall not be approved unless it can be documented by the applicant, as documented by a qualified and licensed engineer, that the telecommunication equipment planned for the proposed tower cannot be accommodated on an existing or approved tower, commercial building, or public structure within 1 mile radius of the proposed tower site due to 1 or more of the following reasons.

(a) The planned equipment would exceed the structural capacity of the existing or approved tower or commercial building, and the existing or approved tower cannot be reinforced, modified, or replaced to accommodate planned or equivalent equipment at a reasonable cost.

(b) The planned equipment would cause interference materially impacting the usability of other existing or planned equipment at the tower or building and interference cannot

CHAPTER 152: ZONING CODE

be prevented at a reasonable cost.

(c) Existing or approved towers and buildings within the search radius (1 mile) cannot accommodate the planned equipment at a height necessary to reasonably function.

(d) The applicant must demonstrate that a good faith effort to co-locate equipment on existing towers or structures within the 1 mile radius, but an agreement could not be reached.

(2) Predominantly economic reasons for not pursuing co-location sites shall not be accepted and would generally be grounds for rejection of the application and/or denial of the conditional use permit.

(3) Any proposed commercial wireless telecommunication service tower shall be designed to accommodate both the applicant's antennae and comparable antennae for at least 2 additional users. Towers must be designed to allow for future rearrangement of antennae upon the tower and to accept antennae mounted at varying heights.

(F) *Tower design requirements.* Proposed or modified towers and antennae shall meet the following design requirements.

(1) Towers and antennae shall be designed to blend into the surrounding environment through the use of color and camouflaging architectural treatment, except in instances where the color is dictated by federal or state authorities.

(2) Commercial wireless telecommunication service towers shall be of a monopole design unless the City Council determines that an alternative design would better blend in to the surrounding environment. Towers must be self-supporting without the use of wires, cables, beams, or other means.

(G) *Construction requirements.*

(1) All antennae, towers, and accessory structures shall comply with all applicable provisions of this chapter.

(2) Towers shall be certified by a qualified and licensed professional engineer to conform to the latest structural standards and wind loading requirements of the Uniform Building Code and Electronics Industry Association.

(3) No part of any antenna or tower nor any lines, cable, equipment, wires, or braces in connection with either shall at any time extend across or over any part of the right-of-way, public street, highway, sidewalk, or property line.

(4) Towers and associated antennae shall be designed to conform with accepted electrical engineering methods and practices and to comply with the provisions of the National Electrical Code.

(5) All signal and remote control conductors of low energy extending substantially horizontally above the ground between a tower or antenna and a structure, or between towers, shall be at least 8 feet above the ground at all points, unless buried underground.

(6) Every tower affixed to the ground shall be protected by a security fence to discourage climbing of the tower by unauthorized persons.

(7) Tower locations should provide the maximum amount of screening possible for off-

TITLE XV: LAND USAGE

site views of the facility. Existing on-site vegetation shall be preserved to the maximum extent practicable. The area around the base of the tower and any accessory structures shall be landscaped and/or screened. See § 152.210.

(H) *Lights and other attachments.*

(1) No antenna or tower shall have affixed or attached to it in any way, except during time of repair or installation, any lights, reflectors, flashers, or other illuminating device, except as required by the Federal Aviation Agency (FAA) or the Federal Communications Commission (FCC), nor shall any tower have constructed on, or attached to, in any way, any platform, catwalk, crow's nest, or like structure, except during periods of construction or repair.

(2) The use of any portion of a tower for signs other than warning or equipment information signs is prohibited.

(I) *Accessory utility buildings.* All utility buildings and structures accessory to a tower shall be architecturally designed to blend in with the surrounding environment and shall meet the minimum setback requirements of the zoning district in which the tower site is located. Ground-mounted equipment shall be screened from view by suitable vegetation, except where a design of non-vegetative screening better reflects and complements the architectural character of the surrounding neighborhood.

(J) *Screening standards.*

(1) When used, walls or fences must provide for full visual screening of accessory buildings or storage areas, as viewed from residential areas and state and county roads.

(2) The materials used for constructing the wall or fence shall be specified in the site plan and shall be subject to approval by the Zoning Committee and City Council.

(3) Berms, if used, shall be constructed with a slope not to exceed 3:1 and shall be covered with sod or other landscape material sufficient to prevent erosion of the berm.

(4) Trees, hedges, or other vegetative materials, when used, must provide at least 75% capacity throughout the year. The screening must also conform to all vegetative setback requirements of this chapter.

(K) *Maintenance requirements.*

(1) The yard area in front of fences and walls shall be trimmed and maintained in a neat and attractive manner.

(2) Repairs to damaged areas of walls or fences shall be made within 30 days of sustaining the damage.

(3) Areas left in a natural state and vegetative screening area shall be properly maintained in a sightly and well kept condition.

(4) Diseased, dying, or dead vegetative screening elements shall be removed and then replaced, at a minimum, with healthy plants of the same size required when first planted.

(L) *Abandoned or unused towers or portions of towers.*

CHAPTER 152: ZONING CODE

(1) All abandoned or unused towers and associated facilities shall be removed within 6 months of the cessation of operations at the site unless a time extension is approved by the City Council. A copy of the relevant portions of a signed lease which requires the applicant to remove the tower and any associated facilities upon the cessation of their operations shall be submitted at the time of application. In the event that a tower is not removed within 6 months of cessation of operations at a site, the tower and associated facilities may be removed by the city and the cost of removal assessed against the property.

(2) Unused portions of towers above manufactured connection shall be removed within 6 months of the time of antenna relocations. The replacement of portions of a tower previously removed requires the issuance of a new building/conditional use permit.

(M) *Antennae mounted on roofs, walls, and existing towers.* The placement of wireless telecommunication antennae on roofs, walls, and existing towers may be approved by the City Council, provided the antennae meet the requirements of this chapter, after submittal of:

(1) A site and building plan; and

(2) A report prepared by a qualified and licensed professional engineer indicating the existing structure or towers suitability to accept the antenna, and the proposed method of affixing the antenna to the structure. A complete detailing of all fixtures and couplings needed and the precise point of attachment shall be indicated.

(N) *Additional submittal requirements.* In addition to the information required elsewhere in this chapter, applications for towers shall include the following supplemental information.

(1) Documentation of the area to be served by the tower including a narrative describing why the site chosen is the most appropriate site for the tower location, the results of any environmental review conducted on the chosen site, and a discussion of why existing structures within the search area would not be suitable as locations or co-locations for the purpose of antennae.

(2) A copy of an agreement between the applicant and property owner that the site and tower will be designed for not less than 3 users. The agreement shall also include a statement that any unused or obsolete tower shall be removed by the property owner or applicant. This agreement shall be signed by the applicant and property owner and shall be attached to and become part of the permit.

(3) A report from a qualified and licensed professional engineer which:

(a) Describes the tower height and design including a cross-section and elevation;

(b) Documents the height above grade for all potential mounting positions for co-locating antennae and the minimum separation distances between antennae;

(c) Describes the tower capacity, including the number and type of antennae it can accommodate;

(d) Documents what steps the applicant will take to avoid interference with established public safety telecommunications;

(e) Includes an engineer's stamp and registration number; and

(f) Includes other information necessary to evaluate the request.

TITLE XV: LAND USAGE

(4) Before the issuance of a zoning permit, the following supplemental information shall be submitted:

(a) Proof that the proposed tower complies with regulations administered by the FAA; and

(b) A report from a qualified and licensed professional engineer which demonstrates the tower's compliance with the aforementioned structural and electrical standards.

(5) Additional liability insurance equivalent to the minimum city requirements and proof of insurance be provided with all other information contained with the submittal materials. (Ord. 170, § 11.15, passed 5-6-2002) Penalty, see § 10.99

§ 152.224 RESIDENTIAL PLANNED UNIT DEVELOPMENT (PUD)

(A) *Purpose.* To provide a set of procedures and standards to allow for greater flexibility in the development of neighborhoods with mixed densities or varying residential uses. The PUD process will permit variation in setbacks, height of buildings, lot area, width, and depth standards, densities, for the purpose of encouraging any of the following:

(1) Innovations in development proposals by integrating housing variety, design, and the location of structures;

TITLE XV: LAND USAGE

(2) Conservation and more efficient use of land resulting in smaller networks of utilities and streets thereby lowering development costs and public investment;

(3) Preservation and enhancement of desirable site characteristics such as natural topography, surface water features, or the prevention of soil erosion; or

(4) A more desirable and creative environment than might be possible through strict application of zoning and subdivision regulations.

(B) *General requirements and standards.*

(1) *Ownership.* An application for a PUD must be filed by the landowner or jointly by all landowners of the property included in the project. The application and all submissions must be directed to the development of the property as a unified whole. In the case of multiple owners, the approved plan shall be binding upon all owners.

(2) *Land use plan consistency.* The proposed PUD shall be consistent with the Morristown Land Use Plan.

(3) *Common open space.* Common open space at least sufficient to meet the minimum requirements as established in the Land Use Plan shall be provided, as well as, structures and improvements necessary and appropriate for the benefit and enjoyment of the residents of the PUD.

(4) *Operating and maintenance requirements for PUD common open space or facilities.* Whenever common open space or service facilities are provided within the PUD, the PUD plan shall contain provisions to assure the continued operation and maintenance of the open space and service facilities to a pre-determined standard. Common open space and service facilities within a PUD may be placed under the ownership of 1 or more of the following, as approved by the City Council:

(a) Dedicated to public, where a community wide use is anticipated and the Council agrees to accept the dedication;

2. The declaration of covenants, conditions, and restrictions or equivalent document shall specify that deeds, leases or documents of conveyance affecting buildings, units, parcels, tracts, townhouses, or apartments shall subject the properties to the terms of the declaration;

3. The declaration of covenants, conditions, and restrictions shall provide that an owner's association or corporation shall be members of the association or corporation which shall maintain all properties and common areas in good repair and shall assess individual property owners proportionate shares of joint or common costs. This declaration shall be reviewed by the Zoning Committee and City Council. The intent of this requirement is to protect

CHAPTER 152: ZONING CODE

the property values of the individual owner through establishing private control;

4. The declaration shall also provide that in the event the association or corporation fails to maintain properties in accordance with the applicable rules and regulations of the city or fails to pay taxes or assessments on properties as they become due and in the event the city incurs any expenses in enforcing its rules and regulations, which the expenses are not immediately reimbursed by the association or corporation, then the city shall have the right to assess each property its pro rated share of the expenses. 8. Property owners must pay their prorated share of the cost of the Association by means of an assessment to be levied by the Association which meet the requirements for becoming a lien on the property in accordance with state statutes;

9. The association must be able to adjust the assessment to meet changed needs; and

10. The bylaws and rules of the Association and all covenants and restrictions to be recorded must be approved by the Council prior to the approval of the final PUD plan.

(5) *Density*. The maximum allowable density variation in a PUD shall be determined by standards negotiated and agreed upon between the applicant and the city.

(6) *Utilities*. All utilities shall be installed underground.

(7) *Utility connections*.

(a) *Water connections*. Where more than 1 property is served from the same service line, individual unit shut-off valves shall be provided.

(b) *Sewer connections*. Where more than 1 unit is served by a sanitary sewer lateral which exceeds 300 feet in length, provision must be made for a manhole to allow adequate cleaning and maintenance of the lateral. All maintenance and cleaning shall be the responsibility of the property owners association or owner.

(8) *Roadways*. All streets shall conform to the design standards required by Chapter 151, or as approved by the City Council.

(9) *Landscaping*. In any PUD, landscaping shall be provided according to a plan approved by the Council. In assessing the landscaping plan, the Council shall consider the natural features of the particular site and the overall scheme of the PUD plan.

(10) *Setbacks*. The front and side yard design standards specified in the R-1 District will apply to the periphery of the PUD. No building within the project shall be nearer to another building than ½ the sum of the building heights of the 2 buildings.

TITLE XV: LAND USAGE

The City Council serving as the Board of Adjustment and Appeals shall, after receiving the written reports and recommendations of the Zoning Committee, decide upon request for variance from the literal provisions of the ordinance in instances where strict enforcement would cause non-economic and undue hardship because of circumstances that are unique to the property under consideration.

TITLE XV: LAND USAGE

(B) A variance may be granted only in the event that all the following circumstances exist:

The Zoning Committee shall conduct the review hearing in order to collect evidence and to hear all parties who may be interested in the resolution of an issue. Thereafter, the Committee shall make the recommendations as it deems appropriate to the Council concerning all matters which may arise under this chapter, including, but not limited to, conditional use permits, appeals from the interpretation and enforcement of this chapter by the Zoning Administrator, and variances from the literal provisions of this chapter. The Zoning Committee shall be advisory to the City Council.

The City Council may hear comments from the applicant, or Zoning Administrator, as it deems appropriate in the consideration of its decision. However, the City Council shall not conduct public hearing unless it determines that the issue under consideration is of significant and compelling importance to the city. If such a public hearing is to be conducted by the City Council, then the notice provisions of this chapter shall be followed. The city and not the applicant shall bear the cost of providing notice to the public hearing held by the Council pursuant to this chapter.

Publication and mailing notices shall be made not less than 10 days nor more than 30 days prior to the date of the hearing. For the purpose of giving mailed notice, the City Clerk/Treasurer may use any appropriate record to determine the names and addresses of owners. A copy of the notice and a list of the owners and addresses to which the notice was sent, shall be attested to by the City Clerk/Treasurer and shall be made a part of the records of the proceedings. For purposes of computing the 10 days of notice, the day after publication or mailing, shall be counted as the first day. Saturdays, Sundays, or any other day made a legal holiday by the city, state, or federal governments shall be included in the computation unless the tenth day of the period falls on such a day, when it shall not be counted. The failure to give mailed notice to individual property owners, or defects in the notice shall not invalidate the proceedings. Upon evidence that adequate notice has been served, at least 1 public hearing shall be held on each application. The applicant or duly authorized representative shall be present at the public hearings. Absence of the applicant or duly authorized representative shall be sufficient cause to deny the application. All other persons wishing to be heard at a hearing shall be heard although reasonable limitations may be imposed concerning time or subject materials at the discretion of the Commission or Council conducting the hearing.

§ 152.352 DEFINITIONS

For the purpose of this subchapter, the following definitions shall apply unless the context clearly indicates or requires a different meaning. The words “must” and “shall” are mandatory and not permissive. All distances, unless otherwise specified, shall be measured horizontally.

BLUFF A topographic feature, such as a hill, cliff, or embankment, having the following characteristics (an area with an average slope of less than 18% over a distance for 50 feet or more shall not be considered part of the bluff):

- (1) Part or all of the feature is located in a shoreland area;
- (2) The slope rises at least 25 feet above the ordinary high water level of the waterbody;

CHAPTER 152: ZONING CODE

(3) The grade of the slope, from the toe of the bluff to a point 25 feet or more above the ordinary high water level, averages 30% or greater; and

(4) The slope must drain toward the waterbody.

BLUFF IMPACT ZONE. A bluff and land located within 20 feet from the top of a bluff.

BUILDING LINE. A line parallel to a lot line or the ordinary high water level at the required setback beyond which a structure may not extend.

COMMERCIAL PLANNED UNIT DEVELOPMENTS. Typically uses that provide transient, short-term lodging spaces, rooms, or parcels, whose operations are essentially service-oriented. Hotel/motel accommodations, resorts, recreational vehicle and camping parks, and other primarily service-oriented activities are **COMMERCIAL PLANNED UNIT DEVELOPMENTS**.

COMMERCIAL USE. The principal use of land or buildings for the sale, lease, rental, or trade of products, goods, and services.

DECK. A horizontal, unenclosed platform, with or without attached railings, seats, trellises, or other features, attached or functionally related to a principal use or site, and at any point extending more than 3 feet above ground.

INTENSIVE VEGETATIVE CLEARING. The complete removal of trees or shrubs in a contiguous patch, strip, row, or block.

ORDINARY HIGH WATER LEVEL. The boundary of public waters and wetlands, an elevation delineating the highest water level that has been maintained for a sufficient period of time to leave evidence upon the landscape, commonly that point where the natural vegetation changes from predominantly aquatic to predominantly terrestrial. For watercourses, the **ORDINARY HIGH WATER LEVEL** is the elevation of the top of the bank of the channel.

PUBLIC WATERS. Any waters as defined in M.S. § 105.37, Subds. 14 and 15.

RESIDENTIAL PLANNED UNIT DEVELOPMENT. A use where the nature of residency is non-transient, and the major or primary focus of the development is not service-oriented. To qualify, the development must contain at least 5 dwelling units or sites.

SENSITIVE RESOURCE MANAGEMENT. The preservation and management of areas unsuitable for development in their natural state, due to constraints such as shallow soils over groundwater or bedrock, highly erosive or expansive soils, steep slopes, susceptibility to flooding, or occurrence of flora or fauna in need of special protection.

SHORE IMPACT ZONE. Land located between the ordinary high water level of a public water and a line parallel to it, at a setback of 50% of the structure setback.

SHORELAND. Land located within the following distances from public waters: 1,000 feet from the ordinary high water level of a lake, pond, or flowage; and 300 feet from a river or stream, or the landward extent of a floodplain designated by ordinance on a river or stream, whichever is greater. The limits of shorelands may be reduced whenever the waters involved are bounded by topographic divides that extend landward from the waters for lesser distances, and when approved by the Commissioner.

STEEP SLOPE. Land where agricultural activity or development is either not

TITLE XV: LAND USAGE

recommended or described as poorly suited, due to slope steepness and the site's soil characteristics, as mapped and described in available county soil surveys or other technical reports, unless appropriate design and construction techniques and farming practices are used in accordance with the provisions of this subchapter. Where specific information is not available, steep slopes are lands having average slopes over 12%, as measured over horizontal distances of 50 feet or more, that are not bluffs.

TOE OF THE BLUFF. The lower point of a 50-foot segment with an average slope exceeding 18%.

TOP OF THE BLUFF. The higher point of a 50-foot segment with an average slope exceeding 18%.

The shoreland area for the waterbodies listed below shall be as defined in § 152.352, and as shown on the official zoning map.

(A) Cannon River: Sections 22 and 23 in Township 109N, Range 22W;

(B) Dixon Creek: Sections 23 and 26 in Township 109N, Range 22W.
(Ord. passed 2-7-2005)

§ 152.354 LOT AREA AND WIDTH STANDARDS

The lot area and lot width standards for lots created after the date of enactment of this subchapter are as follows:

(A) *Lot area.* Lot area requirements for this overlay district shall conform to the area requirements specified in the underlying zoning district.

(B) *Lot width.* Lot area requirements must conform to the minimum standards as specified below.

| <i>Use</i> | | <i>Cannon River</i> | <i>Dixon Creek</i> |

§ 152.355 PLACEMENT, DESIGN, AND HEIGHT OF STRUCTURES

(A) *Setbacks.*

(1) Structures and facilities must be located to meet setbacks specified in the underlying district, provided the proposed building site is not located in a shore impact zone or in a bluff impact zone.

(2) Structures in the shoreland overlay district shall also be subject to the following setbacks:

- (a) From the ordinary high water level: 50 feet;
- (b) From the top of bluff: 30 feet;
- (c) From an unplatted cemetery: 50 feet;
- (d) From the right-of-way of a federal, state, or county highway: 50 feet; and
- (e) From the right-of-way of all other roads or streets: 20 feet.

(B) *Height of structures.* The height of structures shall be 25 feet, except for churches and nonresidential agricultural structures.

(Ord. passed 2-7-2005) Penalty, see § 10.99

§ 152.356 AGRICULTURAL USE STANDARDS

Steep slopes and shore and bluff impact zones must be maintained in permanent vegetation, or if cultivated, must be conducted in a manner that is consistent with the guidelines set up by the local soil

and water conservation district. The shore impact zone for parcels with permitted agricultural land uses is equal to a line parallel to, and 50 feet from, the ordinary high water level.

(Ord. passed 2-7-2005) Penalty, see § 10.99

Cross-reference:

For A Agricultural District regulations, see §§ 152.065 et seq.

§ 152.357 VEGETATION ALTERATION

Removal or alteration of vegetation in the shoreland district is subject to the following standards.

(A) Intensive vegetation clearing within the shore and bluff impact zones and on steep slopes is not allowed.

TITLE XV: LAND USAGE

(B) In shore and bluff impact zones and on steep slopes, limited clearing of trees and shrubs, and cutting, pruning, and trimming of trees is allowed to provide a view to the water from the principal dwelling site, provided that:

(1) The screening of structures, vehicles, or other facilities, as viewed from the water, assuming summer, leaf-on conditions, is not substantially reduced; and

(2) Along rivers, existing shading of water surfaces is preserved.
(Ord. passed 2-7-2005) Penalty, see § 10.99

§ 152.358 TOPOGRAPHIC ALTERATION (GRADING AND FILLING)

Excavations for the construction of structures and driveways under validly issued permits do not require the issuance of a separate grading and filling permit, but the standards in this section must be incorporated into the zoning permits issued for the construction of those structures.

(A) A grading and filling permit will be required for:

(1) The movement of more than 10 cubic yards of material on steep slopes or within the shore or bluff impact zones; or

(2) The movement of more than 50 cubic yards of material anywhere else within the shoreland district.

(B) The following considerations and conditions must be adhered to during the issuance of zoning permits, grading and filling permits, conditional use permits, variances and subdivision approvals.

(1) Grading or filling in any wetland is prohibited.

(2) Ground alterations must ensure that only the smallest amount of bare ground is exposed for the shortest time possible.

(3) Mulches or similar materials must be used for temporary bare soil coverage, and a permanent vegetation cover must be established as soon as possible.

(4) Methods to minimize soil erosion and to trap sediments before they reach any surface water feature must be used.

(5) Fill or excavated material must not be placed in a manner that creates an unstable slope.

(6) No alterations below the ordinary high water level are allowed.

(7) Topographic alterations are allowed only if they do not adversely affect adjacent or nearby properties.

(Ord. passed 2-7-2005) Penalty, see § 10.99

CHAPTER 152: ZONING CODE

§ 152.359 PLACEMENT AND DESIGN OF ROADS, DRIVEWAYS, AND PARKING AREAS

(A) Public and private roads and parking areas must be designed to take advantage of natural vegetation and topography to achieve maximum screening from view from public waters. Documentation must be provided by a qualified individual that all roads and parking areas are designed and constructed to minimize and control erosion to public waters.

(B) Roads, driveways, and parking areas must meet structure setbacks, and must not be placed within bluff and shore impact zones, when other reasonable and feasible placement alternatives exist. If no alternatives exist, they may be placed within these areas, and must be designed to minimize adverse impacts.

(Ord. passed 2-7-2005) Penalty, see § 10.99

§ 152.360 STORMWATER MANAGEMENT

The following standards shall apply.

(A) When possible, existing natural drainageways, wetlands, and vegetated soil surfaces must be used to convey, store, filter, and retain stormwater runoff before discharge to public waters.

(B) Development must be planned and conducted in a manner that will minimize the extent of disturbed areas, runoff velocities, erosion potential, and reduce and delay runoff volumes. Disturbed areas must be stabilized and protected as soon as possible, and facilities or methods used to retain sediment on the site.

(C) When natural features are not sufficient to handle stormwater runoff, constructed facilities, such as diversions, settling basins, skimming devices, dikes, waterways, and ponds, may be used, but are not encouraged. Preference must be given to designs using surface drainage, vegetation, and infiltration rather than buried pipes and manmade materials and facilities.

(D) Impervious surface coverage of lots must not exceed 25% of the lot area.

(E) No new stormwater outfalls to public waters are allowed. Reconstruction of any existing outfalls must provide filtering or settling of suspended solids, and skimming of surface debris before discharge.

(Ord. passed 2-7-2005) Penalty, see § 10.99

§ 152.361 WATER SUPPLY AND WASTEWATER TREATMENT

(A) *Water supply.*

(1) All new uses must connect to the public water supply system.

(2) If a property owner proposes to change uses or to expand the use on an existing parcel is currently served by an individual well, the owner must demonstrate that the standards for water quality, as mandated by the Minnesota Department of Health, are being met by the private water supply source.

(3) If the public water supply source is extended past an existing use that is served by a private water supply source, the owner of the parcel and existing use must connect to the public

TITLE XV: LAND USAGE

water supply within 1 year of the water supply system's extension.

(B) *Wastewater.*

(1) All new uses must connect to the public wastewater treatment system.

(2) If a property owner proposes to change uses, or to expand the use on an existing parcel currently served by a private wastewater treatment system, the owner must demonstrate that the existing system meets the standards for wastewater treatment mandated by the Minnesota Pollution Control Agency. If they do not, the owner must abandon the private treatment system and connect to the public wastewater collection and treatment system.

(3) If the public wastewater collection and treatment system is extended past an existing use that is served by a private wastewater treatment system, the owner of the parcel and existing use must connect to the public wastewater collection and treatment system within 1 year of the system's extension.

(Ord. passed 2-7-2005) Penalty, see § 10.99

CHAPTER 153: FLOODPLAIN MANAGEMENT

GENERAL PROVISIONS

§ 153.001 STATUTORY AUTHORIZATION

The legislature of the State of Minnesota has, in M.S. Chapters 103F and 462 delegated the responsibility to local government units to adopt regulations designed to minimize flood losses. Therefore, the City Council of the City of Morristown, Minnesota does ordain as follows in this chapter.

(Ord. 2011-2, passed 4-18-2011)

§ 153.002 FINDINGS OF FACT

(A) The flood hazard areas of the City of Morristown, Minnesota are subject to periodic inundation which results in potential loss of life, loss of property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures or flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety, and general welfare.

(B) Methods used to analyze flood hazards. This chapter is based upon a reasonable method of analyzing flood hazards which is consistent with the standards established by the Minnesota Department of Natural Resources.

(C) National Flood Insurance Program compliance. This chapter is adopted to comply with the rules and regulations of the National Flood Insurance Program codified as 44 Code of Federal Regulations Parts 59 -78, as amended, so as to maintain the community's eligibility in the National Flood Insurance Program.

(Ord. 2011-2, passed 4-18-2011)

§ 153.003 STATEMENT OF PURPOSE

It is the purpose of this chapter to promote the public health, safety, and general welfare and to minimize those losses described in § 153.002(A) by provisions contained herein.

(Ord. 2011-2, passed 4-18-2011)

§ 153.004 LANDS TO WHICH CHAPTER APPLIES

This chapter shall apply to all lands within the jurisdiction of Morristown, Minnesota shown on the Official Zoning Map and/or the attachments thereto as being located within the boundaries of the Floodway and Flood Fringe Districts.

(Ord. 2011-2, passed 4-18-2011)

§ 153.005 ESTABLISHMENT OF OFFICIAL ZONING MAP

The Official Zoning Map together with all materials attached thereto is hereby adopted by reference and declared to be a part of this chapter. The attached material shall include the Flood Insurance Study, City of Morristown, Minnesota, Rice County, as prepared by the Federal

TITLE XV: LAND USAGE

Emergency Management Agency and dated May 18, 1981, and the Flood Boundary and Floodway Map and Flood Insurance Rate Map dated November 18, 1981 therein. The Official Zoning Map shall be on file in the Office of the City Clerk.
(Ord. 2012-2, passed 4-18-2011)

§ 153.006 REGULATORY FLOOD PROTECTION ELEVATION

The regulatory flood protection elevation shall be an elevation no lower than 1 foot above the elevation of the regional flood plus any increases in flood elevation caused by encroachments on the flood plain that result from designation of a floodway.
(Ord. 2011-2, passed 4-18-2011)

§ 153.007 INTERPRETATION

(A) In their interpretation and application, the provisions of this chapter shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by state statutes.

(B) The boundaries of the zoning districts shall be determined by scaling distances on the Official Zoning Map. Where interpretation is needed as to the exact location of the boundaries of the district as shown on the Official Zoning Map, as for example where there appears to be a conflict between a mapped boundary and actual field conditions and there is a formal appeal of the decision of the Zoning Administrator, the Board of Adjustment shall make the necessary interpretation. All decisions will be based on elevations on the regional (100-year) flood profile, the ground elevations that existed on the site at the time the community adopted its initial floodplain ordinance or on the date of the first National Flood Insurance Program map showing the area within the 100-year floodplain if earlier, and other available technical data. Persons contesting the location of the district boundaries shall be given a reasonable opportunity to present their case to the Board of Adjustment and to submit technical evidence.
(Ord. 2011-2, passed 4-18-2011)

§ 153.008 ABROGATION AND GREATER RESTRICTIONS

It is not intended by this chapter to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this chapter imposes greater restrictions, the provisions of this chapter shall prevail. All other ordinances inconsistent with this chapter are hereby repealed to the extent of the inconsistency only.
(Ord. 2011-2, passed 4-18-2011)

§ 153.009 WARNING AND DISCLAIMER OF LIABILITY

This chapter does not imply that areas outside the flood plain districts or land uses permitted within such districts will be free from flooding or flood damages. This chapter shall not create liability on the part of Morristown, Minnesota or any officer or employee thereof for any flood damages that result from reliance on this chapter or any administrative decision lawfully made thereunder.
(Ord. 2011-2, passed 4-18-2011)

CHAPTER 153: FLOODPLAIN MANAGEMENT

§ 153.010 DEFINITIONS

Unless specifically defined below, words or phrases used in this chapter shall be interpreted so as to give them the same meaning as they have in common usage and so as to give this chapter its most reasonable application.

ACCESSORY USE OR STRUCTURE. A use or structure on the same lot with, and of a nature customarily incidental and subordinate to, the principal use or structure.

BASEMENT. Any area of a structure, including crawl spaces, having its floor or base subgrade (below ground level) on all four sides, regardless of the depth of excavation below ground level.

CONDITIONAL USE. A specific type of structure or land use listed in the official control that may be allowed but only after an in-depth review procedure and with appropriate conditions or restrictions as provided in the official zoning controls or building codes and upon a finding that:

- (1) Certain conditions as detailed in the zoning ordinance exist.
- (2) The structure and/or land use conform to the comprehensive land use plan if one exists and are compatible with the existing neighborhood.

EQUAL DEGREE OF ENCROACHMENT. A method of determining the location of floodway boundaries so that flood plain lands on both sides of a stream are capable of conveying a proportionate share of flood flows.

FLOOD. A temporary increase in the flow or stage of a stream or in the stage of a wetland or lake that results in the inundation of normally dry areas.

FLOOD FREQUENCY. The frequency for which it is expected that a specific flood stage or discharge may be equaled or exceeded.

FLOOD FRINGE. That portion of the flood plain outside of the floodway. **FLOOD FRINGE** is synonymous with the term “floodway fringe” used in the Flood Insurance Study, City of Morristown, Minnesota, Rice County.

FLOOD PLAIN. The beds proper and the areas adjoining a wetland, lake or watercourse which have been or hereafter may be covered by the regional flood.

FLOOD PROOFING. A combination of structural provisions, changes, or adjustments to properties and structures subject to flooding, primarily for the reduction or elimination of flood damages.

FLOODWAY. The bed of a wetland or lake and the channel of a watercourse and those portions of the adjoining flood plain which are reasonably required to carry or store the regional flood discharge.

LOWEST FLOOR. The lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, used solely for parking of vehicles, building access, or storage in an area other than a basement area, is not considered a building's **LOWEST FLOOR**.

TITLE XV: LAND USAGE

MANUFACTURED HOME. A structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. The term **MANUFACTURED HOME** does not include the term “recreational vehicle.”

OBSTRUCTION. Any dam, wall, wharf, embankment, levee, dike, pile, abutment, projection, excavation, channel modification, culvert, building, wire, fence, stockpile, refuse, fill, structure, or matter in, along, across, or projecting into any channel, watercourse, or regulatory flood plain which may impede, retard, or change the direction of the flow of water, either in itself or by catching or collecting debris carried by such water.

PRINCIPAL USE OR STRUCTURE. All uses or structures that are not accessory uses or structures.

REACH. A hydraulic engineering term to describe a longitudinal segment of a stream or river influenced by a natural or man-made obstruction. In an urban area, the segment of a stream or river between two consecutive bridge crossings would most typically constitute a **REACH**.

RECREATIONAL VEHICLE. A vehicle that is built on a single chassis, is 400 square feet or less when measured at the largest horizontal projection, is designed to be self-propelled or permanently towable by a light duty truck, and is designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use. For the purposes of this chapter, the term **RECREATIONAL VEHICLE** shall be synonymous with the term travel trailer/travel vehicle.

REGIONAL FLOOD. A flood which is representative of large floods known to have occurred generally in Minnesota and reasonably characteristic of what can be expected to occur on an average frequency in the magnitude of the 100-year recurrence interval. **REGIONAL FLOOD** is synonymous with the term “base flood” used in a flood insurance study.

REGULATORY FLOOD PROTECTION ELEVATION. The **REGULATORY FLOOD PROTECTION ELEVATION** shall be an elevation no lower than one foot above the elevation of the regional flood plus any increases in flood elevation caused by encroachments on the flood plain that result from designation of a floodway.

STRUCTURE. Anything constructed or erected on the ground or attached to the ground or on-site utilities, including, but not limited to, buildings, factories, sheds, detached garages, cabins, manufactured homes, recreational vehicles not meeting the exemption criteria specified in § 153.072(A) and other similar items.

SUBSTANTIAL DAMAGE. Damage of any origin sustained by a structure where the cost of restoring the structure to its before damaged condition would equal or exceed 50% of the market value of the structure before the damage occurred.

SUBSTANTIAL IMPROVEMENT. Within any consecutive 365-day period, any reconstruction, rehabilitation (including normal maintenance and repair), repair after damage, addition, or other improvement of a structure, the cost of which equals or exceeds 50% of the market value of the structure before the “start of construction” of the improvement. This term includes structures that have incurred “substantial damage,” regardless of the actual repair work performed. The term does not, however, include either:

(1) Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code

CHAPTER 153: FLOODPLAIN MANAGEMENT

enforcement official and which are the minimum necessary to assure safe living conditions.

(2) Any alteration of an “historic structure,” provided that the alteration will not preclude the structure’s continued designation as an “historic structure.” For the purpose of this chapter, “historic structure” shall be as defined in 44 Code of Federal Regulations, Part 59.1.

VARIANCE. A modification of a specific permitted development standard required in an official control including this chapter to allow an alternative development standard not stated as acceptable in the official control, but only as applied to a particular property for the purpose of alleviating a hardship, practical difficulty or unique circumstance as defined and elaborated upon in a community’s respective planning and zoning enabling legislation.
(Ord. 2011-2, passed 4-18-2011)

§ 153.011 ANNEXATIONS

The Flood Insurance Rate Map panels adopted by reference into § 153.005 above may include floodplain areas that lie outside of the corporate boundaries of Morristown, Minnesota at the time of adoption of this chapter. If any of these floodplain land areas are annexed into Morristown, Minnesota after the date of adoption of this chapter, the newly annexed floodplain lands shall be subject to the provisions of this chapter immediately upon the date of annexation into Morristown, Minnesota.
(Ord. 2011-2, passed 4-18-2011)

ESTABLISHMENT OF ZONING DISTRICTS

(Ord. 2011-2, passed 4-18-2011)

§ 153.033 STANDARDS FOR FLOODWAY CONDITIONAL USES

(A) *All uses.*

(1) No structure (temporary or permanent), fill (including fill for roads and levees), deposit, obstruction, storage of materials or equipment, or other uses may be allowed as a conditional use that will cause any increase in the stage of the 100-year or regional flood or cause an increase in flood damages in the reach or reaches affected.

(2) All floodway conditional uses shall be subject to the procedures and standards contained in § 153.083.

(3) The conditional use shall be permissible in the underlying zoning district if one exists.

(B) *Fill.*

(1) Fill, dredge spoil, and all other similar materials deposited or stored in the floodplain shall be protected from erosion by vegetative cover, mulching, riprap or other acceptable method.

(2) Dredge spoil sites and sand and gravel operations shall not be allowed in the floodway unless a long-term site development plan is submitted which includes an erosion/sedimentation prevention element to the plan.

(3) As an alternative, and consistent with division (B)(2) immediately above, dredge spoil disposal and sand and gravel operations may allow temporary, on-site storage of fill or other materials which would have caused an increase to the stage of the 100-year or regional flood but only after the governing body has received an appropriate plan which assures the removal of the materials from the floodway based upon the flood warning time available. The conditional use permit must be title registered with the property in the Office of the County Recorder.

(C) *Accessory structures.*

(1) Accessory structures shall not be designed for human habitation.

TITLE XV: LAND USAGE

(2) Accessory structures, if permitted, shall be constructed and placed on the building site so as to offer the minimum obstruction to the flow of flood waters:

(a) Whenever possible, structures shall be constructed with the longitudinal axis parallel to the direction of flood flow; and

(b) So far as practicable, structures shall be placed approximately on the same flood flow lines as those of adjoining structures.

(3) Accessory structures shall be elevated on fill or structurally dry flood proofed in accordance with the FP-1 or FP-2 flood proofing classifications in the State Building Code. As an alternative, an accessory structure may be flood proofed to the FP-3 or FP-4 flood proofing classification in the State Building Code provided the accessory structure constitutes a minimal investment, does not exceed 500 square feet in size at its largest projection, and for a detached garage, the detached garage must be used solely for parking of vehicles and limited storage. All flood proofed accessory structures must meet the following additional standards:

(a) The structure must be adequately anchored to prevent flotation, collapse or lateral movement of the structure and shall be designed to equalize hydrostatic flood forces on exterior walls;

(b) Any mechanical and utility equipment in a structure must be elevated to or above the regulatory flood protection elevation or properly flood proofed; and

(c) To allow for the equalization of hydrostatic pressure, there must be a minimum of 2 “automatic” openings in the outside walls of the structure having a total net area of not less than 1 square inch for every square foot of enclosed area subject to flooding. There must be openings on at least 2 sides of the structure and the bottom of all openings must be no higher than 1 foot above the lowest adjacent grade to the structure. Using human intervention to open a garage door prior to flooding will not satisfy this requirement for automatic openings.

(D) *Storage of materials and equipment.*

(1) The storage or processing of materials that are, in time of flooding, flammable, explosive, or potentially injurious to human, animal, or plant life is prohibited.

(2) Storage of other materials or equipment may be allowed if readily removable from the area within the time available after a flood warning and in accordance with a plan approved by the governing body.

(E) *Structural works.* Structural works for flood control that will change the course, current or cross section of protected wetlands or public waters shall be subject to the provisions of M.S. Chapter 103G. Community-wide structural works for flood control intended to remove areas from the regulatory flood plain shall not be allowed in the floodway.

(F) *Levee, dike or floodwall.* A levee, dike or floodwall constructed in the floodway shall not cause an increase to the 100-year or regional flood and the technical analysis must assume equal conveyance or storage loss on both sides of a stream.
(Ord. 2011-2, passed 4-18-2011) Penalty, see § 153.999

CHAPTER 153: FLOODPLAIN MANAGEMENT

FLOOD FRINGE DISTRICT (FF)

§ 153.040 PERMITTED USES

Permitted uses shall be those uses of land or structures listed as permitted uses in the underlying zoning use district(s). If no pre-existing, underlying zoning use districts exist, then any residential or non residential structure or use of a structure or land shall be a permitted use in the Flood Fringe District provided such use does not constitute a public nuisance. All permitted uses shall comply with the standards for Flood Fringe District “Permitted Uses” listed in § 153.041 and the “Standards for all Flood Fringe Uses” listed in § 153.044.
(Ord. 2011-2, passed 4-18-2011)

§ 153.041 STANDARDS FOR FLOOD FRINGE PERMITTED USES

(A) All structures, including accessory structures, must be elevated on fill so that the lowest floor including basement floor is at or above the regulatory flood protection elevation. The finished fill elevation for structures shall be no lower than 1 foot below the regulatory flood protection elevation and the fill shall extend at such elevation at least 15 feet beyond the outside limits of the structure erected thereon.

(B) As an alternative to elevation on fill, accessory structures that constitute a minimal investment and that do not exceed 500 square feet at its largest projection may be internally flood proofed in accordance with § 153.033(C)(3).

(C) The cumulative placement of fill where at any one time in excess of 1,000 cubic yards of fill is located on the parcel shall be allowable only as a conditional use, unless said fill is specifically intended to elevate a structure in accordance with division (A).

(D) The storage of any materials or equipment shall be elevated on fill to the regulatory flood protection elevation.

(E) The provisions of § 153.044 shall apply.
(Ord. 2011-2, passed 4-18-2011)

§ 153.042 CONDITIONAL USES

Any structure that is not elevated on fill or flood proofed in accordance with § 153.041(A) and (B) and or any use of land that does not comply with the standards in § 153.041(C) and (D) shall only be allowable as a conditional use. An application for a conditional use shall be subject to the standards and criteria and evaluation procedures specified in § 153.043 and § 153.044 and § 153.083.
(Ord. 2011-2, passed 4-18-2011)

§ 153.043 STANDARDS FOR FLOOD FRINGE CONDITIONAL USES

TITLE XV: LAND USAGE

(A) Alternative elevation methods other than the use of fill may be utilized to elevate a structure's lowest floor above the regulatory flood protection elevation. These alternative methods may include the use of stilts, pilings, parallel walls, etc., or above-grade, enclosed areas such as crawl spaces or tuck under garages. The base or floor of an enclosed area shall be considered above-grade and not a structure's basement or lowest floor if:

- (1) The enclosed area is above-grade on at least one side of the structure;
 - (2) It is designed to internally flood and is constructed with flood resistant materials;
- and

(3) It is used solely for parking of vehicles, building access or storage. The above-noted alternative elevation methods are subject to the following additional standards:

(a) Design and certification. The structure's design and as-built condition must be certified by a registered professional engineer or architect as being in compliance with the general design standards of the State Building Code and, specifically, that all electrical, heating, ventilation, plumbing and air conditioning equipment and other service facilities must be at or above the regulatory flood protection elevation or be designed to prevent flood water from entering or accumulating within these components during times of flooding.

(b) Specific standards for above-grade, enclosed areas. Above-grade, fully enclosed areas such as crawl spaces or tuck under garages must be designed to internally flood and the design plans must stipulate:

1. A minimum area of openings in the walls where internal flooding is to be used as a flood proofing technique. There shall be a minimum of 2 openings on at least 2 sides of the structure and the bottom of all openings shall be no higher than 1-foot above grade. The automatic openings shall have a minimum net area of not less than 1 square inch for every square foot of enclosed area subject to flooding unless a registered professional engineer or architect certifies that a smaller net area would suffice. The automatic openings may be equipped with screens, louvers, valves, or other coverings or devices provided that they permit the automatic entry and exit of flood waters without any form of human intervention; and

2. That the enclosed area will be designed of flood resistant materials in accordance with the FP-3 or FP-4 classifications in the State Building Code and shall be used solely for building access, parking of vehicles or storage.

(B) Basements, as defined by § 153.010, shall be subject to the following:

(1) Residential basement construction shall not be allowed below the regulatory flood protection elevation.

(2) Non-residential basements may be allowed below the regulatory flood protection elevation provided the basement is structurally dry flood proofed in accordance with division (C).

(C) All areas of non residential structures including basements to be placed below the regulatory flood protection elevation shall be flood proofed in accordance with the structurally dry flood proofing classifications in the State Building Code. Structurally dry flood proofing must meet the FP-1 or FP-2 flood proofing classification in the State Building Code and this shall require making the structure watertight with the walls substantially impermeable to the

CHAPTER 153: FLOODPLAIN MANAGEMENT

passage of water and with structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy. Structures flood proofed to the FP-3 or FP-4 classification shall not be permitted.

(D) When at any one time more than 1,000 cubic yards of fill or other similar material is located on a parcel for such activities as on-site storage, landscaping, sand and gravel operations, landfills, roads, dredge spoil disposal or construction of flood control works, an erosion/sedimentation control plan must be submitted unless the community is enforcing a state approved shoreland management ordinance. In the absence of a state approved shoreland ordinance, the plan must clearly specify methods to be used to stabilize the fill on site for a flood event at a minimum of the 100-year or regional flood event. The plan must be prepared and certified by a registered professional engineer or other qualified individual acceptable to the governing body. The plan may incorporate alternative procedures for removal of the material from the flood plain if adequate flood warning time exists.

(E) Storage of materials and equipment.

(1) The storage or processing of materials that are, in time of flooding, flammable, explosive, or potentially injurious to human, animal, or plant life is prohibited.

(2) Storage of other materials or equipment may be allowed if readily removable from the area within the time available after a flood warning and in accordance with a plan approved by the governing body.

(F) The provisions of § 153.044.
(Ord. 2011-2, passed 4-18-2011)

§ 153.044 STANDARDS FOR ALL FLOOD FRINGE USES

(A) All new principal structures must have vehicular access at or above an elevation not more than 2 feet below the regulatory flood protection elevation. If a variance to this requirement is granted, the Board of Adjustment must specify limitations on the period of use or occupancy of the structure for times of flooding and only after determining that adequate flood warning time and local flood emergency response procedures exist.

(B) Commercial uses. Accessory land uses, such as yards, railroad tracks, and parking lots may be at elevations lower than the regulatory flood protection elevation. However, a permit for such facilities to be used by the employees or the general public shall not be granted in the absence of a flood warning system that provides adequate time for evacuation if the area would be inundated to a depth and velocity such that when multiplying the depth (in feet) times velocity (in feet per second) the product number exceeds 4 upon occurrence of the regional flood.

(C) Manufacturing and industrial uses. Measures shall be taken to minimize interference with normal plant operations especially along streams having protracted flood durations. Certain accessory land uses such as yards and parking lots may be at lower elevations subject to requirements set out in division (B) above. In considering permit applications, due consideration shall be given to needs of an industry whose business requires that it be located in flood plain areas.

(D) Fill shall be properly compacted and the slopes shall be properly protected by the use of riprap, vegetative cover or other acceptable method. The Federal Emergency Management

TITLE XV: LAND USAGE

Agency (FEMA) has established criteria for removing the special flood hazard area designation for certain structures properly elevated on fill above the 100-year flood elevation - FEMA's requirements incorporate specific fill compaction and side slope protection standards for multi-structure or multi-lot developments. These standards should be investigated prior to the initiation of site preparation if a change of special flood hazard area designation will be requested.

(E) Flood plain developments shall not adversely affect the hydraulic capacity of the channel and adjoining flood plain of any tributary watercourse or drainage system where a floodway or other encroachment limit has not been specified on the Official Zoning Map.

(F) Standards for recreational vehicles are contained in § 153.072.

(G) All manufactured homes must be securely anchored to an adequately anchored foundation system that resists flotation, collapse and lateral movement. Methods of anchoring may include, but are not to be limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state or local anchoring requirements for resisting wind forces.

(Ord. 2011-2, passed 4-18-2011)

SUBDIVISIONS

§ 153.050 LAND SUITABILITY REVIEW CRITERIA

No land shall be subdivided which is unsuitable for the reason of flooding, inadequate drainage, water supply or sewage treatment facilities. All lots within the flood plain districts shall be able to contain a building site outside of the Floodway District at or above the regulatory flood protection elevation. All subdivisions shall have water and sewage treatment facilities that comply with the provisions of this chapter and have road access both to the subdivision and to the individual building sites no lower than 2 feet below the regulatory flood protection elevation. For all subdivisions in the flood plain, the Floodway and Flood Fringe District boundaries, the regulatory flood protection elevation and the required elevation of all access roads shall be clearly labeled on all required subdivision drawings and platting documents.

(Ord. 2011-2, passed 4-18-2011) Penalty, see § 153.999

§ 153.051 REMOVAL OF SPECIAL FLOOD HAZARD AREA DESIGNATION

The Federal Emergency Management Agency (FEMA) has established criteria for removing the special flood hazard area designation for certain structures properly elevated on fill above the 100-year flood elevation. FEMA's requirements incorporate specific fill compaction and side slope protection standards for multi-structure or multi-lot developments. These standards should be investigated prior to the initiation of site preparation if a change of special flood hazard area designation will be requested.

(Ord. 2011-2, passed 4-18-2011)

PUBLIC UTILITIES, RAILROADS, ROADS AND BRIDGES

CHAPTER 153: FLOODPLAIN MANAGEMENT

§ 153.060 PUBLIC UTILITIES

All public utilities and facilities such as gas, electrical, sewer, and water supply systems to be located in the flood plain shall be flood proofed in accordance with the State Building Code or elevated to above the regulatory flood protection elevation.
(Ord. 2011-2, passed 4-18-2011)

§ 153.061 PUBLIC TRANSPORTATION FACILITIES

Railroad tracks, roads, and bridges to be located within the flood plain shall comply with §§ 153.053.030 through 153.033 and §§ 153.040 through 153.044. Elevation to the regulatory flood protection elevation shall be provided where failure or interruption of these transportation facilities would result in danger to the public health or safety or where such facilities are essential to the orderly functioning of the area. Minor or auxiliary roads or railroads may be constructed at a lower elevation where failure or interruption of transportation services would not endanger the public health or safety.
(Ord. 2011-2, passed 4-18-2011)

§ 153.062 ON-SITE SEWAGE TREATMENT AND WATER SUPPLY SYSTEMS

Where public utilities are not provided:

(A) On-site water supply systems must be designed to minimize or eliminate infiltration of flood waters into the systems; and

(B) New or replacement on-site sewage treatment systems must be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters and they shall not be subject to impairment or contamination during times of flooding. Any sewage treatment system designed in accordance with the state's current statewide standards for on-site sewage treatment systems shall be determined to be in compliance with this section.
(Ord. 2011-2, passed 4-18-2011)

MANUFACTURED HOMES AND MANUFACTURED HOME PARKS AND PLACEMENT OF RECREATIONAL VEHICLES

§ 153.070 NEW MANUFACTURED HOME PARK

New manufactured home parks and expansions to existing manufactured home parks shall be subject to the provisions placed on subdivisions by § 153.050 and § 153.051.
(Ord. 2011-2, passed 4-18-2011)

§ 153.071 REPLACEMENT MANUFACTURED HOMES; EXISTING PARKS

(A) The placement of new or replacement manufactured homes in existing manufactured home parks or on individual lots of record that are located in flood plain districts will be treated as a new structure and may be placed only if elevated in compliance with §§ 153.040 through

TITLE XV: LAND USAGE

153.044. If vehicular road access for preexisting manufactured home parks is not provided in accordance with § 153.044(A), then replacement manufactured homes will not be allowed until the property owner(s) develops a flood warning emergency plan acceptable to the governing body.

(B) All manufactured homes must be securely anchored to an adequately anchored foundation system that resists flotation, collapse and lateral movement. Methods of anchoring may include, but are not to be limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state or local anchoring requirements for resisting wind forces. (Ord. 2011-2, passed 4-18-2011) Penalty, see § 153.999

§ 153.072 RECREATIONAL VEHICLES

Recreational vehicles that do not meet the exemption criteria specified in division (A) below shall be subject to the provisions of this chapter and as specifically spelled out in divisions (C) and (D) below.

(A) Exemption. Recreational vehicles are exempt from the provisions of this chapter if they are placed in any of the areas listed in division (B) below and further they meet the following criteria:

(1) Have current licenses required for highway use.

(2) Are highway ready meaning on wheels or the internal jacking system, are attached to the site only by quick disconnect type utilities commonly used in campgrounds and recreational vehicle parks and the recreational vehicle has no permanent structural type additions attached to it.

(3) The recreational vehicle and associated use must be permissible in any pre-existing, underlying zoning use district.

(B) Areas exempted for placement of recreational vehicles.

(1) Individual lots or parcels of record.

(2) Existing commercial recreational vehicle parks or campgrounds.

(3) Existing condominium type associations.

(C) Recreational vehicles exempted in division (A) lose this exemption when development occurs on the parcel exceeding \$500 for a structural addition to the recreational vehicle or exceeding \$500 for an accessory structure such as a garage or storage building. The recreational vehicle and all additions and accessory structures will then be treated as a new structure and shall be subject to the elevation/flood proofing requirements and the use of land restrictions specified in §§ 153.030 through 153.033 and §§ 153.040 through 153.044. There shall be no development or improvement on the parcel or attachment to the recreational vehicle that hinders the removal of the recreational vehicle to a flood free location should flooding occur.

(D) New commercial recreational vehicle parks or campgrounds and new residential type subdivisions and condominium associations and the expansion of any existing similar use exceeding 5 units or dwelling sites shall be subject to the following

(1) Any new or replacement recreational vehicle will be allowed in the Floodway or

CHAPTER 153: FLOODPLAIN MANAGEMENT

Flood Fringe Districts provided said recreational vehicle and its contents are placed on fill above the regulatory flood protection elevation and proper elevated road access to the site exists in accordance with § 153.044(A). No fill placed in the floodway to meet the requirements of this section shall increase flood stages of the 100-year or regional flood.

(2) All new or replacement recreational vehicles not meeting the criteria of division (D)(1) above may, as an alternative, be allowed as a conditional use if in accordance with the following provisions and the provisions of § 153.083. The applicant must submit an emergency plan for the safe evacuation of all vehicles and people during the 100 year flood. Said plan shall be prepared by a registered engineer or other qualified individual, shall demonstrate that adequate time and personnel exist to carry out the evacuation, and shall demonstrate the provisions of § 153.072(A)(1) and (A)(2) will be met. All attendant sewage and water facilities for new or replacement recreational vehicles must be protected or constructed so as to not be impaired or contaminated during times of flooding in accordance with § 153.062. (Ord. 2011-2, passed 4-18-2011) Penalty, see § 153.999

ADMINISTRATION

§ 153.080 ZONING ADMINISTRATOR

A Zoning Administrator or other official designated by the governing body shall administer and enforce this chapter. If the Zoning Administrator finds a violation of the provisions of this chapter the Zoning Administrator shall notify the person responsible for such violation in accordance with the procedures stated in § 153.999. (Ord. 2011-2, passed 4-18-2011)

§ 153.081 PERMITS, CERTIFICATION REQUIREMENTS AND RECORD KEEPING

Permit requirements.

(A) *Permit required.* A permit issued by the Zoning Administrator in conformity with the provisions of this chapter shall be secured prior to the erection, addition, modification, rehabilitation (including normal maintenance and repair), or alteration of any building, structure, or portion thereof; prior to the use or change of use of a building, structure, or land; prior to the construction of a dam, fence, or on-site septic system; prior to the change or extension of a nonconforming use; prior to the repair of a structure that has been damaged by flood, fire, tornado, or any other source; and prior to the placement of fill, excavation of materials, or the storage of materials or equipment within the flood plain.

(B) *Application for permit.* Application for a permit shall be made in duplicate to the Zoning Administrator on forms furnished by the Zoning Administrator and shall include the following where applicable: plans in duplicate drawn to scale, showing the nature, location, dimensions, and elevations of the lot; existing or proposed structures, fill, or storage of materials; and the location of the foregoing in relation to the stream channel.

(C) *State and federal permits.* Prior to granting a permit or processing an application for a conditional use permit or variance, the Zoning Administrator shall determine that the applicant has obtained all necessary state and federal permits.

TITLE XV: LAND USAGE

(D) *Certificate of zoning compliance for a new, altered, or nonconforming use.* It shall be unlawful to use, occupy, or permit the use or occupancy of any building or premises or part thereof hereafter created, erected, changed, converted, altered, or enlarged in its use or structure until a certificate of zoning compliance shall have been issued by the Zoning Administrator stating that the use of the building or land conforms to the requirements of this chapter.

(E) *Construction and use to be as provided on applications, plans, permits, variances and certificates of zoning compliance.* Permits, conditional use permits, or certificates of zoning compliance issued on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications, and no other use, arrangement, or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this chapter, and punishable as provided by § 153.999.

(F) *Certification.* The applicant shall be required to submit certification by a registered professional engineer, registered architect, or registered land surveyor that the finished fill and building elevations were accomplished in compliance with the provisions of this chapter. Flood proofing measures shall be certified by a registered professional engineer or registered architect.

(G) *Record of first floor elevation.* The Zoning Administrator shall maintain a record of the elevation of the lowest floor (including basement) of all new structures and alterations or additions to existing structures in the flood plain. The Zoning Administrator shall also maintain a record of the elevation to which structures or alterations and additions to structures are flood proofed.

(H) *Notifications for watercourse alterations.* The Zoning Administrator shall notify, in riverine situations, adjacent communities and the Commissioner of the Department of Natural Resources prior to the community authorizing any alteration or relocation of a watercourse. If the applicant has applied for a permit to work in the beds of public waters pursuant to M.S. Chapter 103G, this shall suffice as adequate notice to the Commissioner of Natural Resources. A copy of said notification shall also be submitted to the Chicago Regional Office of the Federal Emergency Management Agency (FEMA).

(I) *Notification to FEMA when physical changes increase or decrease the 100-year flood elevation.* As soon as is practicable, but not later than 6 months after the date such supporting information becomes available, the Zoning Administrator shall notify the Chicago Regional Office of FEMA of the changes by submitting a copy of said technical or scientific data. (Ord. 2011-2, passed 4-18-2011) Penalty, see § 153.999

§ 153.082 APPEALS AND VARIANCES/DUTIES OF THE BOARD OF ADJUSTMENT

Board of Adjustment.

(A) *Rules.* The Board of Adjustment which will be the City Council shall adopt rules for the conduct of business and may exercise all of the powers conferred on such boards by state law.

(B) *Administrative review.* The Board of Adjustment which will be the City Council shall hear and decide appeals where it is alleged there is error in any order, requirement, decision, or determination made by an administrative official in the enforcement or administration of this chapter.

CHAPTER 153: FLOODPLAIN MANAGEMENT

(C) *Variances.* The Board of Adjustment which will be the City Council may authorize upon appeal in specific cases such relief or variance from the terms of this chapter as will not be contrary to the public interest and only for those circumstances such as hardship, practical difficulties or circumstances unique to the property under consideration, as provided for in the respective enabling legislation for planning and zoning for cities or counties as appropriate. In the granting of such variance, the Board of Adjustment shall clearly identify in writing the specific conditions that existed consistent with the criteria specified in this chapter, any other zoning regulations in the community, and in the respective enabling legislation that justified the granting of the variance. No variance shall have the effect of allowing in any district uses prohibited in that district, permit a lower degree of flood protection than the regulatory flood protection elevation for the particular area, or permit standards lower than those required by state law. The following additional variance criteria of the Federal Emergency Management Agency must be satisfied:

(1) Variances shall not be issued by a community within any designated regulatory floodway if any increase in flood levels during the base flood discharge would result.

(2) Variances shall only be issued by a community upon (a) a showing of good and sufficient cause, (b) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (c) a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public, or conflict with existing local laws or ordinances.

(3) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(D) *Hearings.* Upon filing with the Board of Adjustment which will be the City Council of an appeal from a decision of the Zoning Administrator, or an application for a variance, the Board of Adjustment shall fix a reasonable time for a hearing and give due notice to the parties in interest as specified by law. The Board of Adjustment shall submit by mail to the Commissioner of Natural Resources a copy of the application for proposed variances sufficiently in advance so that the Commissioner will receive at least ten days notice of the hearing.

(E) *Decisions.* The Board of Adjustment which will be the City Council shall arrive at a decision on such appeal or variance within 60 days. In passing upon an appeal, the Board of Adjustment may, so long as such action is in conformity with the provisions of this chapter, reverse or affirm, wholly or in part, or modify the order, requirement, decision or determination of the Zoning Administrator or other public official. It shall make its decision in writing setting forth the findings of fact and the reasons for its decisions. In granting a variance the Board of Adjustment may prescribe appropriate conditions and safeguards such as those specified in § 153.083(F), which are in conformity with the purposes of this chapter. Violations of such conditions and safeguards, when made a part of the terms under which the variance is granted, shall be deemed a violation of this chapter punishable under § 153.999. A copy of all decisions granting variances shall be forwarded by mail to the Commissioner of Natural Resources within 10 days of such action.

(F) *Appeals.* Appeals from any decision of the Board of Adjustment may be made, and as specified in this community's official controls and also by Minnesota Statutes.

(G) *Flood insurance notice and record keeping.* The Zoning Administrator shall notify the applicant for a variance that: (1) The issuance of a variance to construct a structure below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (2) Such construction below the 100-year or regional

TITLE XV: LAND USAGE

flood level increases risks to life and property. Such notification shall be maintained with a record of all variance actions. A community shall maintain a record of all variance actions, including justification for their issuance, and report such variances issued in its annual or biennial report submitted to the Administrator of the National Flood Insurance Program. (Ord. 2011-2, passed 4-18-2011)

§ 153.083 CONDITIONAL USES; STANDARDS AND EVALUATION PROCEDURE

Conditional uses. The Zoning Board shall hear and decide applications for conditional uses permissible under this chapter. Applications shall be submitted to the Zoning Administrator who shall forward the application to City Councillor consideration.

(A) *Hearings.* Upon filing with the City Council an application for a conditional use permit, the City Council shall submit by mail to the Commissioner of Natural Resources a copy of the application for proposed conditional use sufficiently in advance so that the Commissioner will receive at least 10 days notice of the hearing.

(B) *Decisions.* The City Council shall arrive at a decision on a conditional use within 60 days. In granting a conditional use permit the City Council shall prescribe appropriate conditions and safeguards, in addition to those specified in division (F), which are in conformity with the purposes of this chapter. Violations of such conditions and safeguards, when made a part of the terms under which the conditional use permit is granted, shall be deemed a violation of this chapter punishable under § 153.999. A copy of all decisions granting conditional use permits shall be forwarded by mail to the Commissioner of Natural Resources within 10 days of such action.

(C) *Procedures to be followed by the City Council in passing on conditional use permit applications within all flood plain districts.*

(1) Require the applicant to furnish such of the following information and additional information as deemed necessary by the City Council for determining the suitability of the particular site for the proposed use:

(a) Plans in triplicate drawn to scale showing the nature, location, dimensions, and elevation of the lot, existing or proposed structures, fill, storage of materials, flood proofing measures, and the relationship of the above to the location of the stream channel; and

(b) Specifications for building construction and materials, flood proofing, filling, dredging, grading, channel improvement, storage of materials, water supply and sanitary facilities.

(2) Transmit one copy of the information described in division (C)(1) to a designated engineer or other expert person or agency for technical assistance, where necessary, in evaluating the proposed project in relation to flood heights and velocities, the seriousness of flood damage to the use, the adequacy of the plans for protection, and other technical matters.

(3) Based upon the technical evaluation of the designated engineer or expert, the City Council shall determine the specific flood hazard at the site and evaluate the suitability of the proposed use in relation to the flood hazard.

(D) *Factors upon which the decision of the City Council shall be based.* In passing upon conditional use applications, the City Council shall consider all relevant factors specified in other

CHAPTER 153: FLOODPLAIN MANAGEMENT

sections of this chapter, and:

(1) The danger to life and property due to increased flood heights or velocities caused by encroachments.

(2) The danger that materials may be swept onto other lands or downstream to the injury of others or they may block bridges, culverts or other hydraulic structures.

(3) The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination, and unsanitary conditions.

(4) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.

(5) The importance of the services provided by the proposed facility to the community.

(6) The requirements of the facility for a waterfront location.

(7) The availability of alternative locations not subject to flooding for the proposed use.

(8) The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.

(9) The relationship of the proposed use to the comprehensive plan and flood plain management program for the area.

(10) The safety of access to the property in times of flood for ordinary and emergency vehicles.

(11) The expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters expected at the site.

(12) Such other factors which are relevant to the purposes of this chapter.

(E) *Time for acting on application.* The City Council shall act on an application in the manner described above within 60 days from receiving the application, except that where additional information is required pursuant to division (C). The City Council shall render a written decision within 30 days from the receipt of such additional information.

(F) *Conditions attached to conditional use permits.* Upon consideration of the factors listed above and the purpose of this chapter, the City Council, shall attach such conditions to the granting of conditional use permits as it deems necessary to fulfill the purposes of this chapter. Such conditions may include, but are not limited to, the following:

(1) Modification of waste treatment and water supply facilities.

(2) Limitations on period of use, occupancy, and operation.

(3) Imposition of operational controls, sureties, and deed restrictions.

(4) Requirements for construction of channel modifications, compensatory storage, dikes, levees, and other protective measures.

TITLE XV: LAND USAGE

(5) Flood proofing measures, in accordance with the State Building Code and this chapter. The applicant shall submit a plan or document certified by a registered professional engineer or architect that the flood proofing measures are consistent with the regulatory flood protection elevation and associated flood factors for the particular area.
(Ord. 2011-2, passed 4-18-2011) Penalty, see § 153.999

NONCONFORMING USES

§ 153.090 NONCONFORMING USES

A structure or the use of a structure or premises which was lawful before the passage or amendment of this chapter but which is not in conformity with the provisions of this chapter may be continued subject to the following conditions. Historic structures, as defined in § 153.010, shall be subject to the provisions of divisions (A) through (E).

(A) No such use shall be expanded, changed, enlarged, or altered in a way that increases its nonconformity.

(B) Any structural alteration or addition to a nonconforming structure or nonconforming use which would result in increasing the flood damage potential of that structure or use shall be protected to the Regulatory Flood Protection Elevation in accordance with any of the elevation on fill or flood proofing techniques (i.e., FP-1 thru FP-4 floodproofing classifications) allowable in the State Building Code, except as further restricted in division (C) and (F) below.

(C) The cost of all structural alterations or additions to any nonconforming structure over the life of the structure shall not exceed 50% of the market value of the structure unless the conditions of this section are satisfied. The cost of all structural alterations and additions must include all costs such as construction materials and a reasonable cost placed on all manpower or labor. If the cost of all previous and proposed alterations and additions exceeds 50% of the market value of the structure, then the structure must meet the standards of §§ 153.030 through 153.033 and §§ 153.040 through 153.044 for new structures depending upon whether the structure is in the Floodway or Flood Fringe District, respectively.

(D) If any nonconforming use is discontinued for 12 consecutive months, any future use of the building premises shall conform to this chapter. The Assessor shall notify the Zoning Administrator in writing of instances of nonconforming uses that have been discontinued for a period of 12 months.

(E) If any nonconforming use or structure is substantially damaged, as defined in § 153.010, it shall not be reconstructed except in conformity with the provisions of this chapter. The applicable provisions for establishing new uses or new structures in §§ 153.030 through 153.033 and §§ 153.040 through 153.044 will apply depending upon whether the use or structure is in the Floodway or Flood Fringe District, respectively.

(F) If a substantial improvement occurs, as defined in § 153.010, from any combination of a building addition to the outside dimensions of the existing building or a rehabilitation, reconstruction, alteration, or other improvement to the inside dimensions of an existing nonconforming building, then the building addition and the existing nonconforming building must meet the requirements of §§ 153.030 through 153.033 and §§ 153.040 through 153.044 for new structures, depending upon whether the structure is in the Floodway or Flood Fringe

CHAPTER 153: FLOODPLAIN MANAGEMENT

District, respectively.
(Ord. 2011-2, passed 4-18-2011)

AMENDMENTS

§ 153.100 AMENDMENTS

(A) The flood plain designation on the Official Zoning Map shall not be removed from flood plain areas unless it can be shown that the designation is in error or that the area has been filled to or above the elevation of the regulatory flood protection elevation and is contiguous to lands outside the flood plain. Special exceptions to this rule may be permitted by the Commissioner of Natural Resources if he or she determines that, through other measures, lands are adequately protected for the intended use.

(B) All amendments to this chapter, including amendments to the Official Zoning Map, must be submitted to and approved by the Commissioner of Natural Resources prior to adoption. Changes in the Official Zoning Map must meet the Federal Emergency Management Agency's (FEMA) Technical conditions and criteria and must receive prior FEMA approval before adoption. The Commissioner of Natural Resources must be given 10-days written notice of all hearings to consider an amendment to this chapter and said notice shall include a draft of the chapter amendment or technical study under consideration.
(Ord. 2011-2, passed 4-18-2011)

§ 153.999 PENALTY

(A) Violation of the provisions of this chapter or failure to comply with any of its requirements (including violations of conditions and safeguards established in connection with grants of variances or conditional uses) shall constitute a misdemeanor and shall be punishable as defined by law.

(B) Nothing herein contained shall prevent Morristown, Minnesota from taking such other lawful action as is necessary to prevent or remedy any violation. Such actions may include but are not limited to:

(1) In responding to a suspected chapter violation, the Zoning Administrator and local government may utilize the full array of enforcement actions available to it including but not limited to prosecution and fines, injunctions, after-the-fact permits, orders for corrective measures or a request to the National Flood Insurance Program for denial of flood insurance availability to the guilty party. The community must act in good faith to enforce these official controls and to correct chapter violations to the extent possible so as not to jeopardize its eligibility in the National Flood Insurance Program.

(2) When a chapter violation is either discovered by or brought to the attention of the Zoning Administrator, the Zoning Administrator shall immediately investigate the situation and document the nature and extent of the violation of the official control. As soon as is reasonably possible, this information will be submitted to the appropriate Department of Natural Resources' and Federal Emergency Management Agency Regional Office along with the community's plan of action to correct the violation to the degree possible.

TITLE XV: LAND USAGE

(3) The Zoning Administrator shall notify the suspected party of the requirements of this chapter and all other official controls and the nature and extent of the suspected violation of these controls. If the structure and/or use is under construction or development, the Zoning Administrator may order the construction or development immediately halted until a proper permit or approval is granted by the community. If the construction or development is already completed, then the Zoning Administrator may either: (a) issue an order identifying the corrective actions that must be made within a specified time period to bring the use or structure into compliance with the official controls; or (b) notify the responsible party to apply for an after-the-fact permit/development approval within a specified period of time not to exceed 30-days.

(4) If the responsible party does not appropriately respond to the Zoning Administrator within the specified period of time, each additional day that lapses shall constitute an additional violation of this chapter and shall be prosecuted accordingly. The Zoning Administrator shall also upon the lapse of the specified response period notify the landowner to restore the land to the condition which existed prior to the violation of this chapter.
